

Table S1 The amplification system of PCR based on 16S rRNA gene.

| Composition | Volum (μ L) |
|---------------------------------|------------------|
| Q5 high-fidelity DNA polymerase | 0.25 |
| 5*Reaction Buffer | 5 |
| 5* High GC Buffer | 5 |
| dNTP (10mM) | 2 |
| Template DNA | 2 |
| Forward primers (10uM) | 1 |
| Reverse primers (10uM) | 1 |
| water | 8.75 |

Procedure:

| | |
|------|----------|
| 98°C | 5min |
| 98°C | 30 s |
| 53°C | 30 s |
| 72°C | 45 s |
| 72°C | 5 min |
| 12°C | ∞ |

} 25 cycles
