(a)
Level 2 forest ecological stressors
Mining
Land use & development
Land-use change
Herbicides/Pesticides
Habitat loss
Forest loss
Fertilizer
Construction
Species loss
Population expansion
Landscape changes
Biotic agents
Logging
Human disturbance
Soil pollution
Invasive species and noxious weeds
Grazing
Air pollution
Fragmentation
Fire regime
Disease outbreak
Insect infestation
Climate change

(b)
Level 2 grassland ecological stressors
Wind erosion
Vegetation manipulation
Species loss
Species extinction
Soil erosion
Shrub encroachment
Recreation
Landscape changes
Habitat loss
Critical habitat
Bailing for hay
Population expansion
Land use & development
Insect infestation
Human disturbance
Herbicides/Pesticides
Fertilizer
Cultivation
Air pollution
Oil and gas production
Construction
Fragmentation
Fire regime
Invasive species and noxious weeds
Climate change
Grazing
