There was an error in the original publication [1]. In the last term of the right-hand side of Equation (8), the denominator  $V_{room}$  is missing. Therefore, for the academic rigor of the paper, we modify Equation (8) to the correct form. The corrected Equation (8) appears below.

$$\frac{dC_{room,i}}{dt} = \frac{M_i}{V_{room}} \cdot \frac{dn_{evap,i}}{dt} - \frac{Q_{vent}}{V_{room}} \cdot C_{room,i} + \frac{Q_{vent}}{V_{room}} \cdot C_{vent,i} \quad (8)$$
