

Supplementary Materials: Investigating Multi-Mycotoxin Exposure in Occupational Settings: A Biomonitoring and Airborne Measurement Approach

Sophie Ndaw, Daniele Jargot, Guillaume Antoine, Flavien Denis, Sandrine Melin and Alain Robert

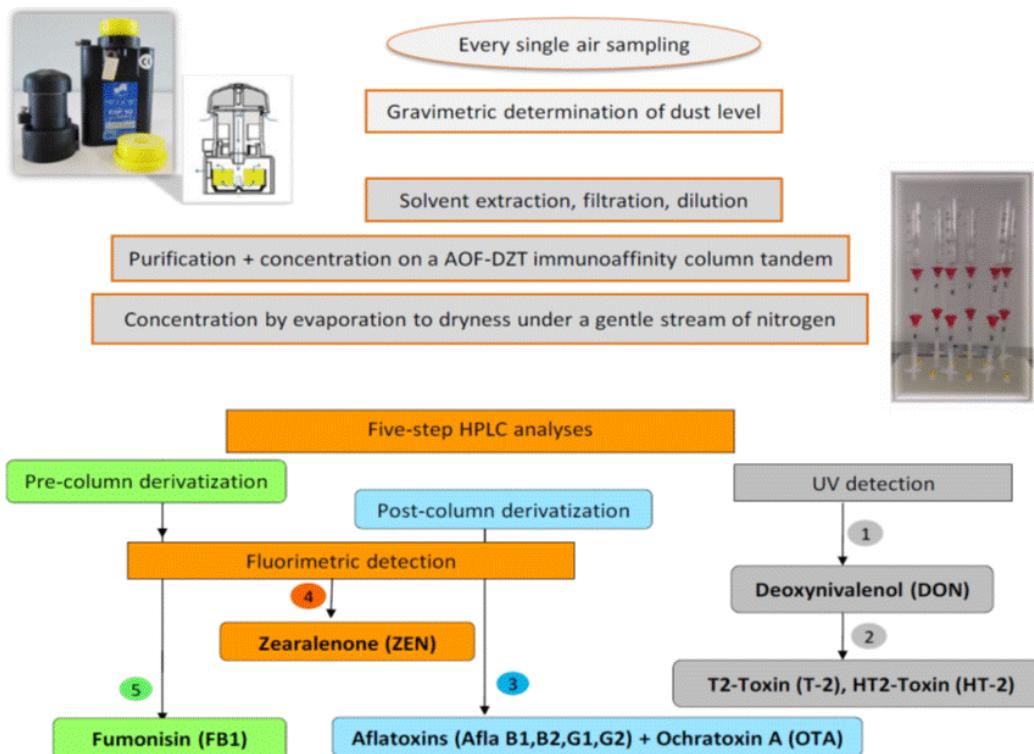

Figure S1. Overview of the sample preparation and sample analysis method for the determination of mycotoxins in airborne samples.

Table S1. The monoisotopic masses of the most intense ions in positive mode, retention times and confirmation fragments of mycotoxins and internal standards.
