**Figure S1.** MM-PBSA and Interaction entropy residue specific contribution.  $\Delta\Delta G_{\text{total}}$  contribution by residue. (A)  $\Delta\Delta H$  for the wild type complex and gamma variant complex obtained with MM-PBSA technique. (B)  $-T\Delta\Delta S$  for the wild type complex and gamma variant complex obtained by computing the interaction entropy.

**Table S1.** Crystallographic complexes of the six SARS-CoV-2 variants of concern.
