

Figure S2. mRNA expression levels of *TRAF6*, *IRAK1*, and *RELA* in LPS-stimulated hDPCs at different time points. **(A)** mRNA expression of *TRAF6* was constant in LPS stimulation at different time courses (mean \pm SD, n = 4). **(B)** mRNA expression of *IRAK1* was constant in LPS stimulation at different time courses (mean \pm SD, n = 4). **(C)** mRNA expression of *RELA* was constant in LPS stimulation at different time courses (mean \pm SD, n = 4). NS: no significant difference; LPS: lipopolysaccharide; hDPCs: human dental pulp cells.
