

**Table S1.** Evaluation of physic-chemical parameters value of pH, conductivity and dissolved oxygen) on the effect of Chlorella vulgaris growth

Day	pH	Conductivity ( $\mu\text{S}/\text{cm}$ )	Dissolved oxygen (ppm)
initial	8.1	1365	5.62
1	7.8	1363	5.63
2	8.05	1508	6.16
3	8.26	1465	5.74
4	9	1254	6.26
5	9.8	1441	6.94
6	9.8	1455	7.3
7	9.8	1334	7.94
8	9.96	1430	6.54
9	9.89	1470	7.65
10	9.88	1616	7.55
11	10.19	1448	7.01
12	10.2	1430	8.33
13	10.37	1443	8.37
14	10.61	1421	7.94

**Table S2.** Evaluation of physico-chemical parameters (value of pH, conductivity and dissolved oxygen) on the effect of Chlorella vulgaris growth in the presence of 0, 150 ... 2000 mg/L TiO<sub>2</sub>-P25/20)

Sample (mg/L)	Initial parameters (0 h)			Final parameters (after 120 h)		
	pH	Conductivity ( $\mu\text{S}/\text{cm}$ )	Dissolved oxygen (ppm)	pH	Conductivity ( $\mu\text{S}/\text{cm}$ )	Dissolved oxygen (ppm)
control	8.1	1341	7.8	9	1367	7.95
150	8.1	1339	7.67	8.9	1342	7.83
300	8.1	1339	7.43	8.7	1345	7.65
600	8.1	1337	7.71	8.9	1347	7.9
1200	8.1	1328	7.56	8.8	1349	7.77
2000	8.1	1324	7.49	8.8	1345	7.64

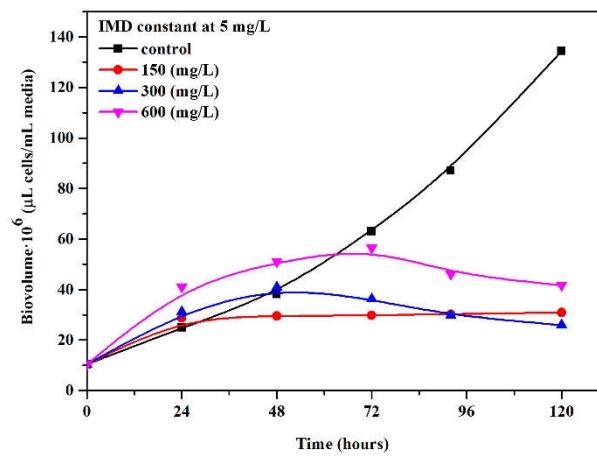

**Table S3.** Evaluation of physico-chemical parameters (value of pH, conductivity and dissolved oxygen) on the effect of Chlorella vulgaris growth in the presence of 0, 5 ... 40 mg/L imidacloprid)

Sample (mg/L)	Initial parameters (0 h)			Final parameters (after 120 h)		
	pH	Conductivity ( $\mu\text{S}/\text{cm}$ )	Dissolved oxygen (ppm)	pH	Conductivity ( $\mu\text{S}/\text{cm}$ )	Dissolved oxygen (ppm)
control	8.1	1341	7.8	9	1367	7.95
5	8.1	1335	7.26	8.9	1342	7.43
10	8.1	1328	7.51	8.7	1341	7.61
20	8.1	1330	7.7	8.8	1341	7.89
30	8.1	1333	7.3	8.7	1342	7.54

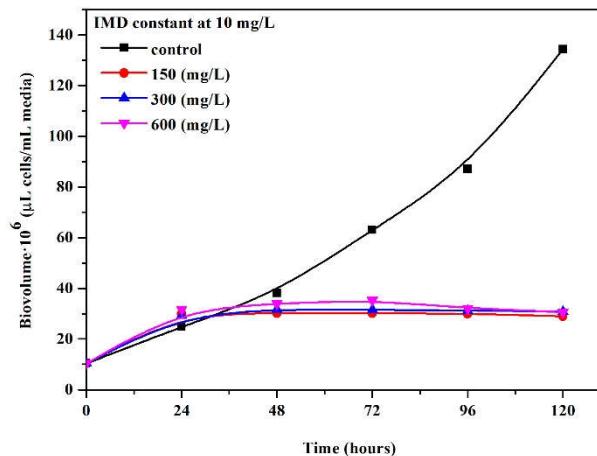

40	8.1	1326	7.16	8.6	1346	7.34
----	-----	------	------	-----	------	------

**Table S4.** Evaluation of physico-chemical parameters (value of pH, conductivity and dissolved oxygen) on the effect of Chlorella vulgaris growth in the presence of mixture IMD and TiO<sub>2</sub> NPs)

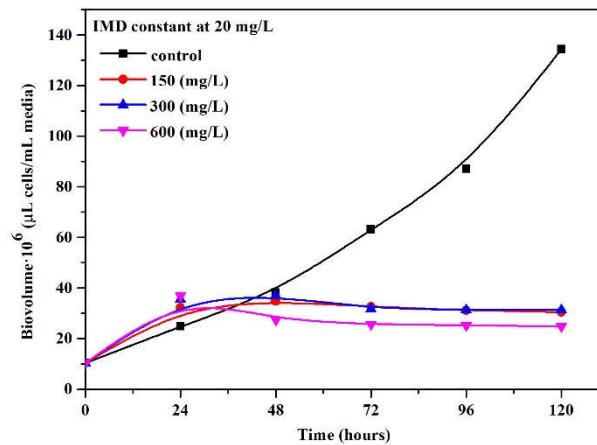

IMD (mg/L)	TiO <sub>2</sub> (mg/L)	Initial parameters (0 h)			Final parameters (after 120 h)		
		pH	Conductivity ( $\mu\text{S}/\text{cm}$ )	Dissolved oxygen (ppm)	pH	Conductivity ( $\mu\text{S}/\text{cm}$ )	Dissolved oxygen (ppm)
0	0	8.1	1341	7.8	9	1367	7.95
	150	8.1	1337	7.67	8.82	1348	7.71
5	300	8.1	1341	7.72	8.76	1354	7.77
	600	8.1	1346	7.64	8.89	1359	7.78
10	150	8.1	1340	7.83	8.69	1353	7.89
	300	8.1	1342	7.81	8.74	1359	7.9
	600	8.1	1344	7.79	8.85	1368	7.86
20	150	8.1	1346	7.87	8.9	1352	7.9
	300	8.1	1348	7.84	8.97	1364	7.9
	600	8.1	1351	7.86	9	1370	7.89

**Figure S1.** Time depending results of biovolume from a batch culture of Chlorella Vulgaris under toxic binary TiO<sub>2</sub> and IMD stress (IMD was kept constant at 5 mg/L).

**Figure S2.** Time depending results of biovolume from a batch culture of Chlorella Vulgaris under toxic binary TiO<sub>2</sub> and IMD stress (IMD was kept constant at 10 mg/L).

**Figure S3.** Time depending results of biovolume from a batch culture of Chlorella Vulgaris under toxic binary TiO<sub>2</sub> and IMD stress (IMD was kept constant at 20 mg/L).
