West region was defined as primarily French & Italian speaking cantons: Jura (JU), Geneva (GE), Fribourg (FR), Neuchâtel (NE), Valais (VS), Vaud (VD) & Ticino (TI). All other cantons were defined as East. IRR= Incidence rate ratio. Significant changes in IRR are in bold. Serotypes included in PCV7: 4, 6B, 9V, 14, 18C, 19F & 23F. Additional serotypes included in PCV13, but not PCV7: 1, 3, 5, 6A, 7F & 19A. Serotypes not included in either PCV7 or PCV13 were designated as Non-PCV. For 13 isolates/cases, regions were unknown.

West region was defined as primarily French & Italian speaking cantons: Jura (JU), Geneva (GE), Fribourg (FR), Neuchâtel (NE), Valais (VS), Vaud (VD) & Ticino (TI). All other cantons were defined as East. IRR= Incidence rate ratio. Significant changes in IRR are in bold. Serotypes included in PCV7: 4, 6B, 9V, 14, 18C, 19F & 23F. Additional serotypes included in PCV13, but not PCV7: 1, 3, 5, 6A, 7F & 19A. Serotypes not included in either PCV7 or PCV13 were designated as Non-PCV. For 13 isolates/cases, regions were unknown.

Table S5. Incidence of invasive pneumococcal disease cases in adults ≥ 65 years by region and PCV serotypes, Switzerland 2005-2019

a Serotypes/serogroups with proportions $\geq 1\%$ are highlighted as such: PCV7 in peach, additional serotypes included in PCV13, but not PCV7 are in blue and non-PCV serotypes are in gray.

b West region defined as primarily French and Italian speaking cantons in Switzerland.

c Serotypes/serogroups with proportions $< 1\%$ were classified as others irrespective of PCV type.

* Excludes 13 isolates/cases with unknown regional classification.

Supplementary Figures

Figure S1. Cantons of Switzerland and their regional classification

Canton(s)	Majority Language	Regional classification
Ticino (TI)	Italian	West
Fribourg (FR), Geneva (GE), Jura (JU), Neuchâtel (NE), Valais (VS), Vaud (VD)	French	West
Aargau (AG), Appenzell Ausserrhoden (AR), Appenzell Innerrhoden (AI), Basel-Landschaft (BL), Basel-Stadt (BS), Bern (BE), Glarus (GL), Graubünden (GR), Lucerne (LU), Nidwalden (NW), Obwalden (OW), Schaffhausen (SH), Schwyz (SZ), Solothurn (SO), St. Gallen (SG), Thurgau (TG), Uri (UR), Zug (ZG), Zürich (ZH).	German	East

Figure S2. Regional estimates of pneumococcal vaccine coverage in children aged 2-years and age-group specific IPD incidence in Switzerland, 2005-2019. (A) regional estimates with up to 1 PCV dose and (B) up to 3 PCV doses.

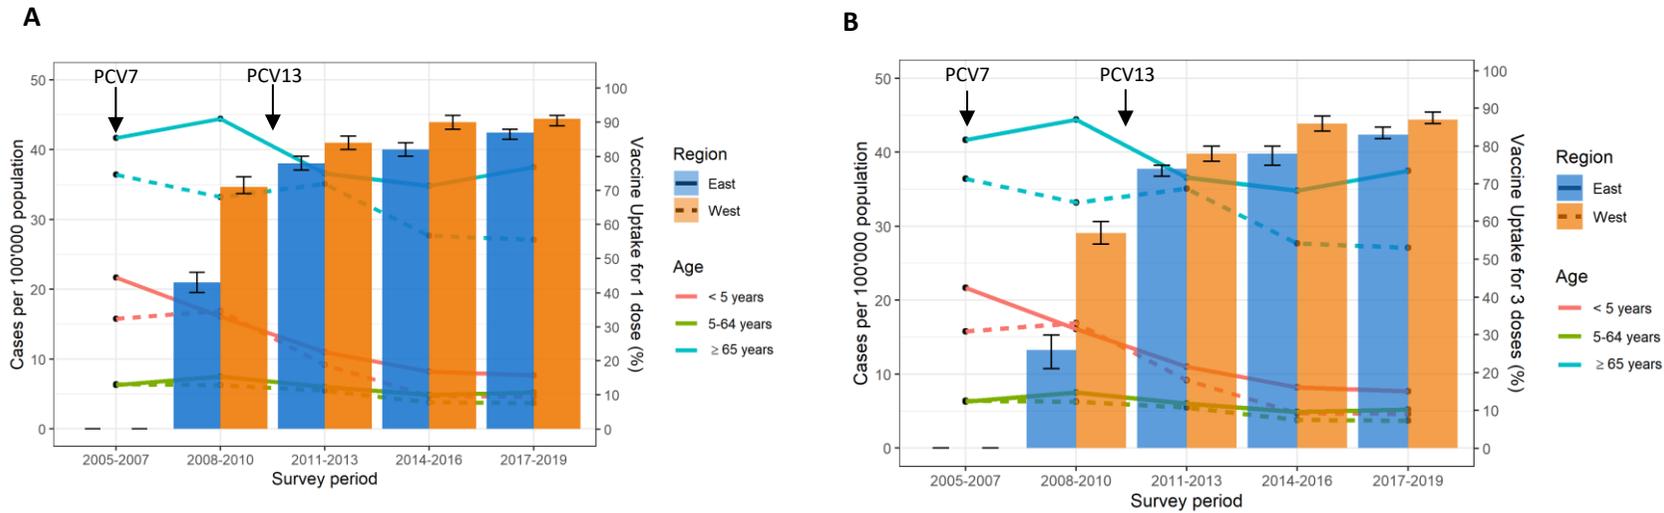

Figure S3. Timeliness of pneumococcal conjugate vaccine uptake in children aged 8 years old in Switzerland and its regions, 2014-2019.

(A) Timeliness of vaccine uptake in children aged 8 years vaccinated with 1-3 doses of PCV7 or PCV13, (B) regional estimates of pneumococcal vaccination coverage among children 8 years with up to 1 PCV dose, (C) up to 2 PCV doses and (D) up to 3 PCV doses.
