

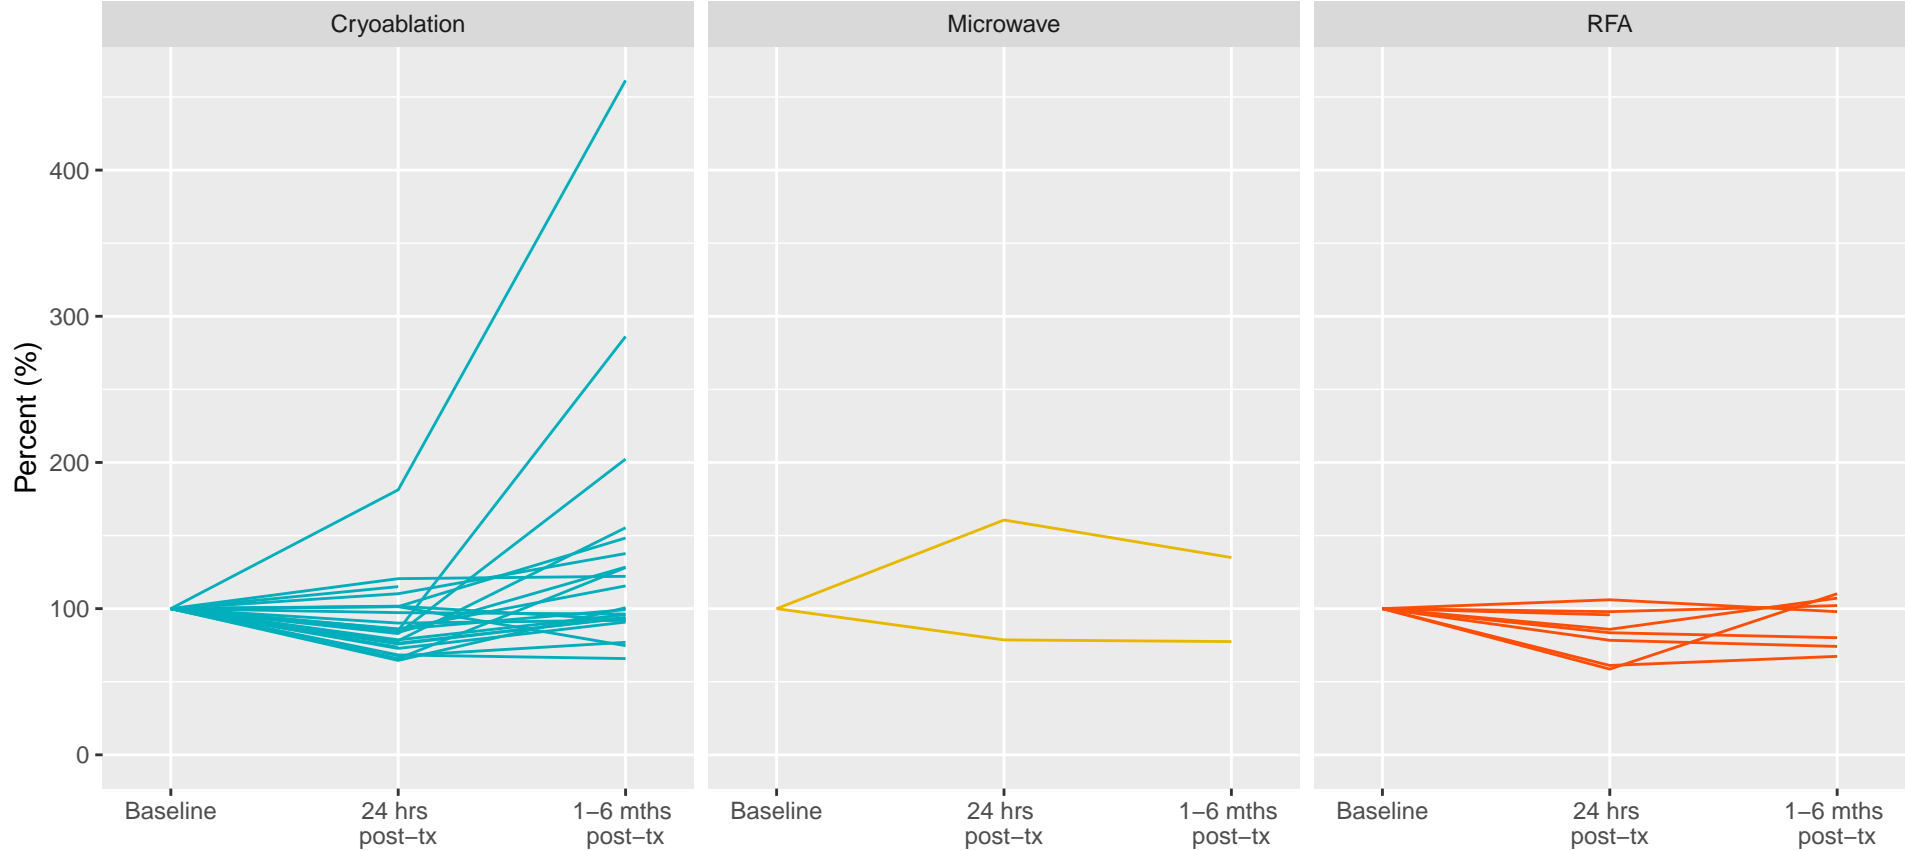

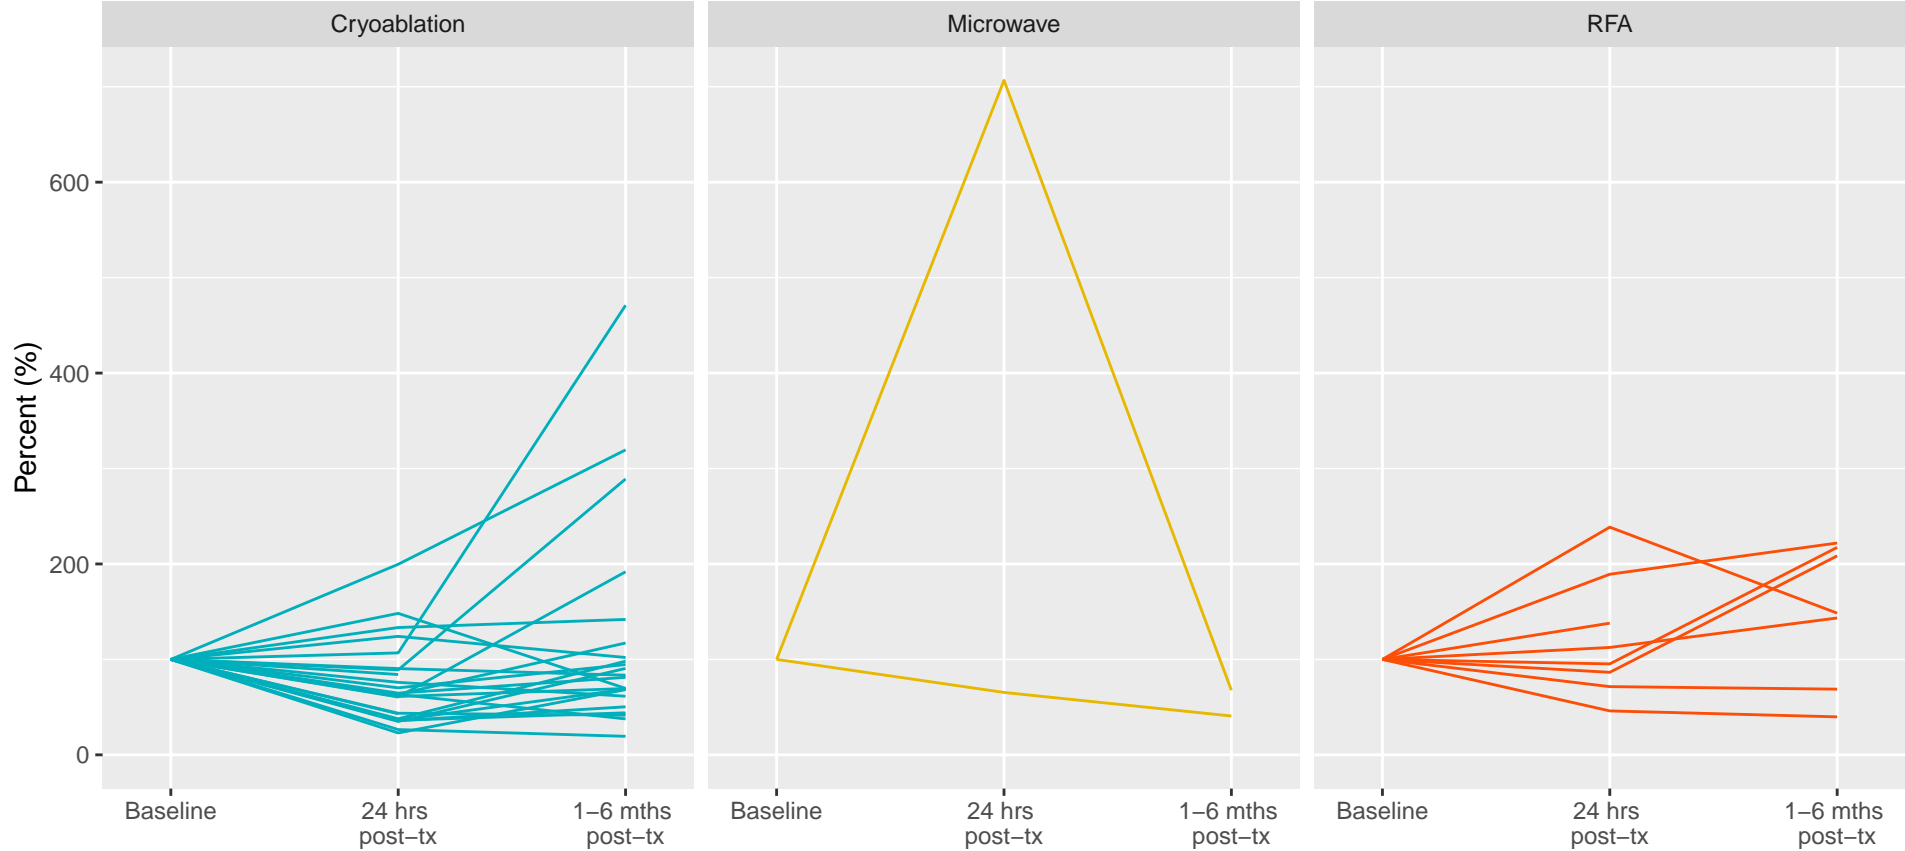

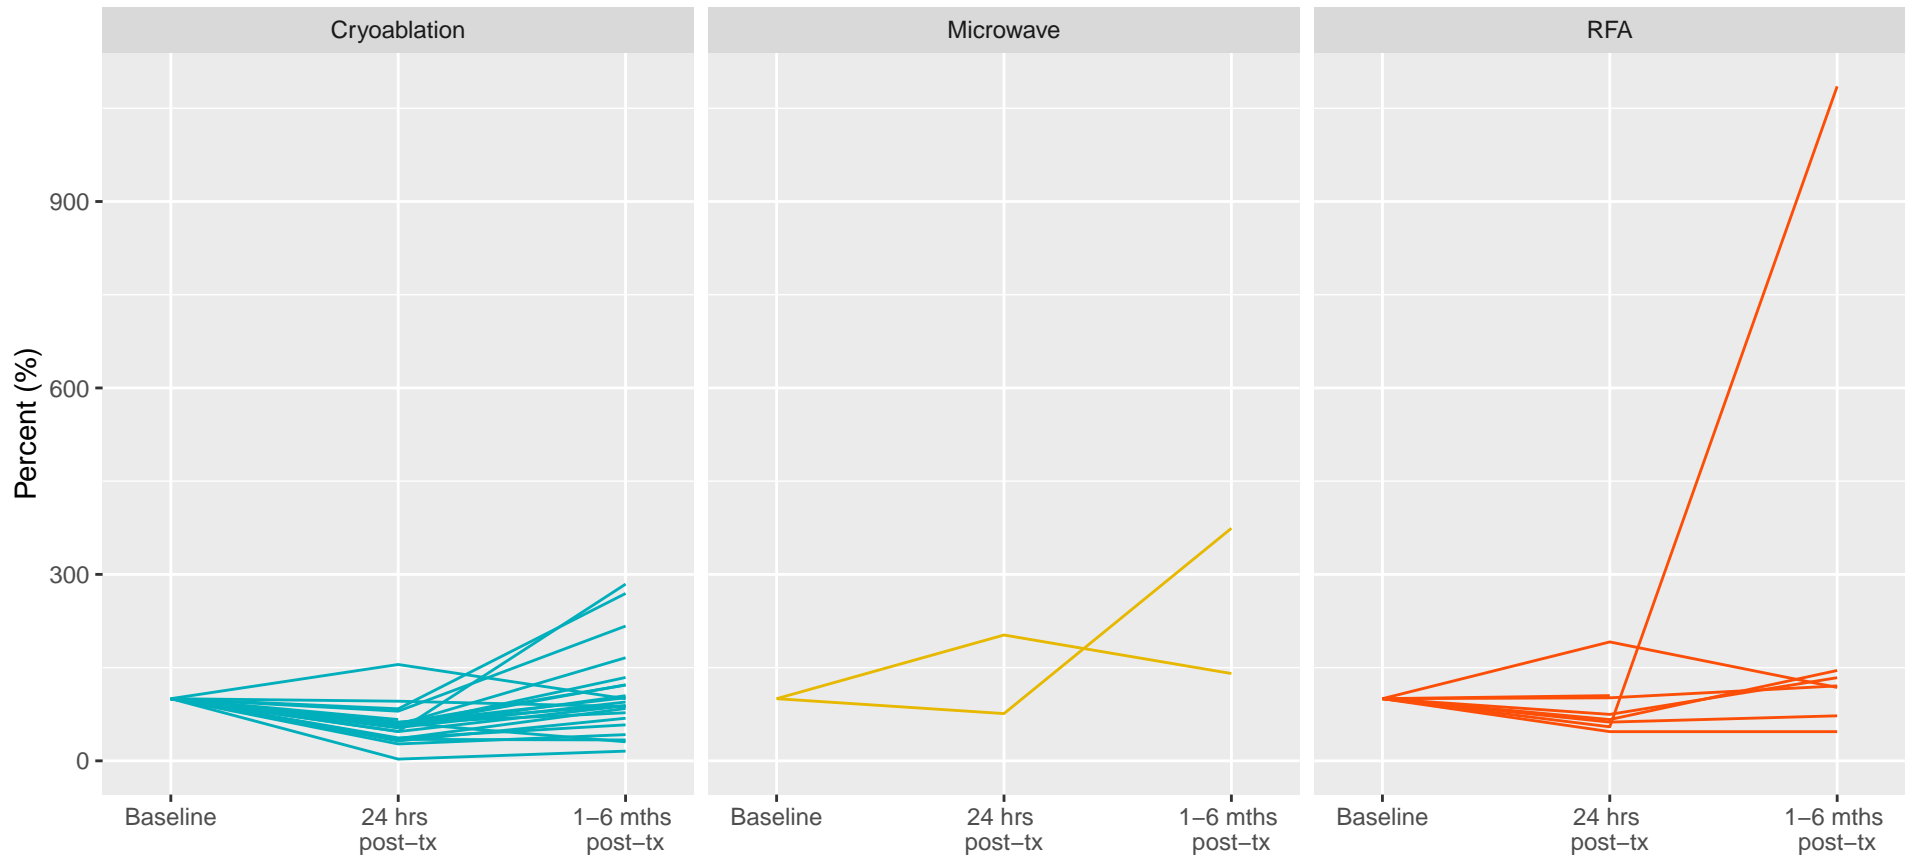

Figure S6. Longitudinal profiles of plasma proteins which decreased significantly ($p < 0.05$ and $q < 0.01$; TP3 vs TP2) in patients 24 hours post-CRYO ($n=24$ patients as one TP3 sample failed analytical QC). Results for each protein are expressed as a % of the reference baseline (TP2; 100%).

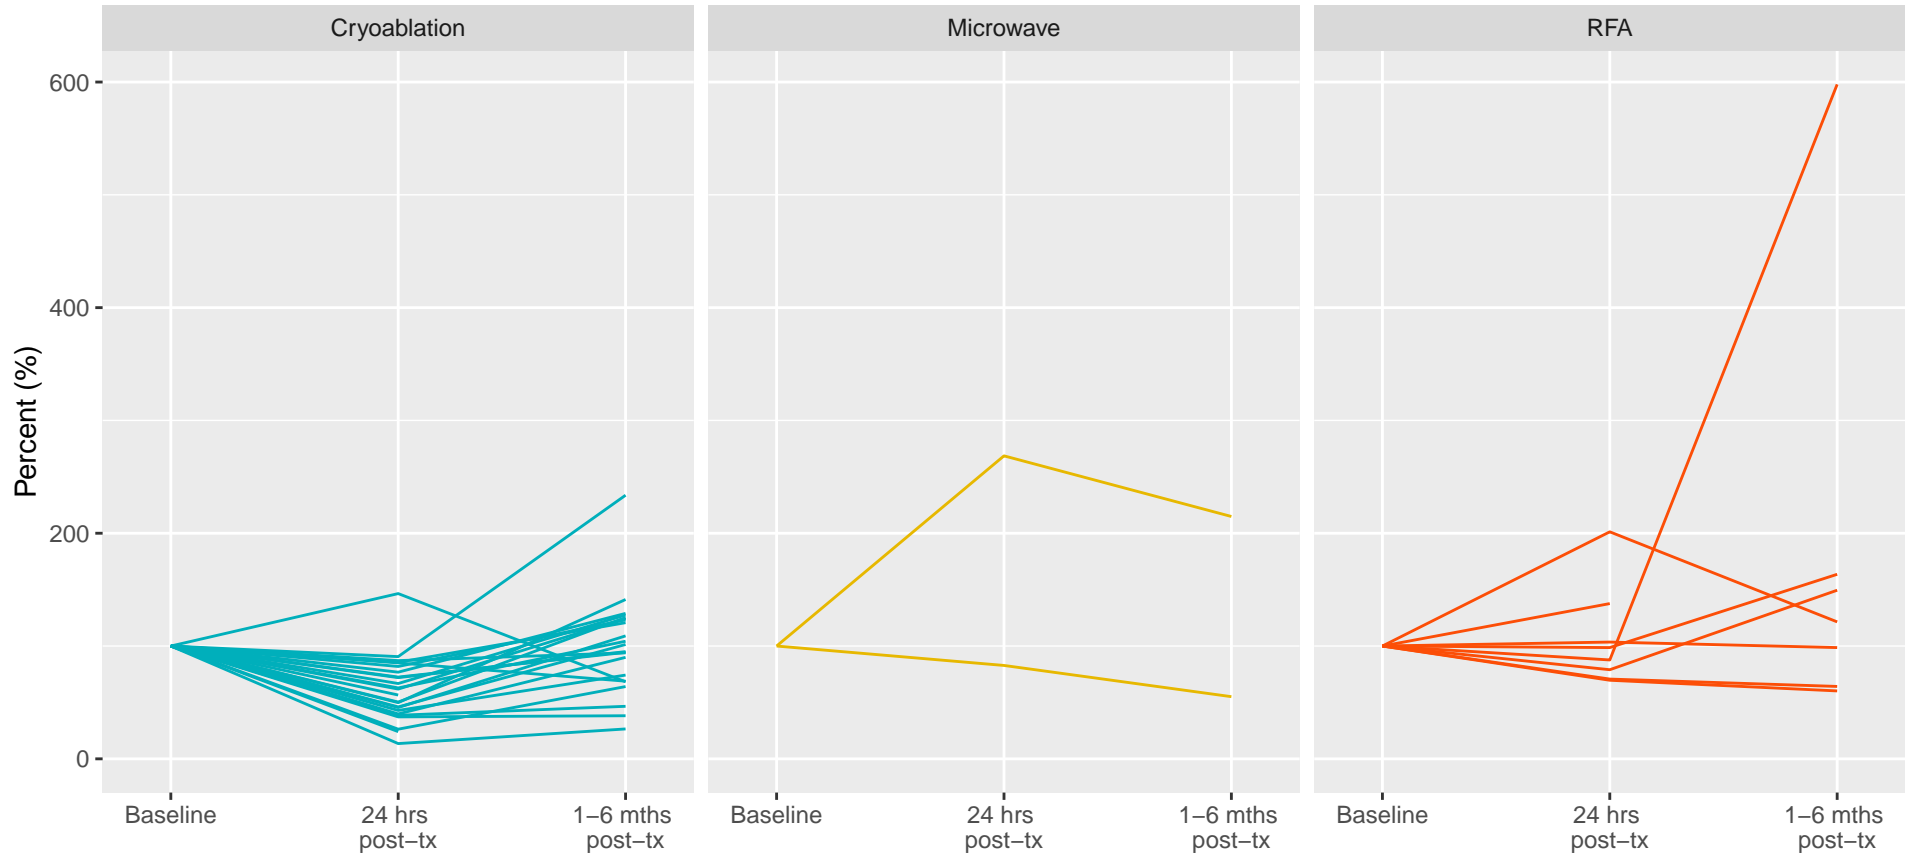

Uniprot ID: Q15389, analyte: ANGPT1

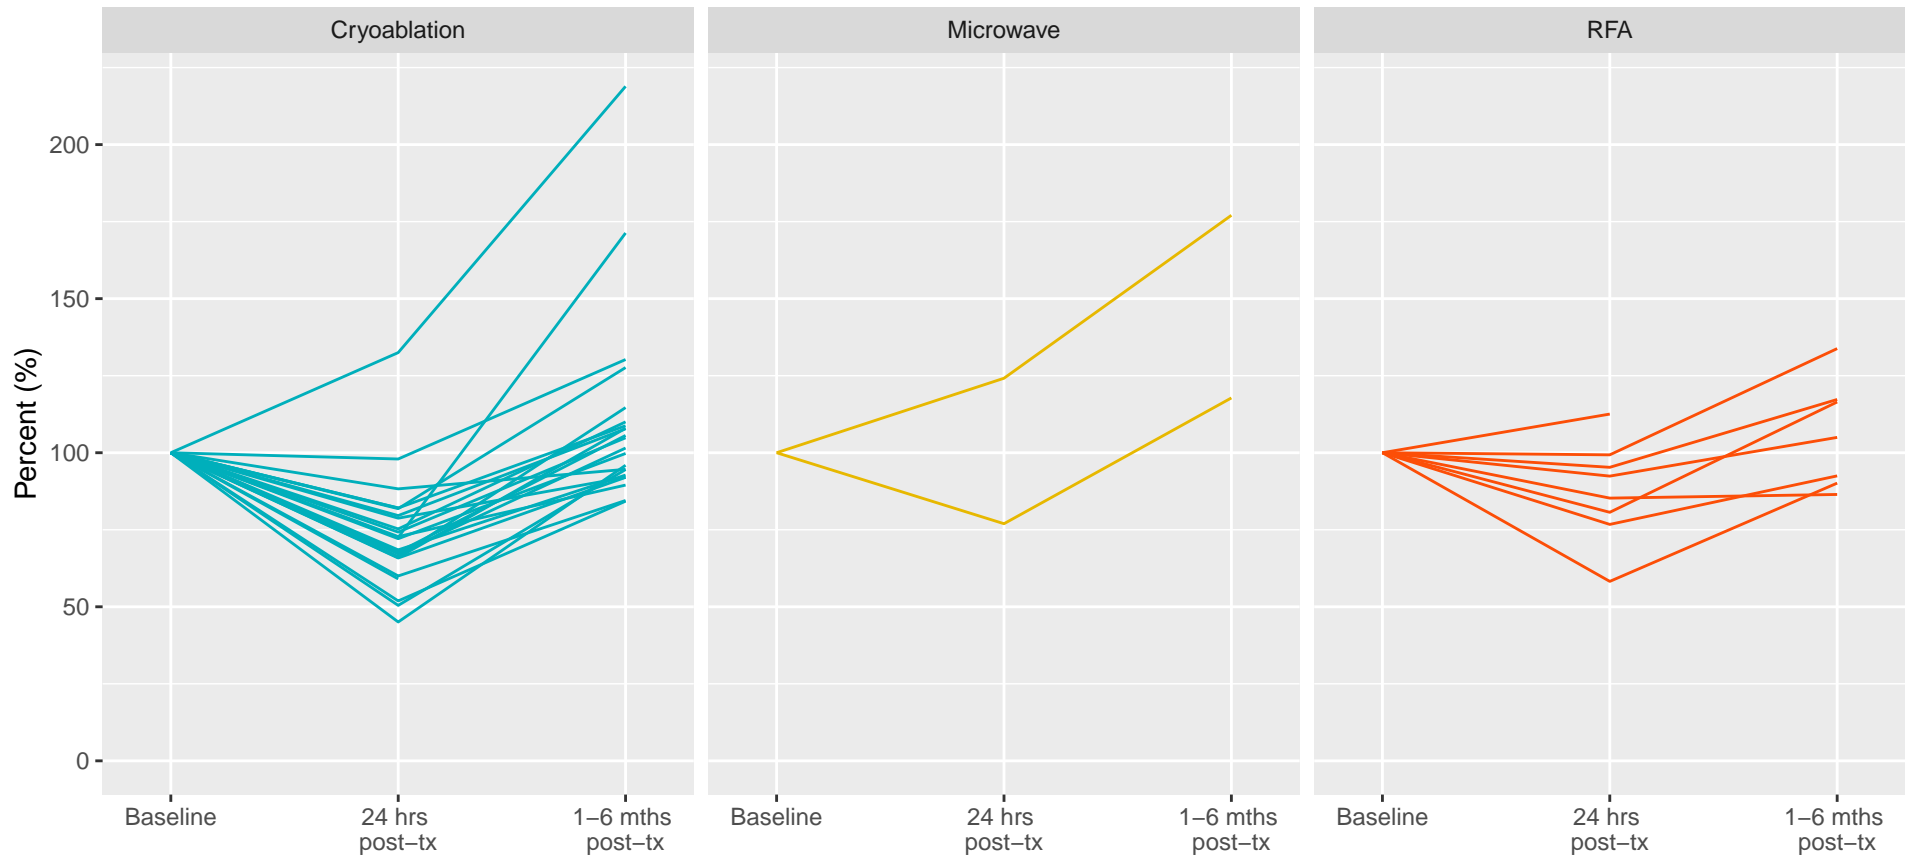

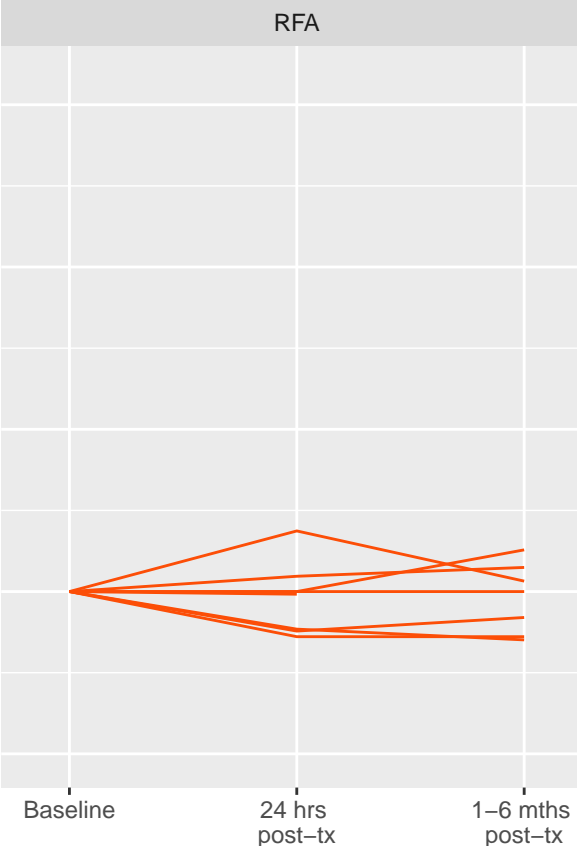

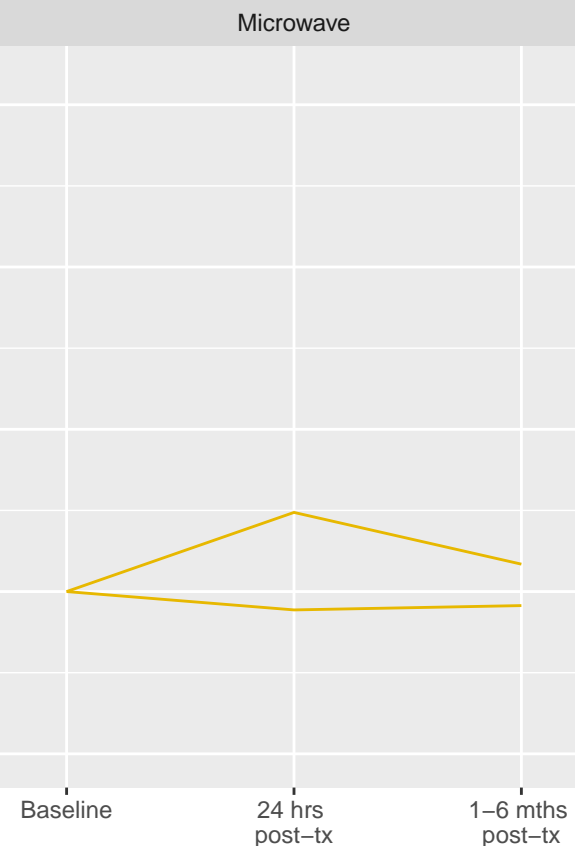

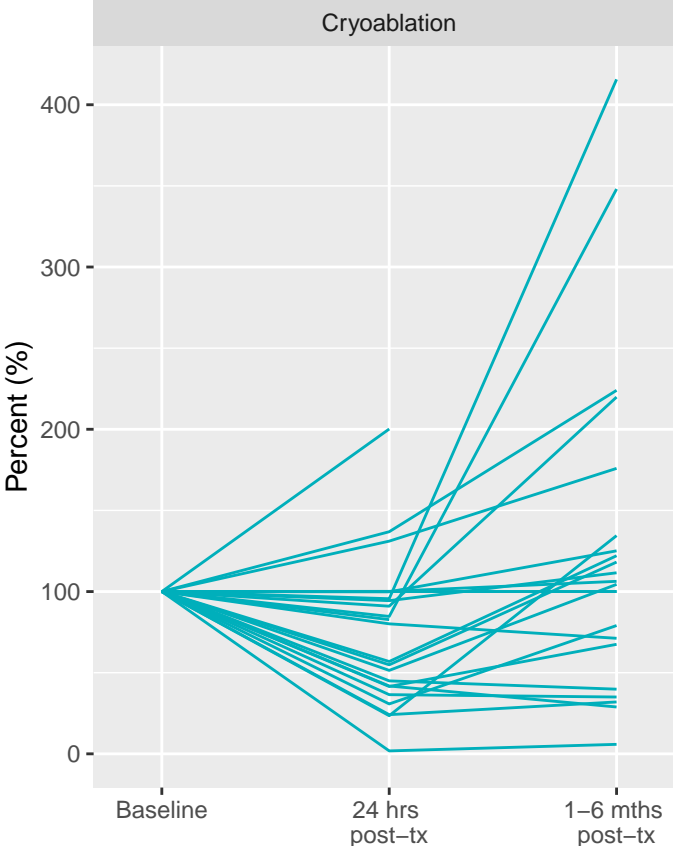

Uniprot ID: Q99616, analyte: MCP-4

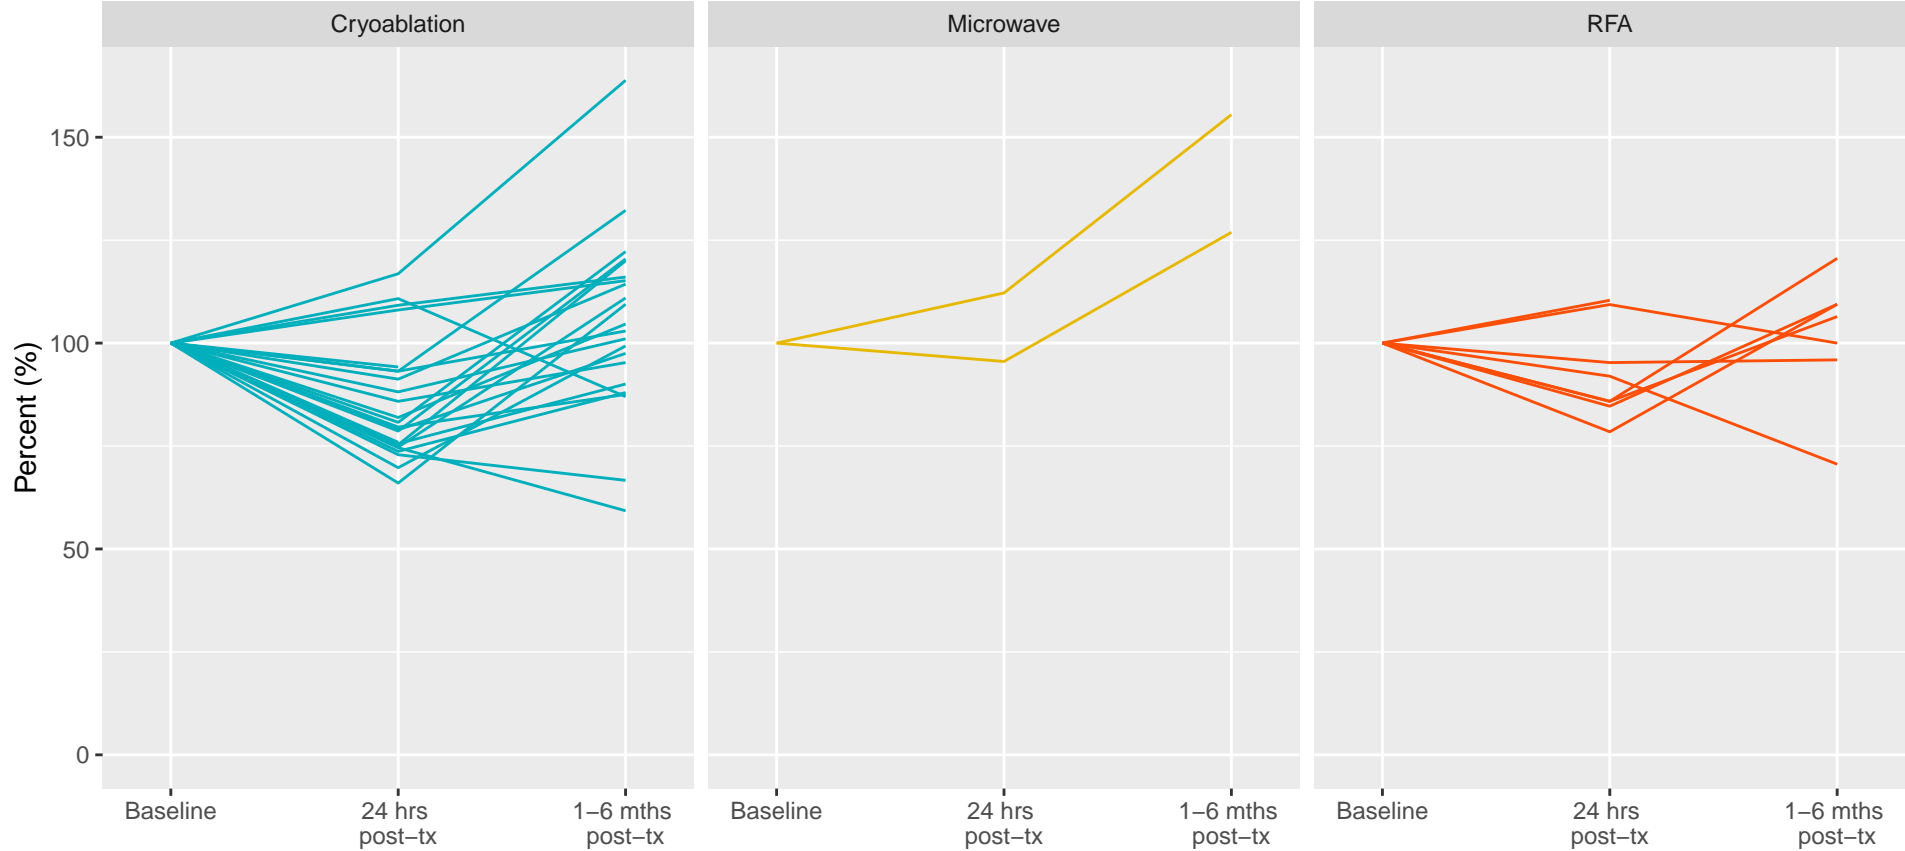

Uniprot ID: P50591, analyte: TRAIL

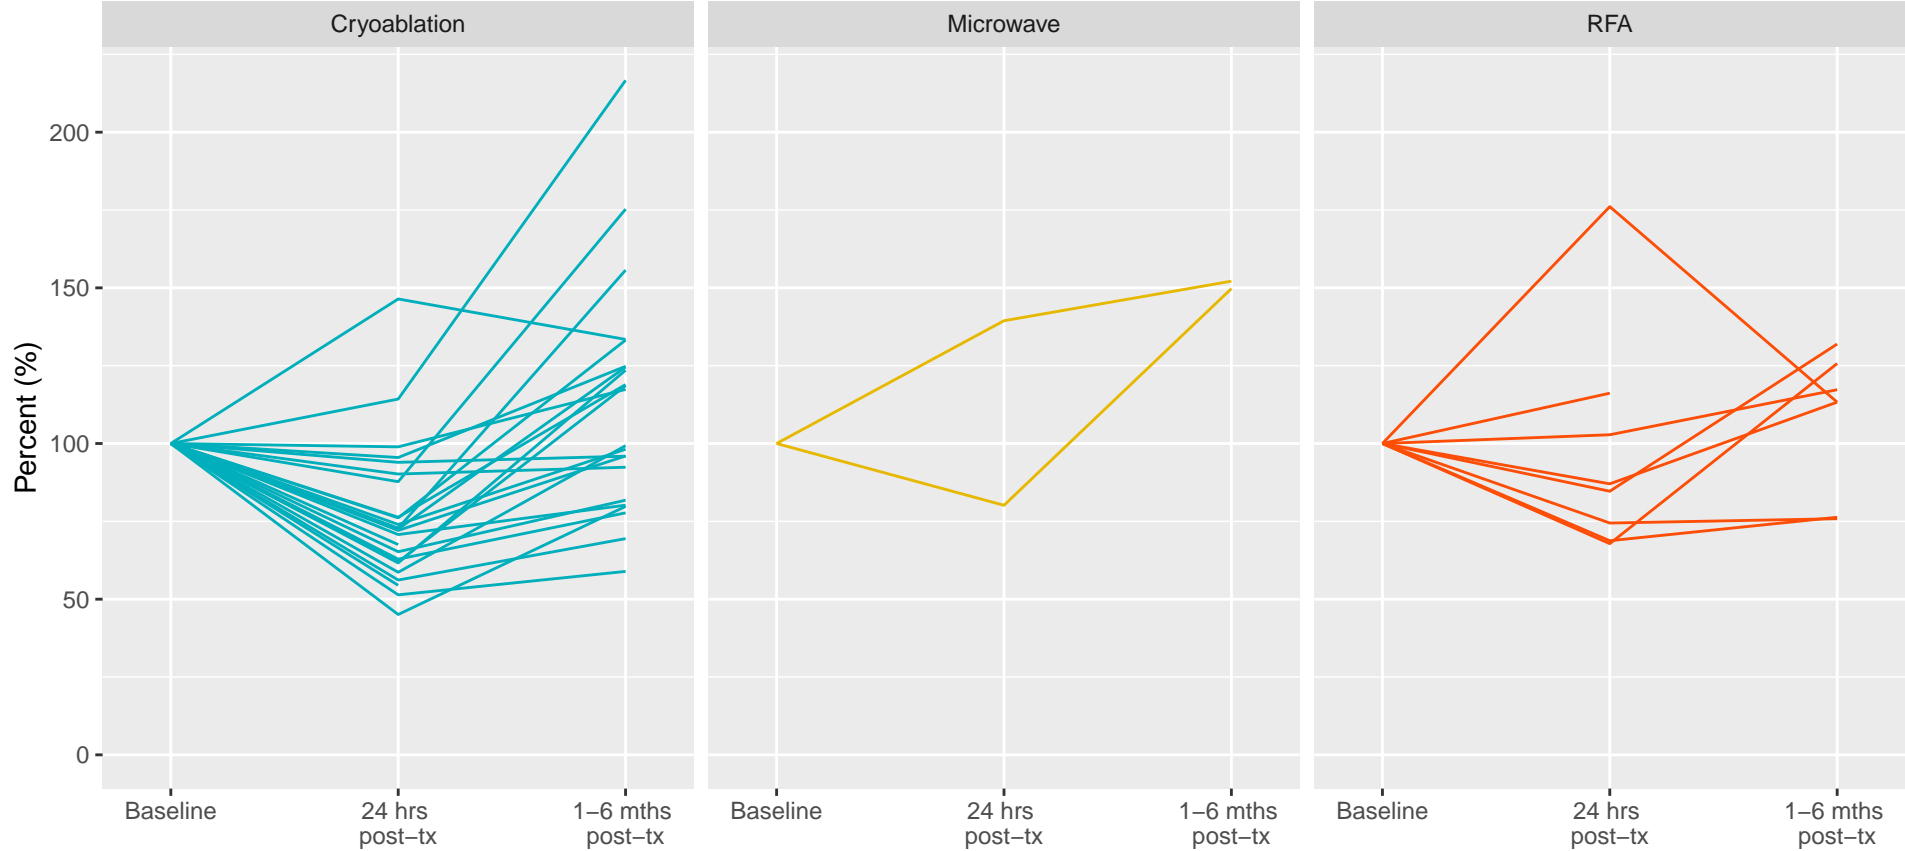

Uniprot ID: P09038, analyte: FGF2

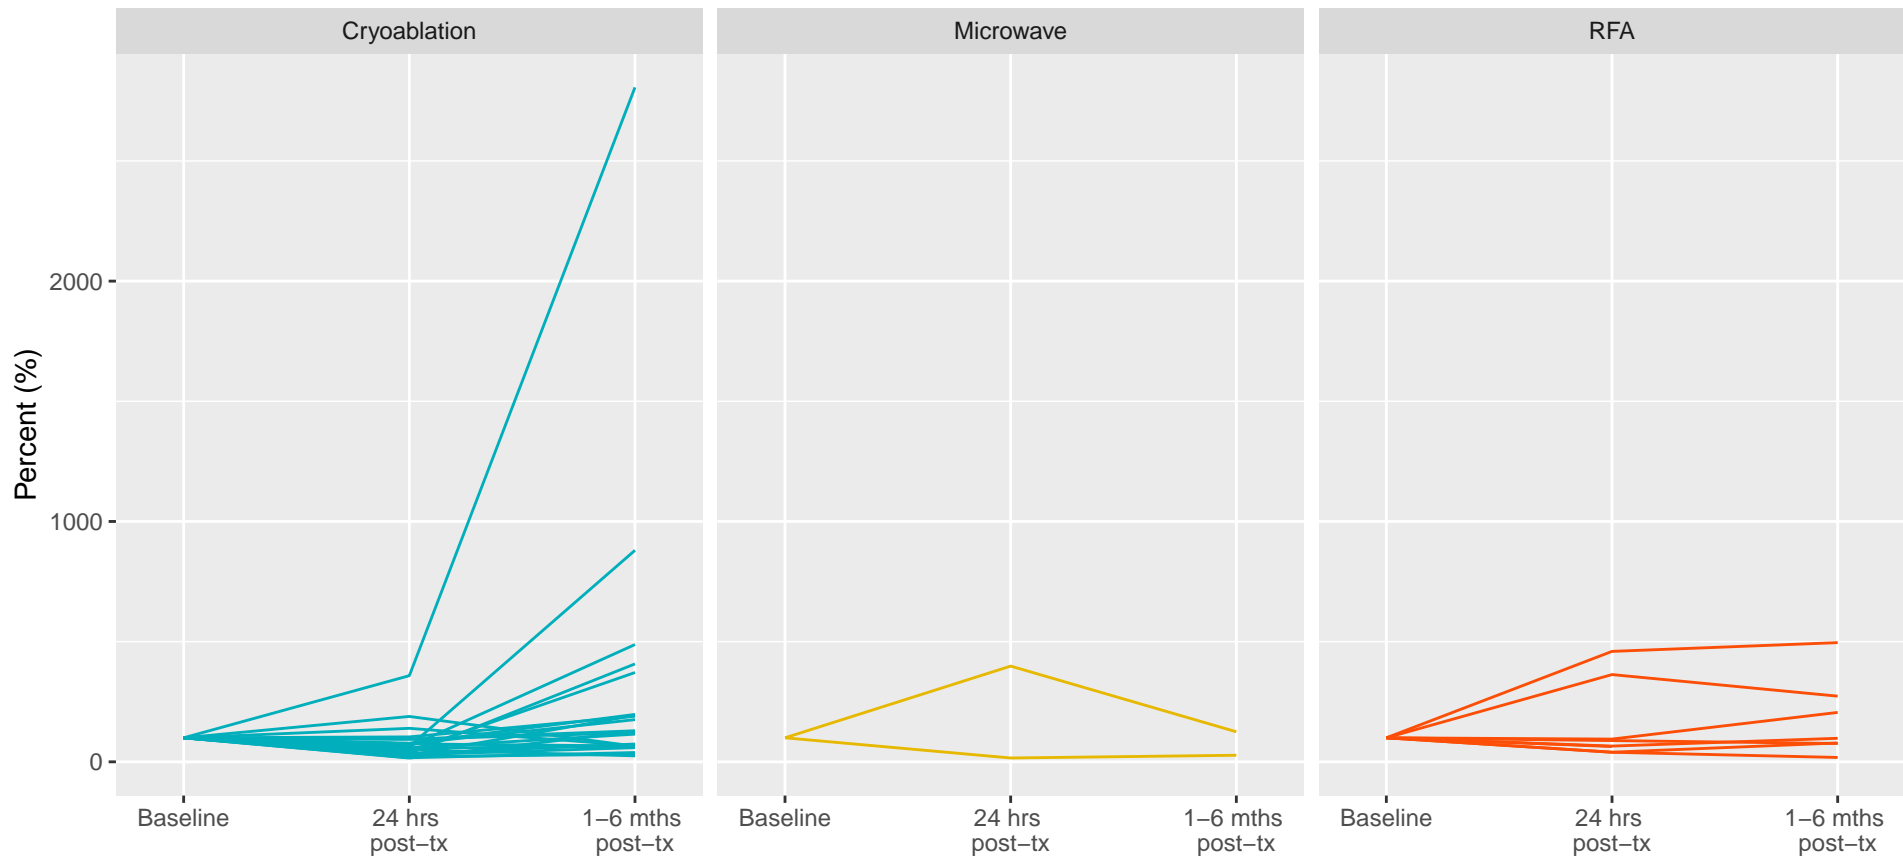

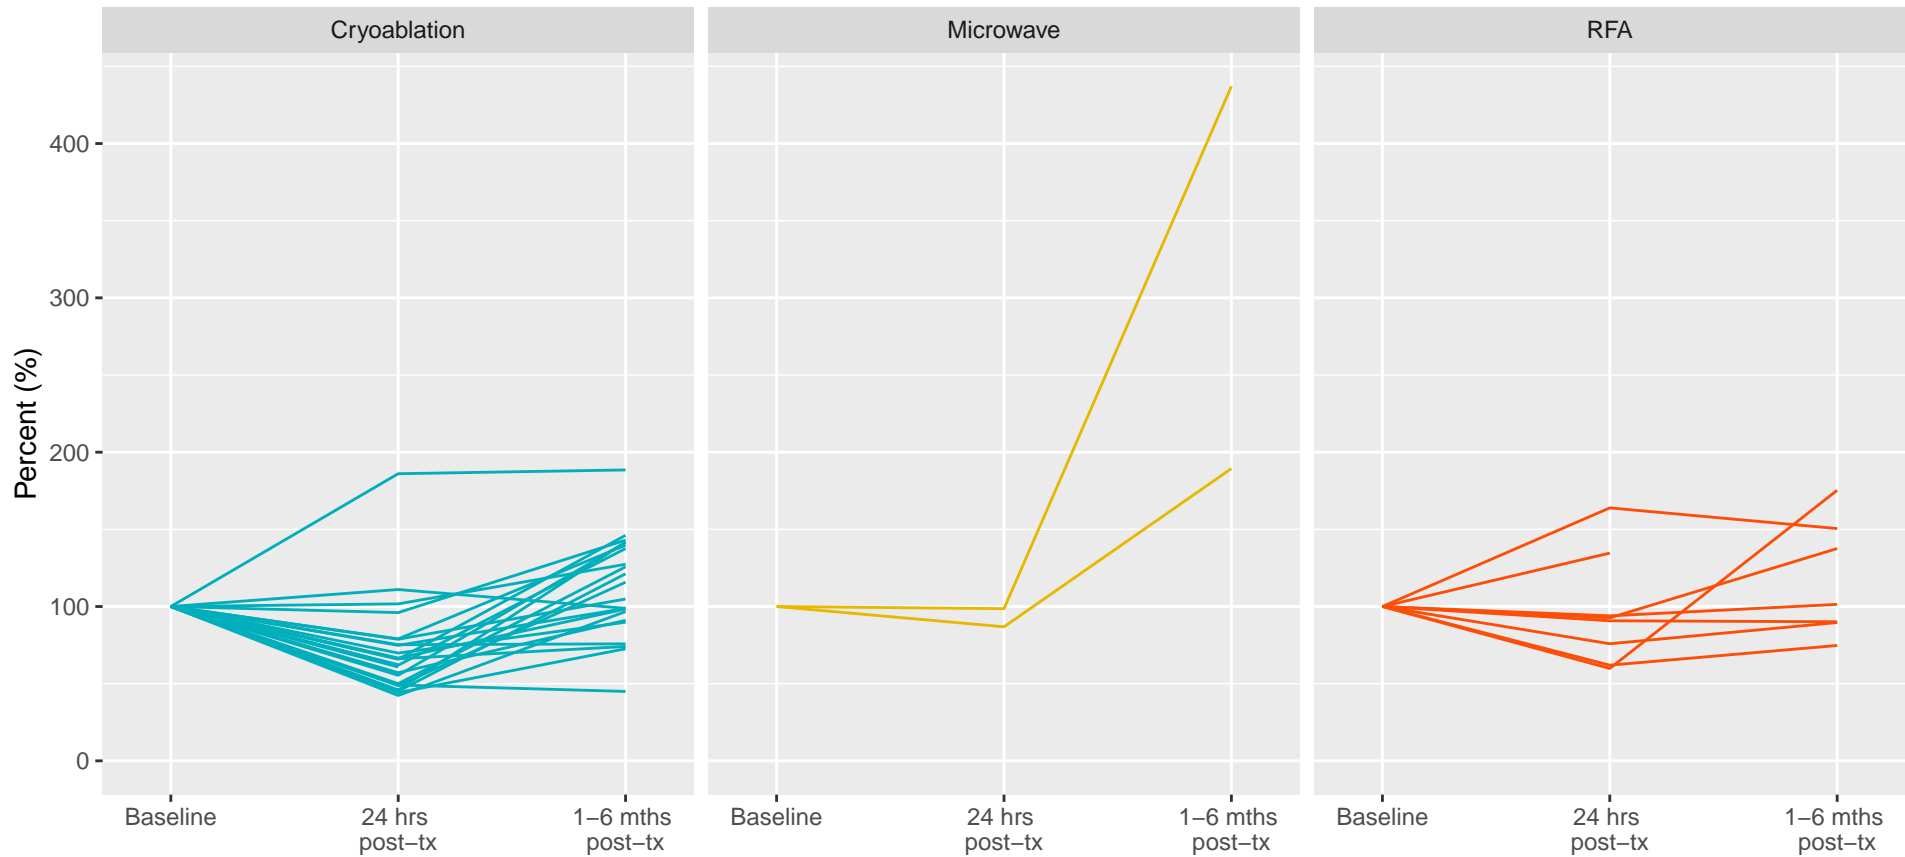

Uniprot ID: P48023, analyte: FASLG

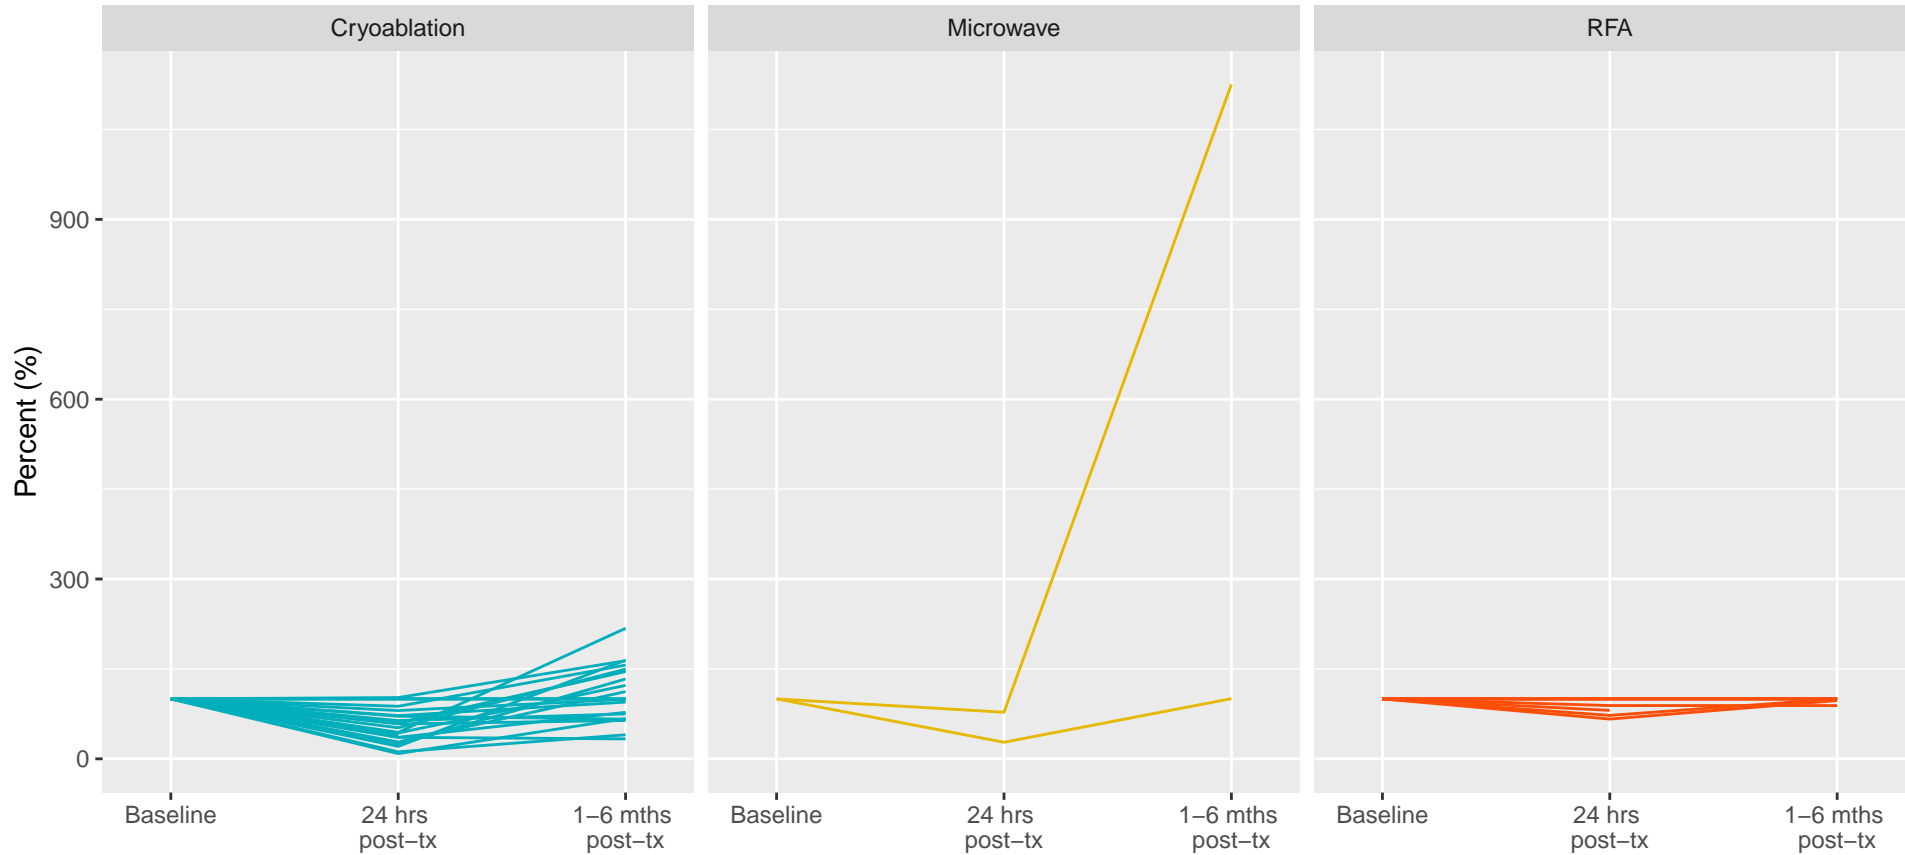

Uniprot ID: P80075, analyte: MCP-2

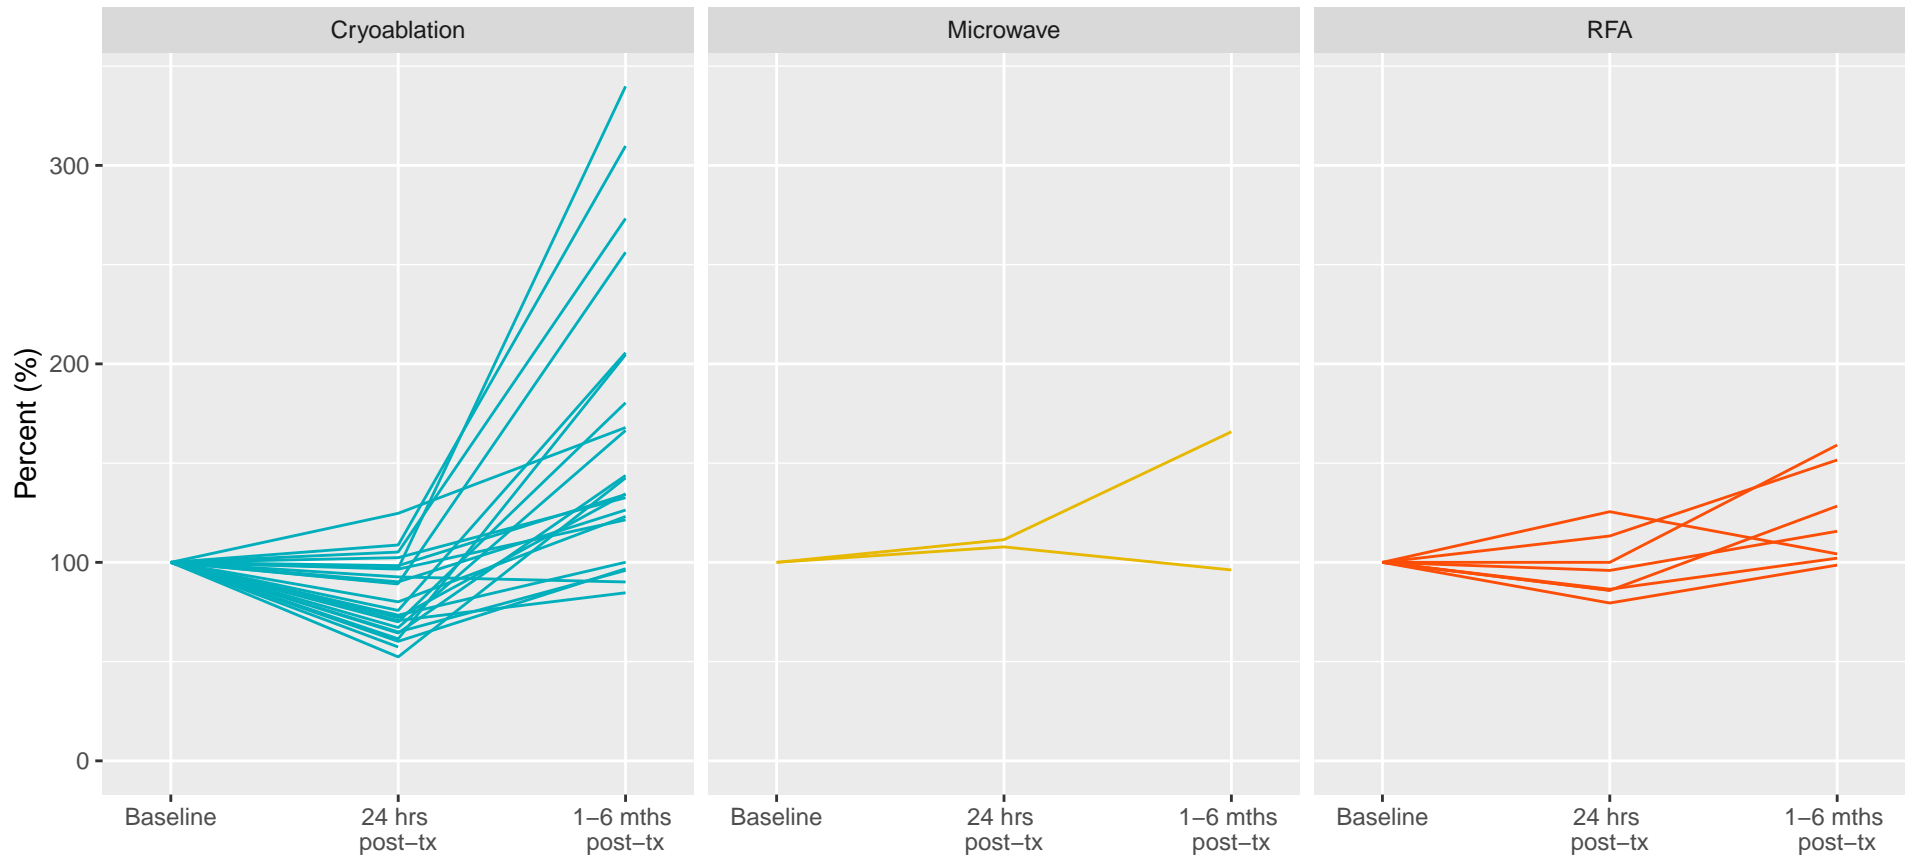

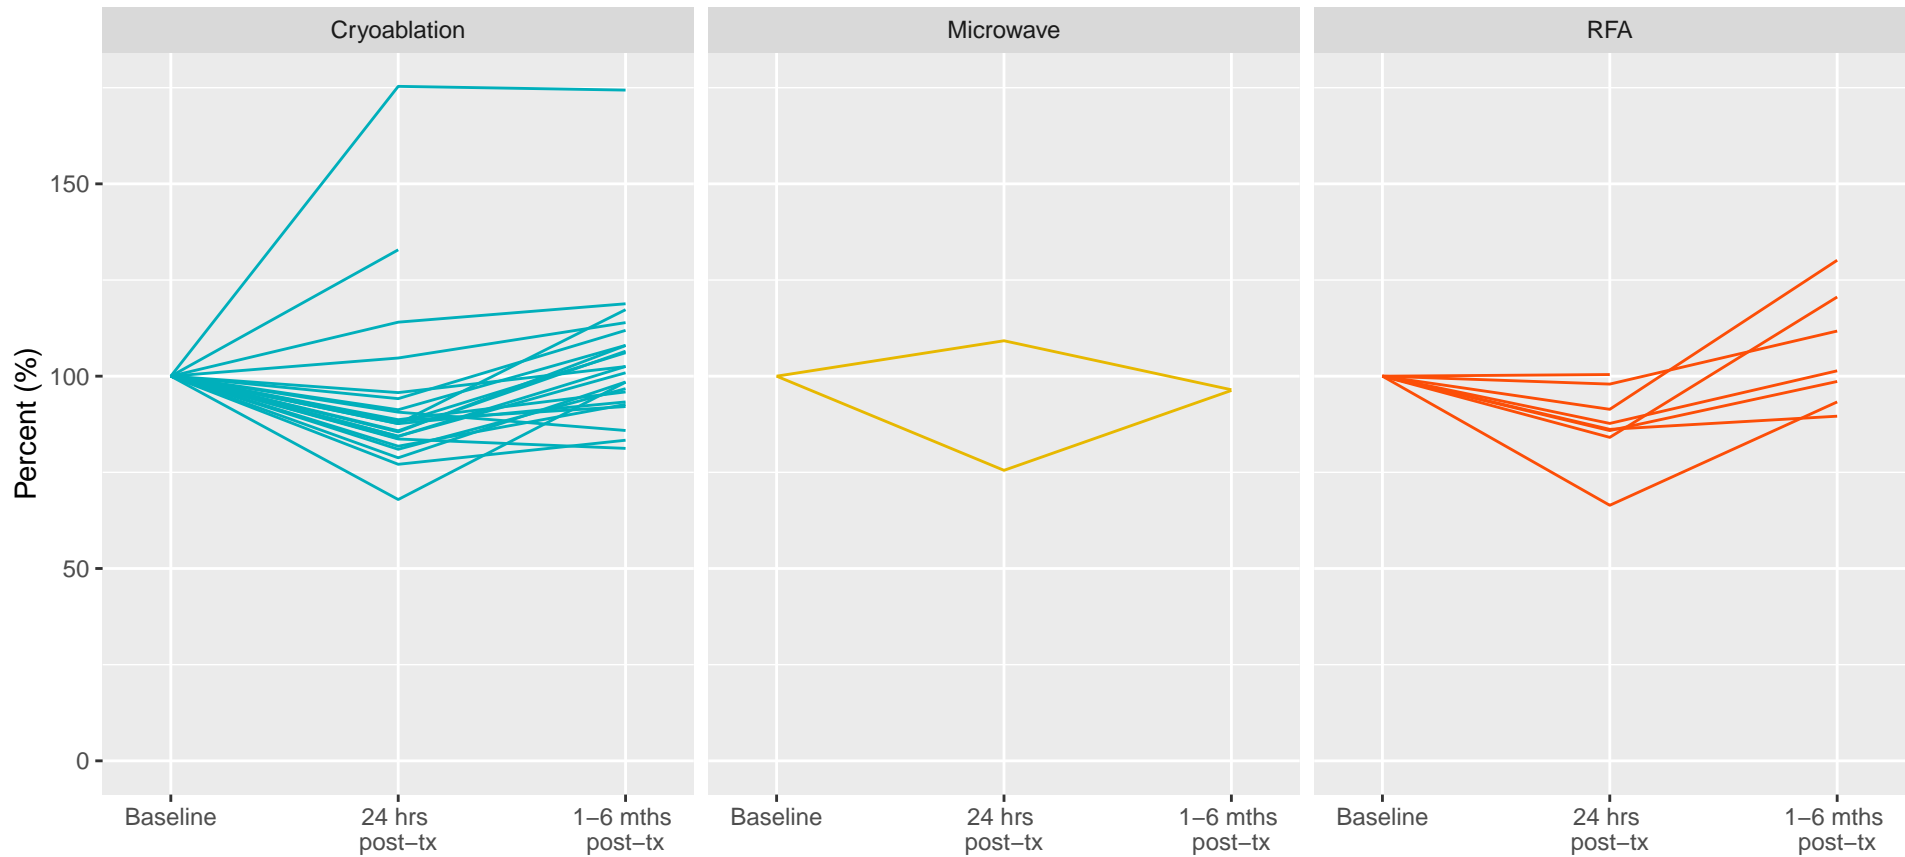

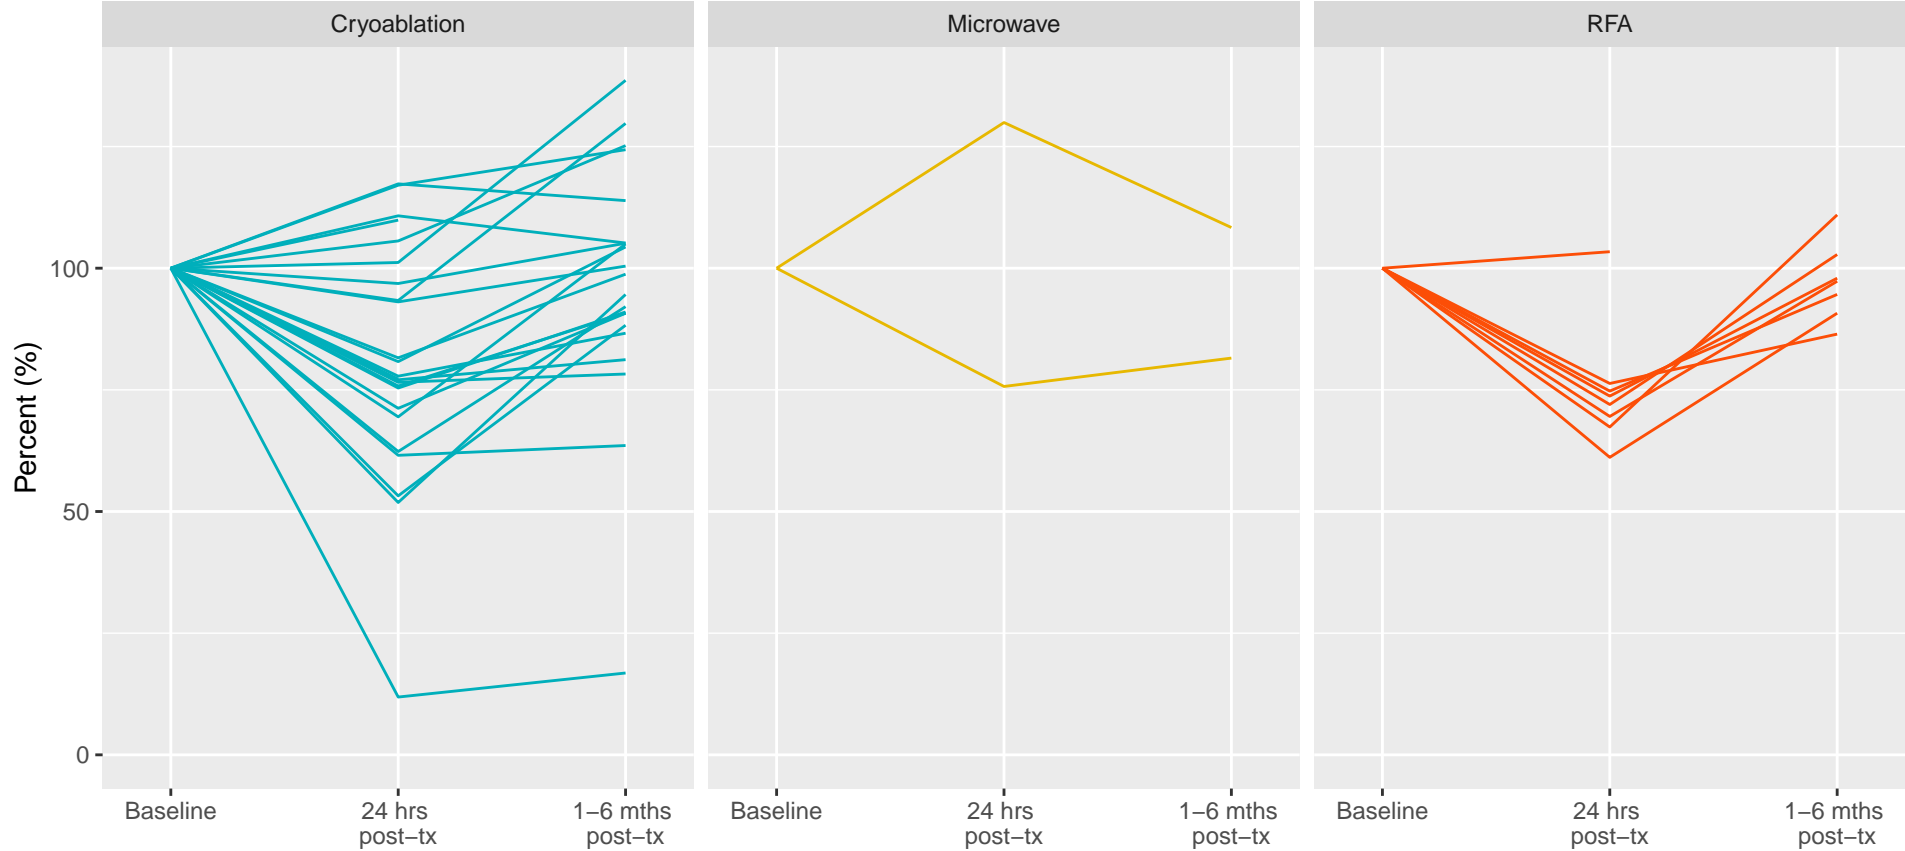

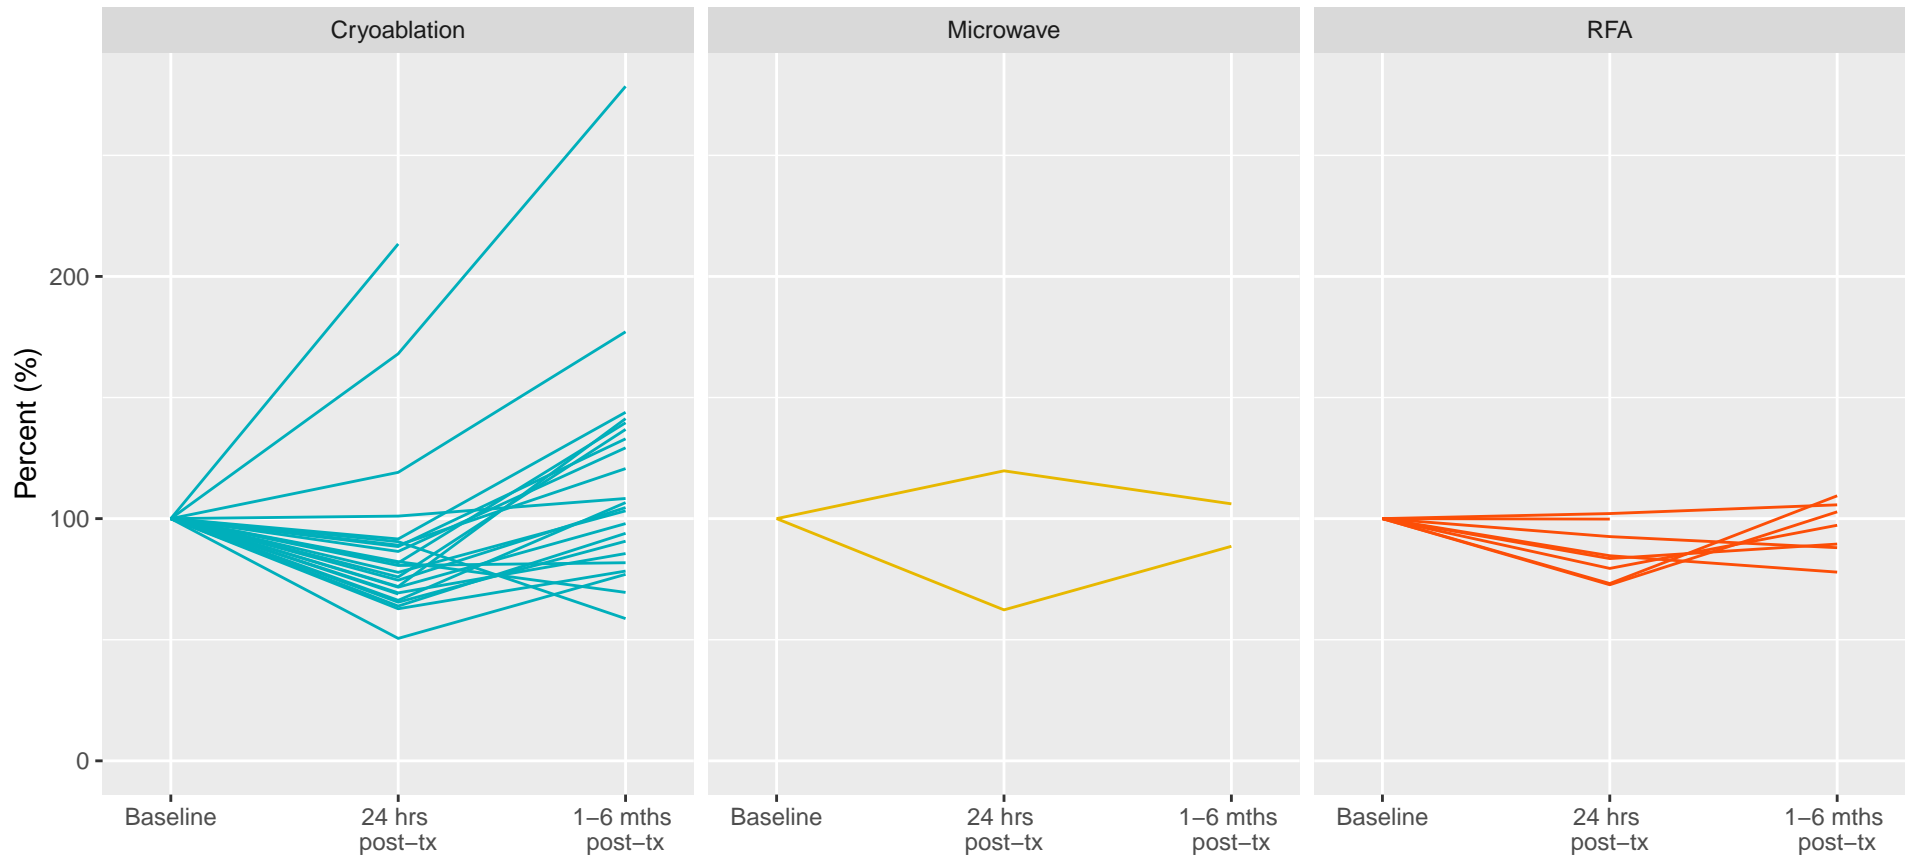

Uniprot ID: P39900, analyte: MMP12

Uniprot ID: P35968, analyte: VEGFR-2

Uniprot ID: Q99717, analyte: MAD homolog 5
