

Supplementary Figures

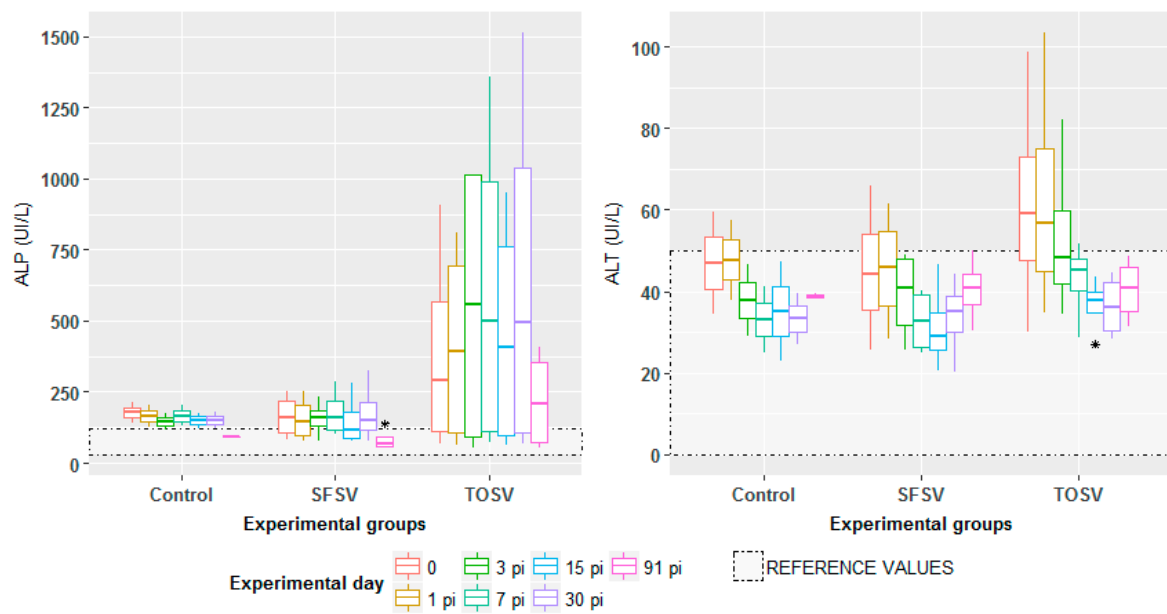

Supplementary Figure 1. Hematocrit and platelets values of experimental groups in different experimental days

Supplementary Figure 2. Creatinine and BUN values of experimental groups in different experimental days.

Supplementary Figure 3. GGT and AST values of experimental groups in different experimental days.

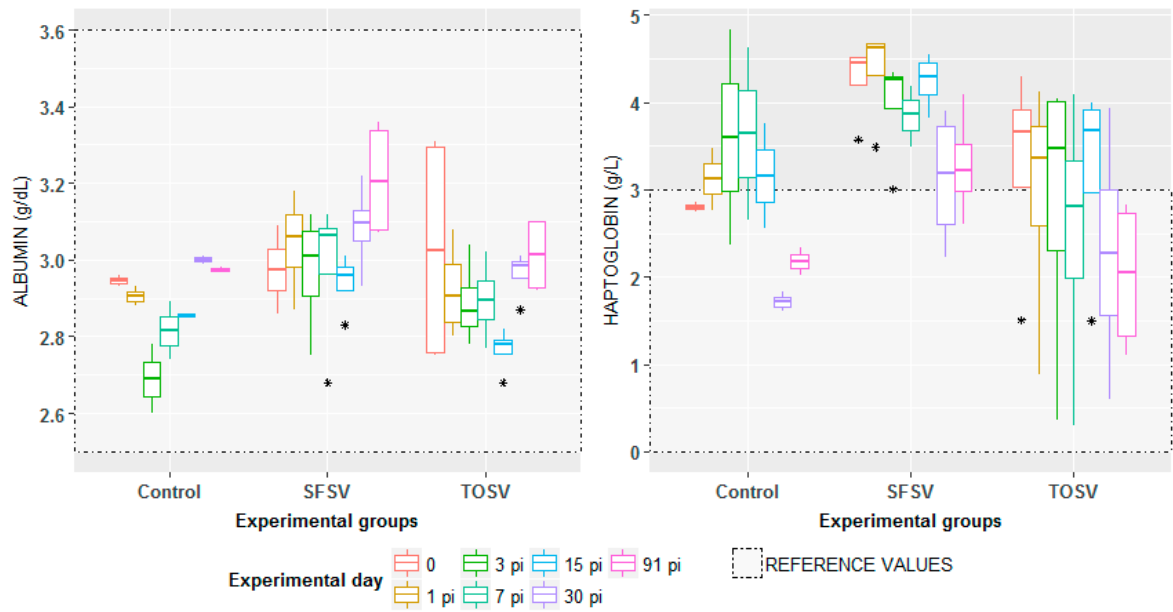

Supplementary Figure 4. ALP and ALT values of experimental groups in different experimental days.

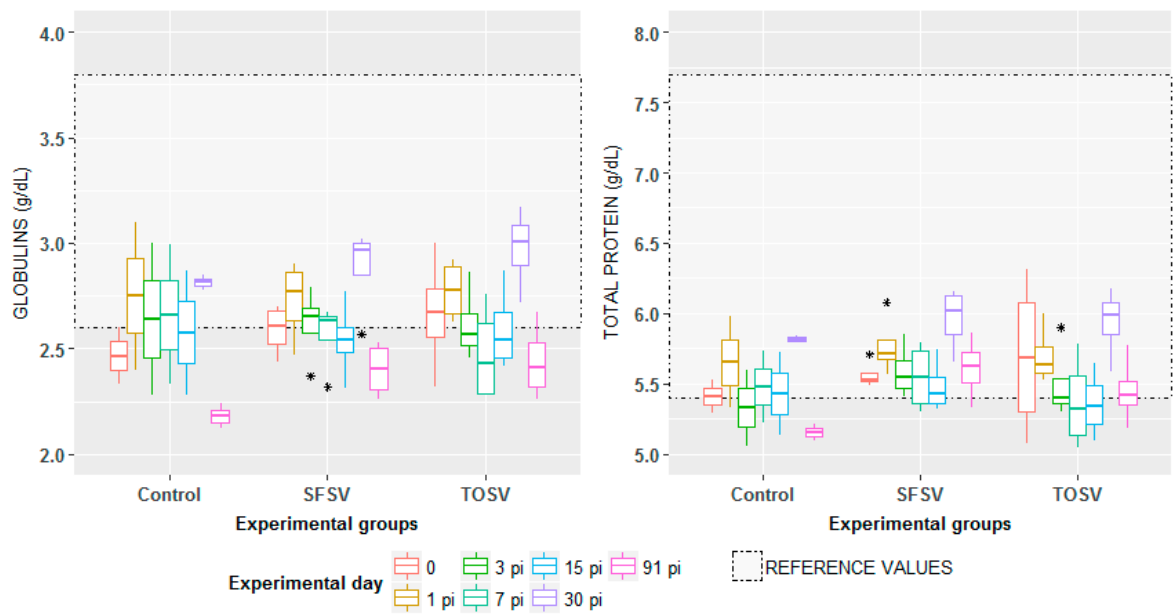

Supplementary Figure 5. White blood cells (WBC) and Lymphocytes values of experimental groups in different experimental days.

Supplementary Figure 6. Ferritin and CRP values of experimental groups in different experimental days.

Supplementary Figure 7. Albumin and Haptoglobin values of experimental groups in different experimental days.

Supplementary Figure 8. Globulin and Total protein values of experimental groups in different experimental days.
