

## Supplementary Table S4

Percentage of HMP-offering postcodes in different regions of Greater Melbourne

	Smaller HMPs			Tai Chi/Qigong			Combined <sup>b</sup>		
	n	%	% dif <sup>a</sup>	n	%	% dif <sup>a</sup>	n	%	% dif <sup>a</sup>
Inner MB	15	28.8%	17.6	17	16.2%	4.9	23	18.7%	7.4
Metropolitan MB	27	51.9%	14.8	41	39.0%	2	51	41.5%	4.4
Outer MB	10	19.2%	-32.4	47	44.8%	-6.9	49	39.8%	-11.8
Total	52	100%	0	105	100%	0	123	100%	0

<sup>a</sup> %dif = difference between found % and expected % .if value is positive, the percentage of HMP-offering postcodes in that region is higher than expected based on a proportional representation; if negative, it is lower.

<sup>b</sup> combined is smaller than the sum of the smaller HMPs and Tai Chi/Qigong, because many postcode areas offered both practices.
