

Supplementary Table S5. The comparison of OR combination and linear combination with *ADHFE1*, *SDC2* and *PPP2R5C*.

<i>ADHFE1+SDC2+PPP2R5C</i>		
	OR combination ¹	linear combination
Cut-off value	<i>ADHFE1</i> : 5.02	
	<i>SDC2</i> : 7.50	0.25
	<i>PPP2R5C</i> : 9.33	
Sensitivity	84.6%	84.6%
(Positive number/case) ²	(11/13)	(11/13)
Specificity	92.3%	92.3%
(Positive number/control) ³	(12/13)	(12/13)

¹ OR combination means anyone positive of these three genes (*ADHFE1*, *SDC2* and *PPP2R5C*).

² The numbers in parentheses represent the CRC cases successfully identified by the hypermethylated genes/total CRC subjects.

³ The numbers in parentheses represent the control subject number of correctly identified as normal/total control subjects.
