

Figure S6. Preference and trait divergence at 100, 1000, 10,000, and 1 million generations after secondary contact when the trait is expressed in both sexes. The parameter values and legend follow Figure 1. a) Continent-island migration: $m_1 = 0, m_2 = 0.01$, b) asymmetric migration: $m_1 = 0.001, m_2 = 0.01$.
