

# Assessment of Sub-Micron Particles by Exploiting Charge Differences with Dielectrophoresis

Maria F. Romero-Creel, Eric Goodrich, Danielle V. Polniak and Blanca H. Lapizco-Encinas \*

**Table S1.** Comparison of particle surface charge magnitude for particles from two providers: Invitrogen and Magsphere.

| Diameter ( $\mu\text{m}$ ) | Provider   | Charge (meq/g) | Surface Functionalization |
|----------------------------|------------|----------------|---------------------------|
| 0.1                        | Magsphere  | 0.0680         | Carboxyl                  |
| 0.1                        | Invitrogen | 0.2839         | Carboxyl                  |
| 0.29                       | Magsphere  | 0.0360         | Carboxyl                  |
| 0.2                        | Invitrogen | 0.5180         | Carboxyl                  |
| 0.5                        | Magsphere  | 0.0260         | Carboxyl                  |
| 0.5                        | Invitrogen | 0.3156         | Carboxyl                  |
| 1.0                        | Magsphere  | 0.0220         | Carboxyl                  |
| 1.0                        | Invitrogen | 0.1826         | Carboxyl                  |
