

A**B****C****Figure S1. The comparison of FRET and AlphaScreen.**

(A) The comparison of sensitivity between FRET and AlphaScreen by S/N ratio.

(B, C) Comparison of FRET and AlphaScreen of compounds used for screening in this experiment by inhibition rate of SARS-CoV-2 3CLpro. The result of FRET (B) and AlphaScreen (C). Compounds with inhibition rates above the mean +4 SD were marked on these graphs.
