**Supplementary Figure S1.** Standard curve for absolute quantification of *rolB* expression.

Standard curve was constructed using  $1.25 \times 10^1$  to  $1.25 \times 10^5$  copies/ $\mu$ l of *rolB* amplicon (three technical replicates for each standard dilution). The data represent a result from two biological replicates with cDNA samples (marked by a cross) analyzed in triplicate.
