Results of Environmental data

List of the observed bird species

Criteria used to quantify the magnitude human disturbance

Results of variation partitioning analyses on bird community composition

## SUPPLEMENTARY INFORMATION

**Table S1.** Overview of key wetland characteristics and mean (minimum, maximum) values for local environmental variables for each wetland across sampling sites, seasons (wet and dry) and years (2010 and 2011). Permanency: 1 = Temporary; 2 = Semi-permanent; 3 = Permanent. Abbreviation environmental variables: TON = total organic nitrogen; NH<sub>4</sub><sup>+</sup> = ammonium; NO<sub>3</sub><sup>-</sup> = nitrate; TP = total phosphorus; PO<sub>4</sub><sup>3-</sup> = orthophosphate; BOD<sub>5</sub>=Five day Biochemical Oxygen Demand; COD = Chemical Oxygen Demand; EC = Electric Conductivity; pH= logarithmic measure of hydrogen ion concentration.

**Table S3.** Criteria and ordinal scale used to quantify the magnitude of different types of human disturbance in close proximity of each sampling site.

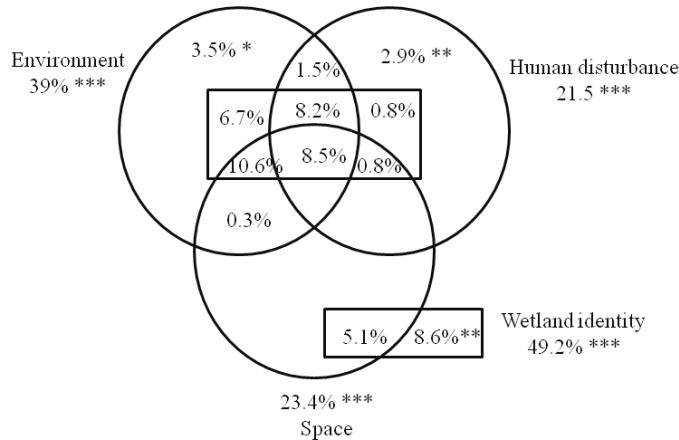

Human disturbance	score = 1	score = 2	score = 3
Cattle grazing	minimal grazing	moderate grazing	intensive grazing
Vegetation clearance	>10% vegetation removal	10-50% of vegetation removal	>50% of vegetation removal
Tree plantation	no plantation in >50m perimeter	plantation in >50m perimeter	plantation in wetland
Crop farming	no farming in >50m perimeter	farming in >50 m perimeter	farming in wetland
Clay mining	no clay mining	clay mining in >50 m perimeter	clay mining in wetland or >50m perimeter
Waste dumping	no waste dumping	water dumping near wetland	waste dumping in wetland
Ditching	no ditching	ditching within >50 m perimeter	ditching in wetland
Filling	no filling	filling near wetland	filling in wetland
Draining	no draining	draining within >50 m perimeter	draining in wetland

## SUPPLEMENTARY FIGURES

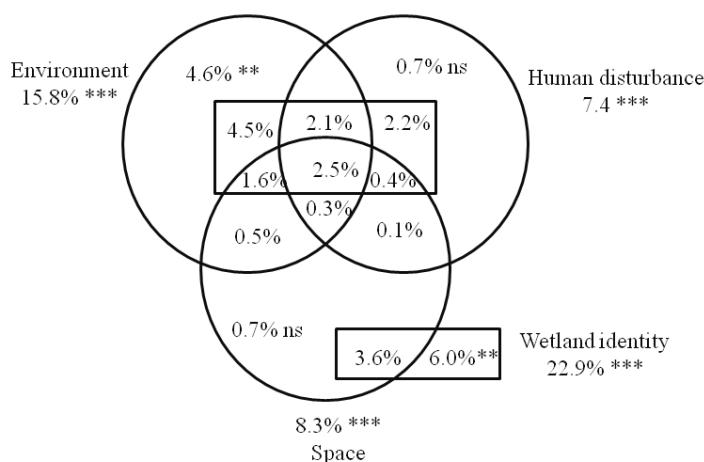

### A. Wetland specialist community

### B. Wetland generalist community

### C. Wetland associated community

**Figure S1.** Results of variation partitioning analyses on the community composition of (A) wetland specialist, (B) wetland generalist and (C) wetland associated birds with environment (E), human disturbance (H), space (S) and wetland identity (W) as explanatory variables. Percentages represent the adjusted  $R^2$ .  $R^2_{adj.}$ . Values < 0 are not mentioned. ‘ns’ not significant, ‘\*’  $p<0.05$ , ‘\*\*’  $p<0.01$ , ‘\*\*\*’  $p<0.001$ ). Note that the significance of shared fractions cannot be tested.
