Diversity Analysis and Genetic Relationships among Local Brazilian Goat Breeds Using SSR Markers

Marcos P.C. Menezes, Amparo M. Martinez, Edgard C. Pimenta Filho, Jose Luis Vega-Pla, Juan Vicente Delgado, Janaina K. Gomes Arandas and Laura Leandro da Rocha

Figure S1. Brazilian goat breeds, (A) = Canindé, (B) = Moxotó, (C) = Marota, (D) = Graúna, (E) Serrana Azul, (F) = Repartida.

Table S1. Microsatellites analyzed, fragment sizes, fluorochromes and the respective sequences (direct and reverse) of the primers.
