

Table S1. Areas with environmental importance areas in the Municipalities.

Type	Description	Municipality	
		Aguadas	Pácora
Ecological characteristics (Ha)			
Areas of local interest	Aqueduct supplying areas	215	419
	Hydraulic environmental protection zone	103	118
Regional interest areas	Protective forest belt	8351	5637
	Indirect water recharge of high importance	14	-
	Indirect water recharge of medium importance	10,360	15
Strategic ecosystems	Dry forest	95	410
	Nevados national park Sonsón (paramo)	620	194
Cultural heritage	Cultural coffee landscape	1,407	3,507
National heritage	Municipality heritage	350	-
Forest reserve (Law 2/ 1959)	Central forest reserve	4007	319
Rural Civil Society Reserve	La Gloria	218	-
	La Virginia	-	377
Protective forest reserve	El Diamante	-	-
	Tarcará	726.94	-
Total	Northern Caldas	25,740	10,995

Table S2. Ecosystem Services identification and prioritization

Land cover/ecosystem	Benefit				
	Example 1	Example 2	Example 3		
Example: water body					
	Valuation scale				
Ecosystem services	Very few important (1)	Few important (2)	Indifferent (3)	Important (4)	Very important (5)
Example: Drinking water					
Prioritized ecosystem services (consensus)					
Justification
