

The Effect of Statins on Ocular Disorders: A Systematic Review of Randomized Controlled Trials

Supplementary material

Supplementary Table S1. PICOS criteria for inclusion and exclusion of studies		
Parameter	Inclusion	Exclusion
Population	Adult population (>18) receiving statins	Patients not receiving statins, age <18
Intervention	Administration of statins, alone or in conjunction with background treatment	Other interventions
Comparator	Placebo, diet or control group	Statins, Other than placebo/control group
Outcomes	Effect on ocular disorders (Cataract, AMD, glaucoma, diabetic retinopathy, dry eye, uveitis, macular edema)	Other outcomes, or lack of data regarding specific ocular disorders
Study design	Randomized controlled trials, published in English	All other study types, Published in any other language than English

Supplementary Table S2. Excluded studies with reasons		
Study	Year	Reason of exclusion
Murakami [1]	2020	Different comparator
Maguire [2]	2009	Not an RCT
Al-Holou [3]	2015	Not an RCT
Chew [4]	2014	Different comparator
Martini*	1991	Language other than English
Gaede [5]	2008	Different comparator
Tobert [6]	1990	Not an RCT

*This study was retrieved after the screening of another systematic review [7]
