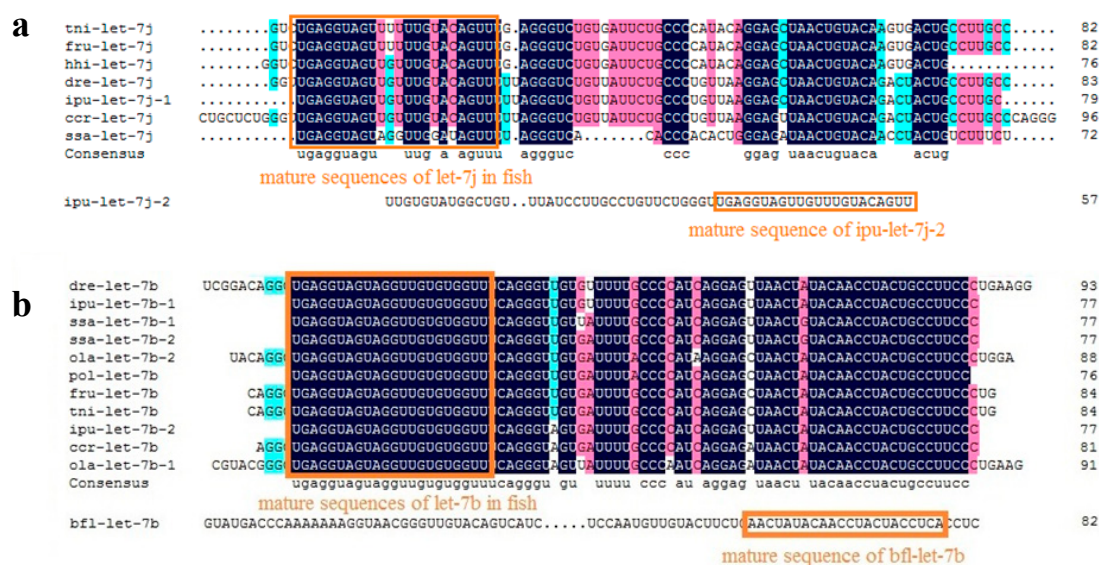

Figure S1. (a) ipu-let-7j-2 conserved sequences were located in 3' arm of precursor sequences. **(b)** bfl-let-7b conserved sequence was the reverse complementary sequence of let-7b sequence of fish species.

Figure S2. All fish let-7 miRNAs have the same seed sequence (GAGGTAG) in 5' arm, and the let-7 miRNAs mature sequences of fish were completely conservative in three regions (TGAGGTAGT, TTG and GTT).

Figure S3. The sequences of let-7 miRNAs in *M. amblycephala* showed the completely consistent mature sequences with zebrafish.

Figure S4. Let-7 miRNAs expression in five tissues of 12-month-old *M. amblycephal*. L, liver; M, muscle; P, pituitary; B, brain; G, gonad. Statistical significances between females and males are indicated as follows: * $P < 0.05$; ns, not significant.

Figure S5. Let-7 miRNAs expression in five tissues of 3-month-old *M. amblycephala*. Values with the same letter mean no significant difference ($P > 0.05$).

Figure S6. Let-7 miRNAs expression in five tissues of 6-month-old *M. amblycephala*. L, liver; M, muscle; P, pituitary; B, brain; G, gonad. Statistical significances between slow- and fast-growth groups are indicated as follows: * $P < 0.05$; ns, not significant.

Figure S7. Let-7 miRNAs expression in five tissues of 12-month-old *M. amblycephala*. L, liver; M, muscle; P, pituitary; B, brain; G, gonad. Statistical significances between slow- and fast-growth groups are indicated as follows: * $P < 0.05$; ns, not significant.

Figure S8. (a) Let-7 miRNAs expression in five tissues of 3-month-old *M. amblycephala* small size group. **(b)** Let-7 miRNAs expression in five tissues of 3-month-old *M. amblycephala* big size group. L, liver; M, muscle; P, pituitary; B, brain; G, gonad.

Table S1. All the let-7 precursor sequences of 12 fish species and 4 out-group species collected from the miRBase

Table S2 The phenotypic data of sampling fish in fast- and slow-growth groups of *Megalobrama amblycephala*

Groups	3-month old			6-month old			12-month old		
	Body length (cm)	Body height (cm)	Body weight (g)	Body length (cm)	Body height (cm)	Body weight (g)	Body length (cm)	Body height (cm)	Body weight (g)
Fast-growth group	9.3	3.6	15.2	12.2	4.9	41.7	13.0	5.2	48.6
	9.6	3.6	16.5	12.1	4.8	38.2	13.3	5.5	51.1
	9.2	3.6	16.0	11.7	4.6	36.4	13.1	5.0	44.7
Slow-growth group	5.0	1.8	3.1	5.9	2.0	3.6	7.5	2.5	7.2
	5.3	1.8	3.6	6.5	2.2	4.8	7.5	2.6	7.7
	5.1	1.8	2.9	6.4	2.3	5.4	8.2	3.0	10.6
