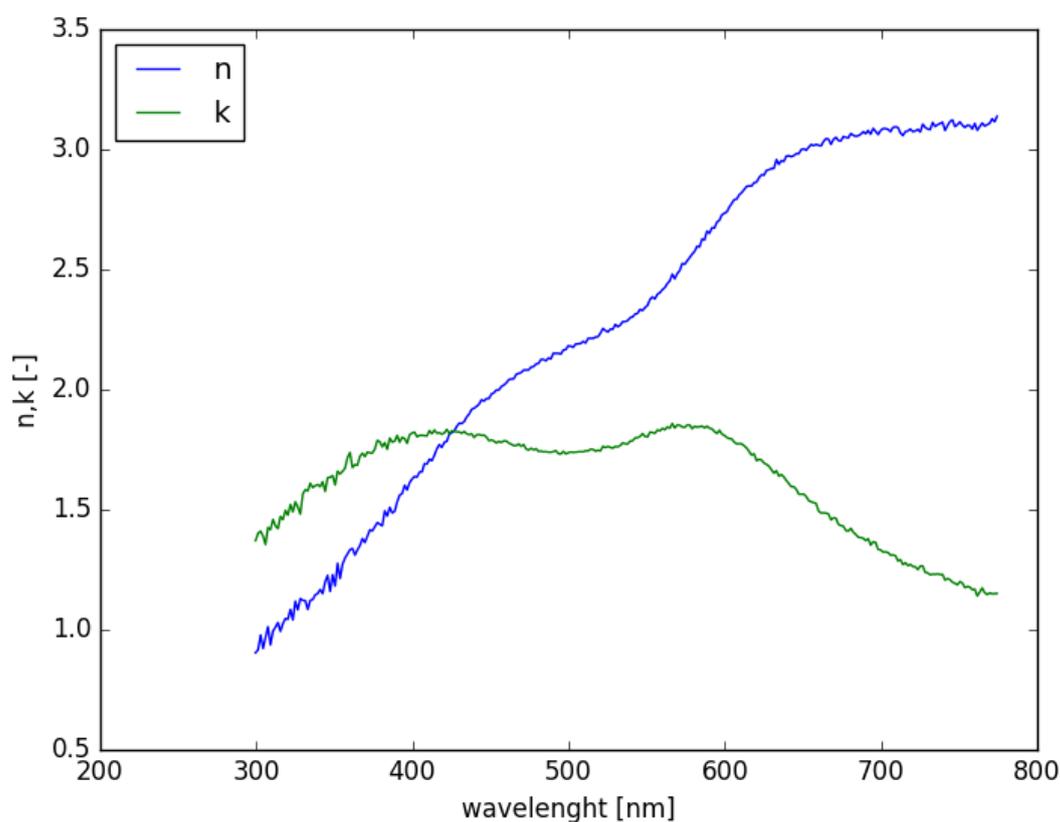

Figure S1. Refractive indices of $\text{Sn}_2\text{P}_2\text{Se}_6$ as function of wavelength.

Ellipsometry data on bulk $\text{Sn}_2\text{P}_2\text{Se}_6$, at 20 degrees incidence, recorded on a commercial variable angle spectroscopic ellipsometer M-2000 FTM, J.A. Woollam Inc., Lincoln USA. The refractive indices were calculated with the accompanying software package, WVASE[®], assuming isotropic material properties.
