Table S1. The representation of meaning for each treatment.

Treatment	Representation of meaning
CK	Minimal medium containing metolachlor of 50 mg/L
MG	Add 0.2% glucose in CK
MY	Add 0.2% yeast extract in CK
MGY	Add 0.1% glucose and 0.1% yeast extract in CK
MF	Inoculate MET-F-1 in CK
MFG	Inoculate MET-F-1 in MG
MFY	Inoculate MET-F-1 in MY
MFGY	Inoculate MET-F-1 in MGY

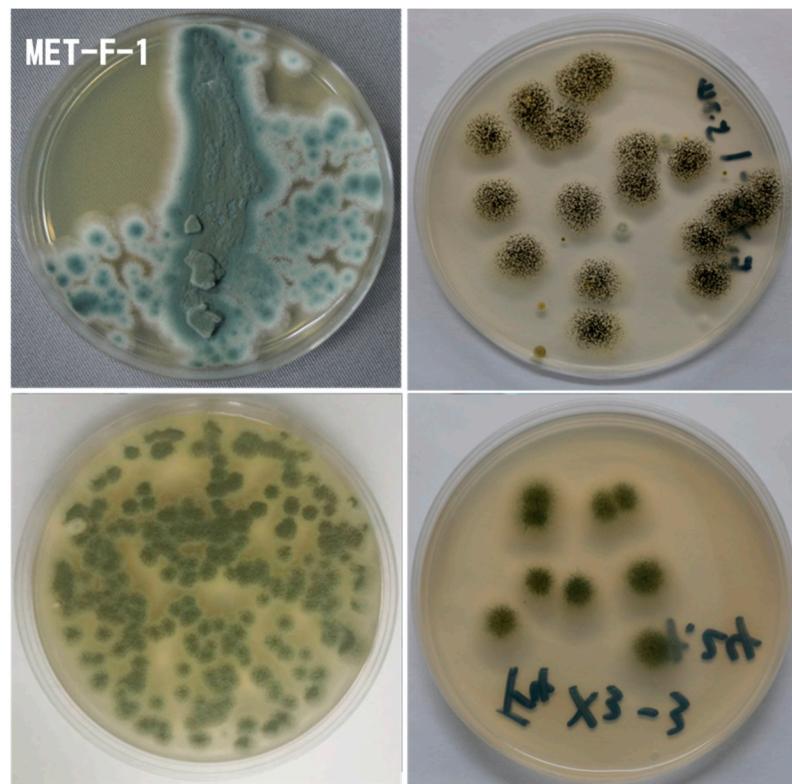

Figure S1. Colony morphology of the four metolachlor-tolerant strains.

Parent compound	 MET		
Main metabolites	 MOXA	 MESA	 MDES
	 M2E	 M2H	 MMER

Figure S2. The structural formulas and chemical names of parent compound metolachlor and main regular metabolites.
