

**Table S1.** Comparison of the average nutritional content per serve from 12 meals from each of the 5 Meal Kit Subscription Services with Nutrient Reference Values for Australia and New Zealanders. NRVs are for adult males and females aged >19 years. Highlighted in red are value which do not meet (or exceed) 30% of the RDI, AI or SDT.

Dietary variable	NRV classification	NRV	30% of NRV	Dinnerly	HelloFresh™	MarleySpoon™	Pepper Leaf	Thomas Farms Kitchen
<b>MALES</b>

NRV, Nutrient Reference Value; STD, suggested dietary target; AI, adequate intake. <sup>a</sup>Niacin equivalents <sup>b</sup>By analysis <sup>c</sup>Total dietary folate equivalents <sup>d</sup>total Vitamin A equivalents. <sup>1</sup>For men aged > 70 years and women aged >50 years, the RDI is 1300mg, none of the MKSSs would meet 30% of this higher level either. <sup>2</sup>For men aged >70 years, the RDI for riboflavin is 1.6mg, Dinnerly, MarleySpoon™ and PepperLeaf would not meet 30% of this higher level. <sup>3,4</sup>For men and women aged > 50 years, the RDI for vitamin B6 is 1.7mg and 1.5mg respectively, all MKSS would exceed 30% of these higher values.<sup>4</sup>For women aged >50 years the RDI for iron is only 8mg, all MKSS would meet 30% of this value. <sup>5</sup>For women aged 19-30 years the RDI for magnesium is 310mg, all MKSS would meet 30% of this lower value.
