Supplementary Figures:

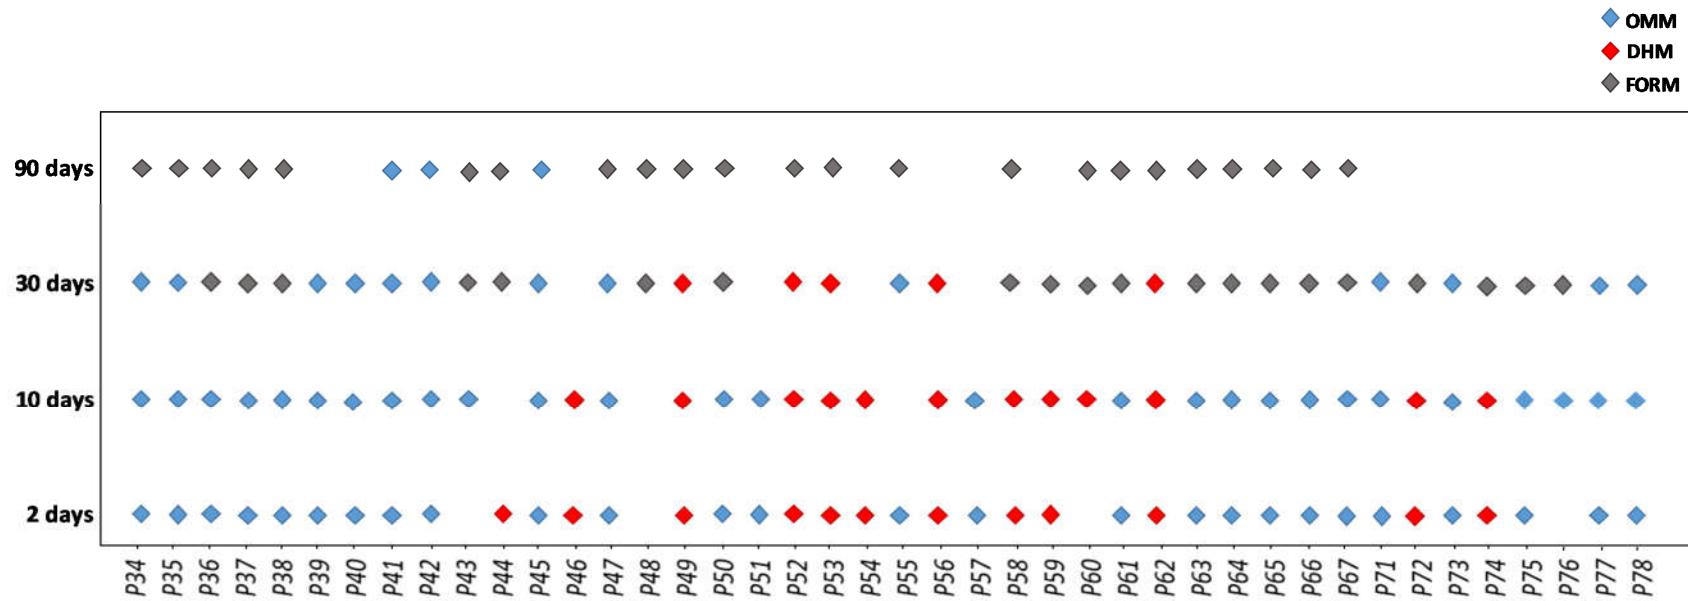

Figure S1. Feeding type distribution among the premature babies included in this study over the time. OMM: own mother milk; DHM: donor human milk; FORM: formula milk groups.

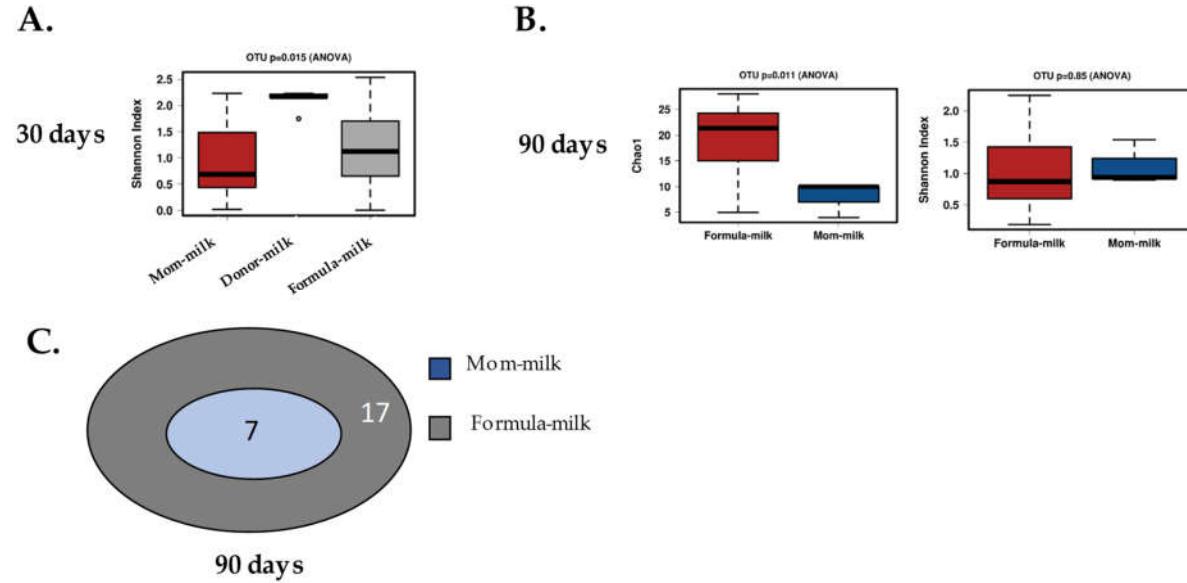

Figure S2. *Bifidobacterium* diversity. (A) Alpha-diversity between groups. Chao1 and Shannon indexes comparison between Donor (DHM), Mom (OMM) and Formula milk groups at 30 days of life. (B) Alpha-diversity over time. Chao1 and Shannon indexes comparison between Mom (OMM) and Formula milk groups at 90 days of life. (C) Venn diagram. Number of unique and shared species in the babies' groups at 90 days. Colours and groups explained in each figure.

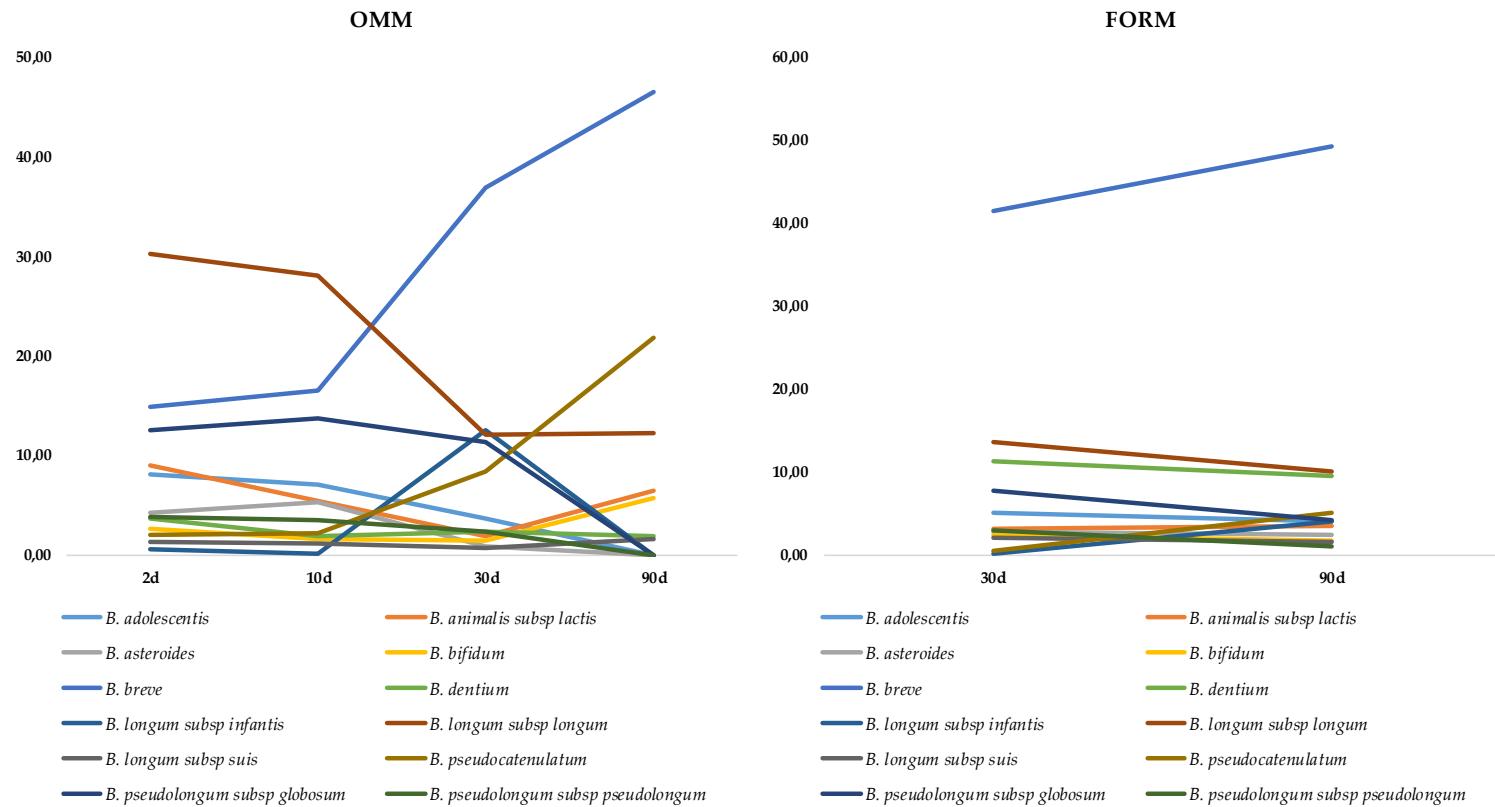

Figure S3. *Bifidobacterium* evolution. Evolution of *Bifidobacterium* species in (A) mom milk (OMM) group and in (B) formula milk (FORM) group during the first three months of life.

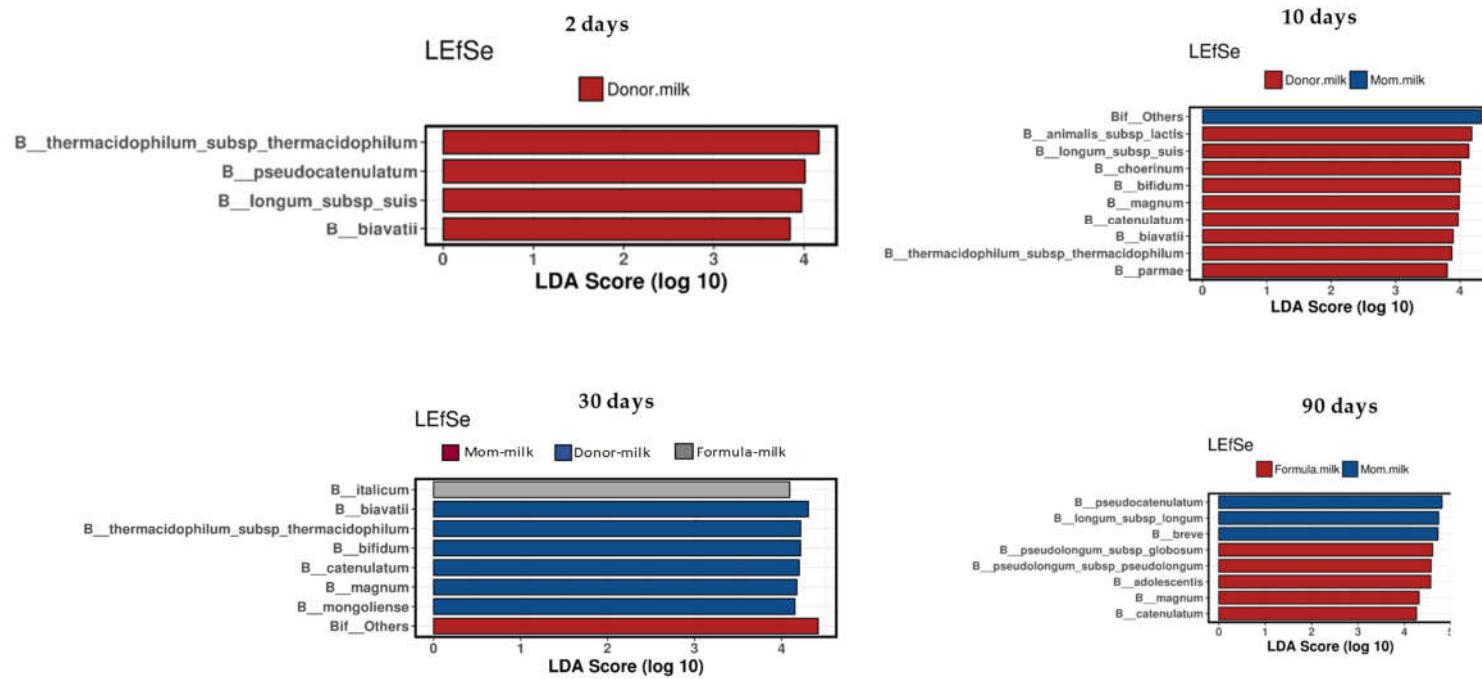

Figure S4. Differential species. Linear discriminant analysis (LDA) combined with effect size measurement (LEfSe) show the most differentially abundant *Bifidobacterium* species over time among feeding type. Colours and groups explained in each figure.
