1. Comparison over the similarity constructed through Loudness-s02

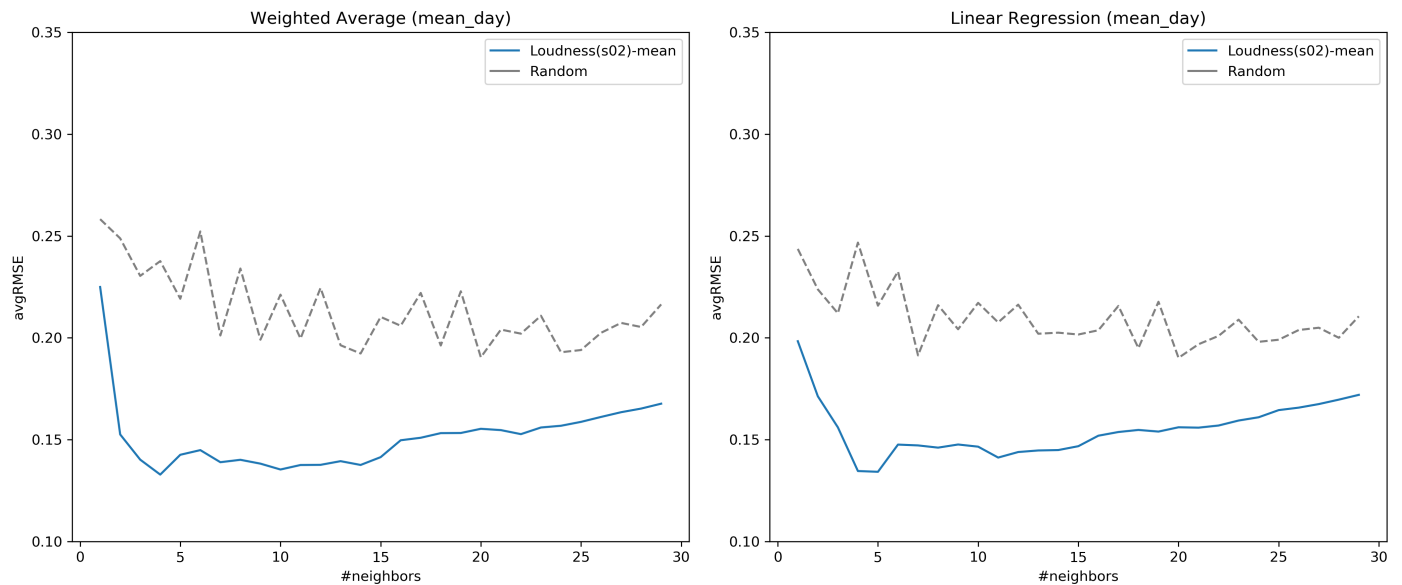

Figure S1. RMSE over Loudness-(s02)

2. RQ2:User Outlierness

The two reference (termed as Ref) users who have differences in their tinnitus loudness and distress observations are shown:

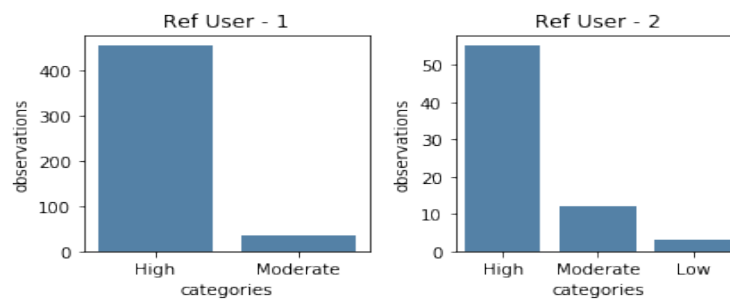

Figure S2. User's recordings distributed across the categories for loudness(s02)

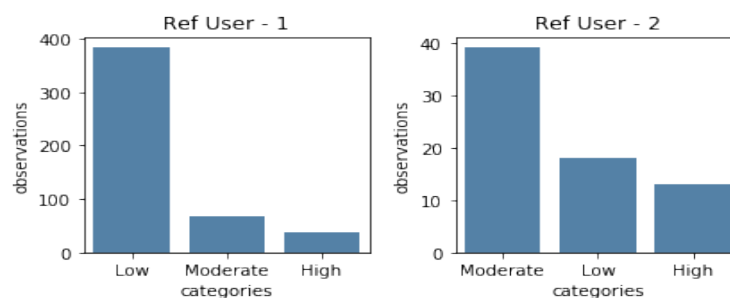

Figure S3. User's recordings distributed across the categories for tinnitus distress(s03)
