

Supplementary Table S1

Table S1. The inhibition of *Asaia lannensis* cells forming biofilms [%] in the presence of monomeric (DTAB) or gemini (C6) surfactants.

Time of action [days]	Type of surfactant	Surfactant concentration [μ M]		
		$\frac{1}{4}$ MIC	$\frac{1}{2}$ MIC	MIC
3	C6	63.2	100	100
	DTAB	23.2	44.6	80.9
6	C6	48.8	100	100
	DTAB	24.3	59.8	93

% inhibition = $100 - [(\log_{10} \text{ with surfactant} / \log_{10} \text{ without surfactant}) * 100]$ [33]
