The supplementary information contains 10 pages, and includes 6 tables and 2 figures.

**List of contents of the supplementary information:**

**Table S1.** The set code value of variables used in each experiment and the values of extraction recovery (%) obtained for each compound.

**Table S2.** The magnitude of the effects and the significance level for the variables and their interactions.

**Table S3.** Results obtained for contaminated milk and egg samples.

**Table S4.** Results of steroids and NSAIDs obtained on the milk analyzed samples.

**Table S5.** Results of steroids and NSAIDs obtained on the milk analyzed samples.

**Table S6.** Physical-chemical properties of tested compounds and abbreviations.

**Figure S1.** The optimal conditions predicted by model, minimum, maximum and optimum extraction recovery values, and the value of desirability function.

**Figure S2.** Map indication of all 15 sampling points in the investigated area.

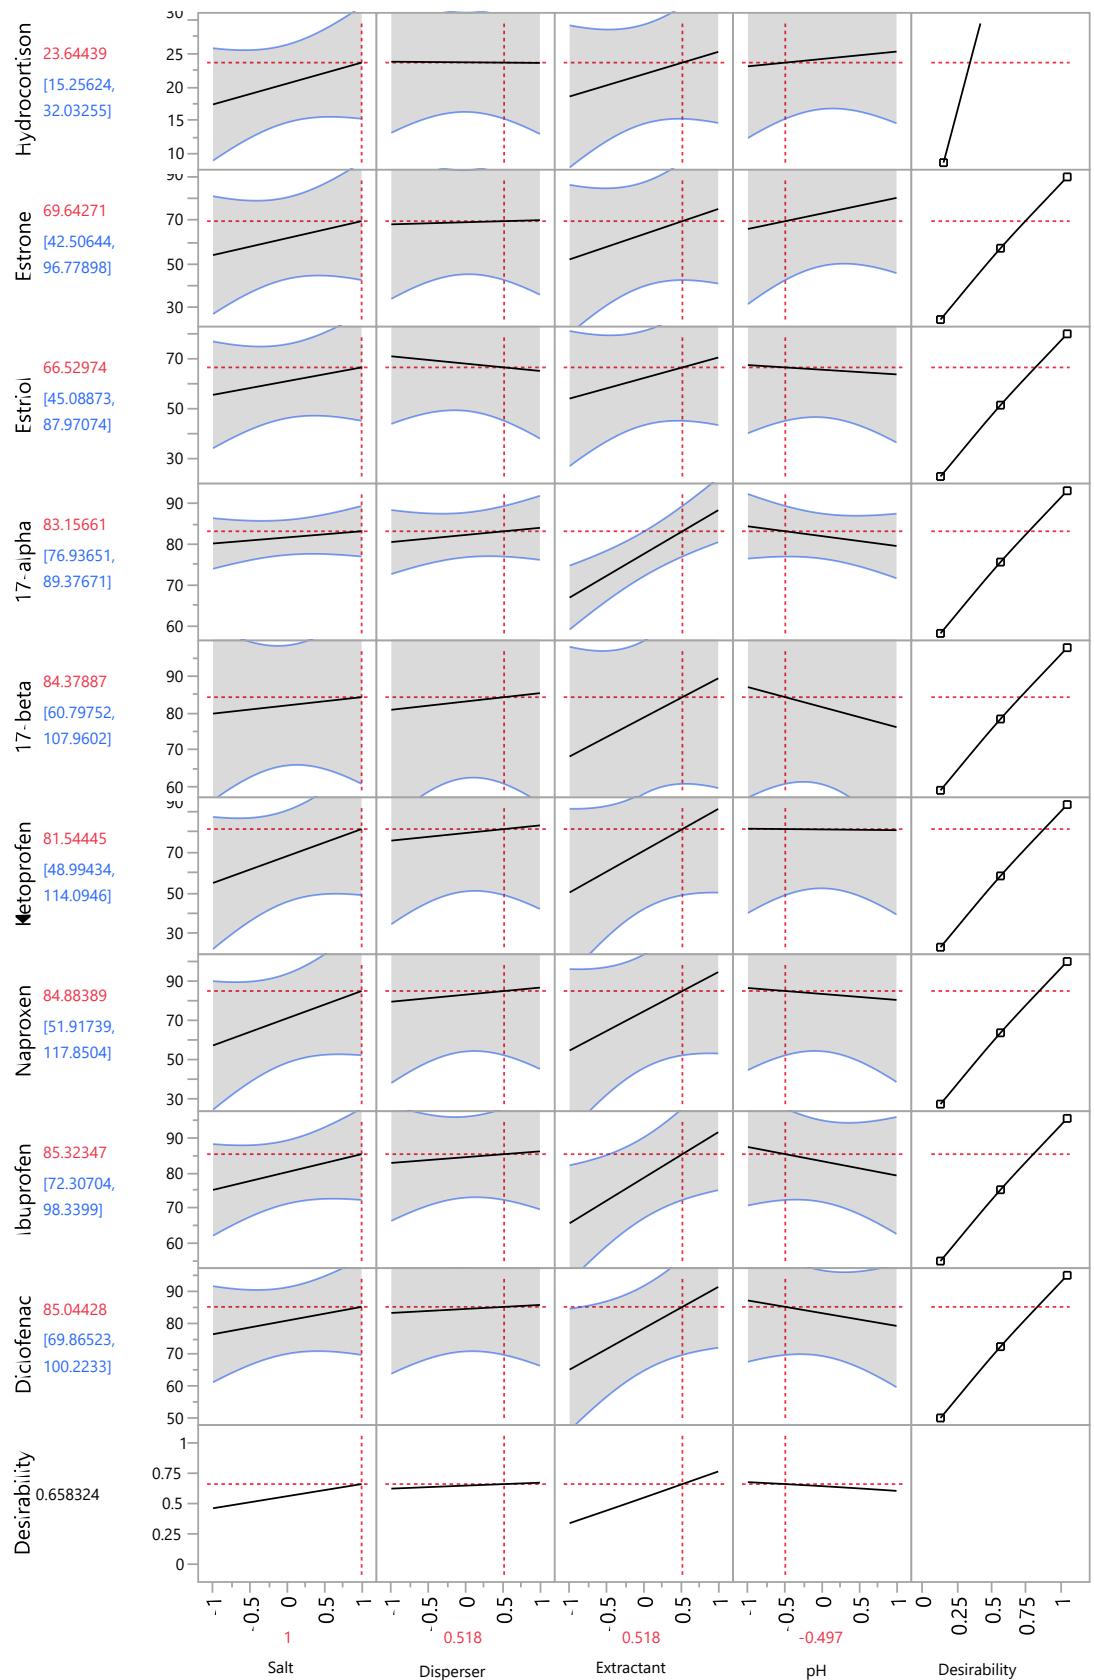

**Table S1.** The set code value of variables used in each experiment and the values of extraction recovery (%) obtained for each compound.
