- 11 1. Supplementary Figures
12 2. Supplementary Tables

13 **1. Supplementary Figures**

14

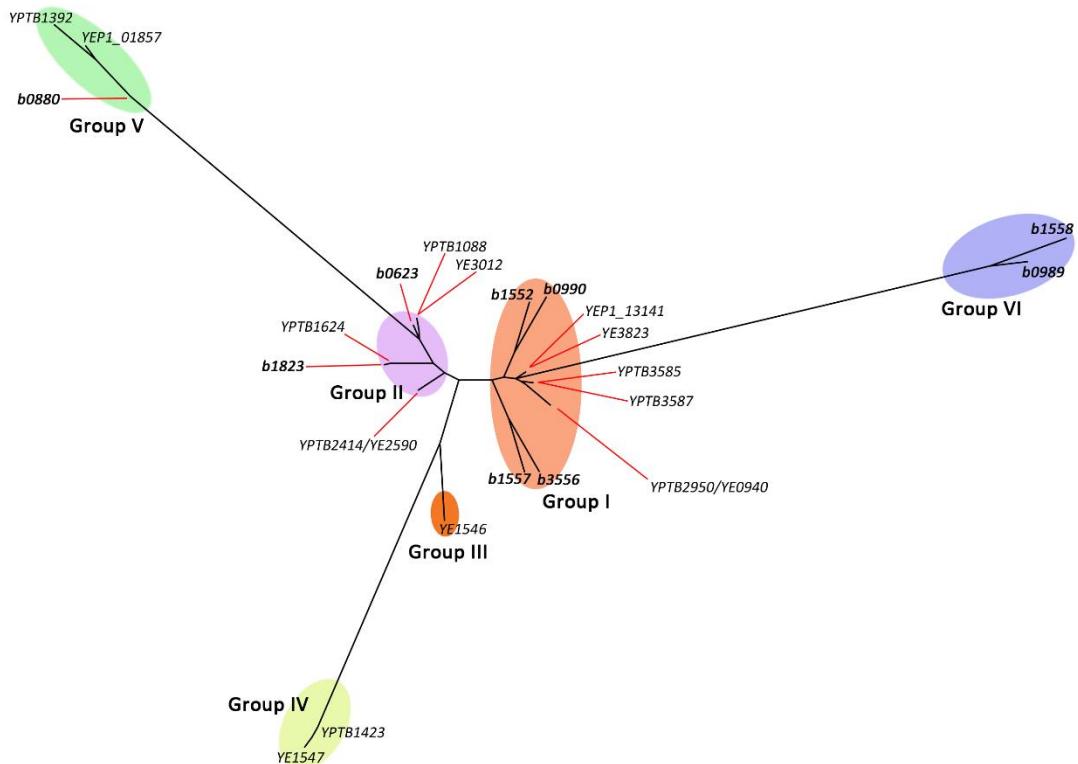

15 **Figure S1.** Heat map and hierarchical cluster showing the pairwise similarities between representative Csps in
16 enteropathogenic *Yersinia*. Cool colours (blue, green) indicate similar Csp pairs. Warm colours (red, yellow)
17 indicate dissimilar Csp pairs.

18

19 **Figure S2.** Phylogenetic tree for 20 Csp sequence patterns in *Escherichia coli*. A phylogenetic tree composed on 20 Csp sequence patterns in 135 *E. coli* strains. Monophyletic nodes
 20 have been collapsed and are represented by circles. The number of Csp in a collapsed node is indicated by the circle radius. Hyphens indicate *csp* genes with no current name.
 21 The histogram shows Csp sequence conservation.

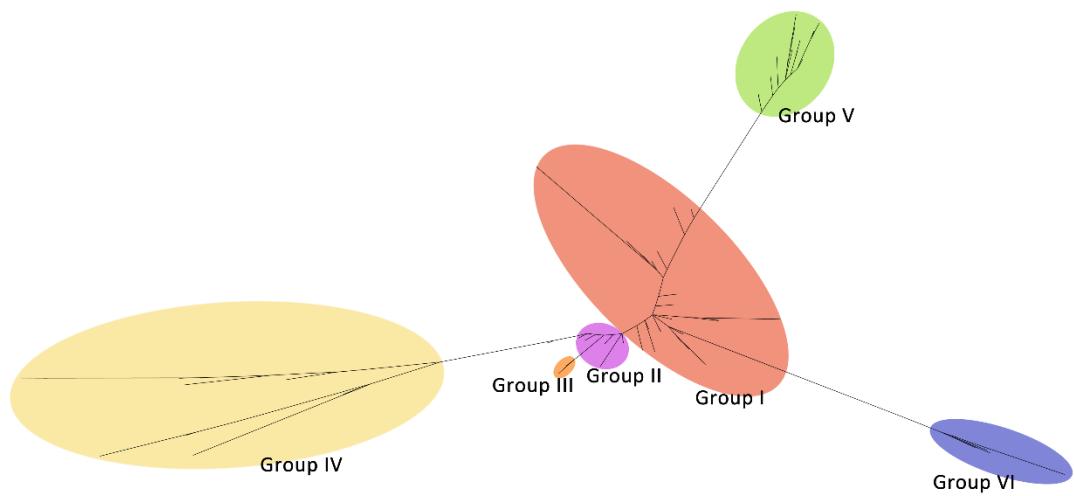

Tree scale: 0.1 —

22

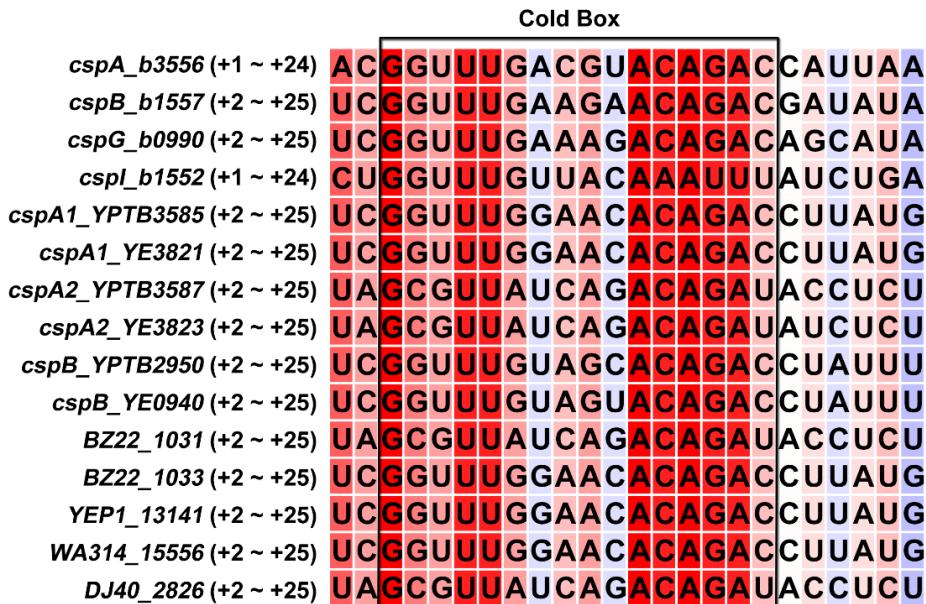

23 **Figure S3.** Phylogenetic tree for representative Csp proteins in enteropathogenic *Yersinia* and *Escherichia coli*. A
24 phylogenetic tree composed of the representative Csp proteins in foodborne pathogenic *Yersinia* and *E. coli*
25 (Abundance ratio > 0.3). The phylogenetic groups of representative Csp proteins are represented by colour. The
26 complete tree with full bootstrap values is available in Newick format as Supplementary Data 3.

Tree scale: 1

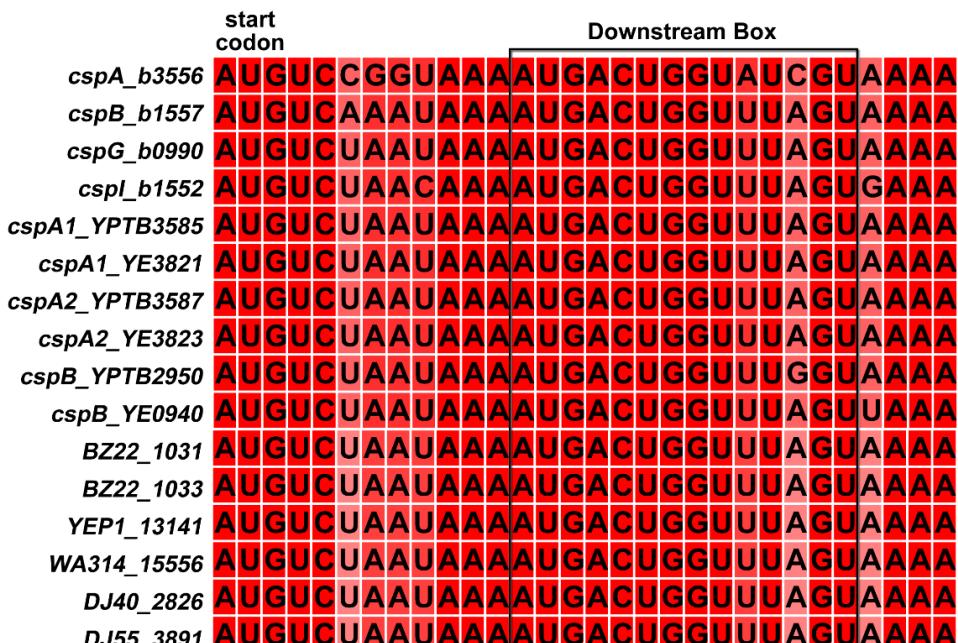

27

28 **Figure S4.** Phylogenetic tree for all Csp proteins in Enterobacteriales. A phylogenetic tree composed on 322 non-
29 redundant Csp proteins in Enterobacteriales, using cold shock domain sequences. The phylogenetic groups of
30 Csp proteins are represented by colour. The complete tree with full bootstrap values is available in Newick format
31 as Supplementary Data 4.

(A)

(B)

32

33 **Figure S5.** Messenger RNA Sequence comparison of four cold-inducible Csp's in *E. coli* and putative
34 cold-inducible *csp* genes in enteropathogenic *Yersinia*. Messenger RNA Sequence alignment of the 5'-
35 UTR (A) and the first 10 codon nucleotides (B) of cold-inducible *cspA* (*b3556*), *cspB* (*b1557*), *cspG* (*b0990*)
36 and *cspI* (*b1552*) in *E. coli* and putative cold-inducible *csp* genes in enteropathogenic *Yersinia* (*DJ55_3891*).
37 was not included in (A) due to the absence of 5'-UTR sequence information). The highly homologous
38 sequences (cold box and downstream box) are boxed and labeled above the boxes. Red indicates
39 conservative sites and blue indicates non-conservative sites.

40 **2. Supplementary Tables**41 **Table S1.** Information of Csp in *Yersinia enterocolitica* and *Yersinia pseudotuberculosis*

Species	No. of named Csp	No. of Strain	Representative strain
<i>Y. enterocolitica</i> subsp. <i>palearctica</i>	87	11	<i>Y. enterocolitica</i> subsp. <i>palearctica</i> YE-P1
<i>Y. enterocolitica</i> subsp. <i>enterocolitica</i>	17	2	<i>Y. enterocolitica</i> subsp. <i>enterocolitica</i> 8081
<i>Y. pseudotuberculosis</i>	343	45	<i>Y. pseudotuberculosis</i> IP 32953
Total	447	58
