Supplementary Information for
Persuasive messages will not increase COVID-19 vaccine acceptance: Evidence from a nationwide online experiment

Supplementary S1– Questionnaire (both waves)

[text in square brackets was not visible to the subjects]

We invite you to fill in the questionnaire as part of the research conducted for the University of Warsaw. Please answer according to your beliefs. We guarantee full confidentiality of the collected data.

The survey will take you about 15 minutes to complete, and you will receive [xx] Ariadna points for it.

The survey consists of several different thematic blocks. Please complete the survey at once and do not take breaks. While completing the survey, it is not possible to return to the previous page.

To participate in the survey, please continue.

Greetings

In case of any problems with the survey, or if you would like to provide us with your comments on the survey, please contact us:

[sex] What is your gender?
> [rotate]
> female
> male

[age] What age are you?
> 18-24 years old
> 25-34 years old
> 35-44 years old
> 45-54 years old
> 55 years old or older

[year] What year were you born?
> [ ]

[city_population] What is the size of the community you live in?
> village
> small town (up to 20 000 inhabitants)
> medium city (between 20 000 and 99 000 inhabitants)
> large city (between 100 000 and 500 000 inhabitants)
> large city (more than 500 000 inhabitants)

[woj] What voivodeship do you live in?
> Dolnośląskie
> Kujawsko-Pomorskie
> Lubelskie
> Lubuskie
> Łódzkie
> Małopolskie
> Mazowieckie
> Opolskie
> Podkarpackie
> Podlaskie
> Pomorskie
> Śląskie
> Świętokrzyskie

Warmińsko-Mazurskie
Wielkopolskie
Zachodniopomorskie

[edu] What is your current education (the last school completed)?
Primary or lower secondary school
elementary
secondary
post-secondary
currently studying
bachelor's degree
higher education completed

[if in edu: bachelor or higher education]
[M7] What was your field of study?

[in if edu: currently studying]
[M7a] What is your field of study?

[P17] How strongly are you experiencing the following emotion at the moment?
[horizontal scale: 1 I do not feel this emotion now, 10 I feel this emotion very strongly right now]
[rotate and register order]
Joy
Fear
Anger
Repulsion
Sadness
Surprise

[only   in   wave   2]
[trust_gov, trust_neighbours, trust_doctors, trust_media, trust_family, trust_scientists] Do you trust:
[rotate and register order]
representatives of the European Union
the government
your neighbors
doctors
the media (journalists)
your family
scientists

[scale:] YES, high
YES, moderate
NO
I have no opinion

[P18] How do you perceive your willingness to take risks in general?
[horizontal scale: 1 totally risk-averse, 10 totally willing to take risks]

[P19] People may behave differently in different situations. How would you rate your willingness to take risks in the following cases?
[horizontal scale: 1 totally risk-averse, 10 totally willing to take risks]
[rotate and register order]
Your professional work

Taking care of your health, such as undergoing surgery that may bring complications, putting off recommended medical tests, changing a prescribed medication without consulting your doctor, having unprotected sex with someone other than a long-term, faithful partner.

[P37] Read the description below and then answer the related questions.

A vaccine for coronavirus has recently become available in Poland. Vaccination is voluntary.

[*Randomized messages – each could be present or not. Exactly three randomly selected messages were shown in Wave 1: each message was independently drawn or not (50/50) in Wave 2*]
[*v_producer_reputation*]
The vaccine was developed by scientists from the American Pfizer and the German Biontech. [wave 1]/ The vaccine was developed by scientists from an international research consortium. [wave 2]

[*v_efficiency*] The vaccine's effectiveness has been estimated at over 90%, which means that a vaccinated person is more than ten times less likely to get the disease than an unvaccinated person.

[*v_safety*] The European Medicines Agency confirms that the vaccine is safe. Possible side effects are mild to moderate, can be treated with paracetamol, and disappear within a few days.

[*v_other_want_it***]** Research conducted by IPSOS on 18 000 people in 15 countries shows that about 75% want to get vaccinated as soon as possible.

[*v_scientific_authority*] According to the COVID team at the Polish Academy of Sciences, "vaccination is the only rational choice, thanks to which we will be able to exit the pandemic faster." The use of the vaccine is also recommended by the Supreme Medical Chamber and many other medical and scientific societies.

[*v_ease_personal_restrictions*] It should be assumed that vaccination will make everyday life easier: vaccinated people will not have to quarantine after contact with an infected person, will be able to travel freely abroad, will not have to wear a face mask, etc.

[*v_scarcity] [only in wave 1*] In the initial stages, there will not be enough vaccines for everyone.

[*v_tested*] [only in wave 2] Development work on the vaccines began immediately after the pandemic outbreak and was treated as a priority. It drew on the vast experience of the research teams involved and used some of the solutions that had been used in vaccines for years. In total, more than 100 000 people were tested in clinical trials.

[*Price information: one of four versions randomly shown:*]
[*v_p_pays0*] Now, suppose that the vaccine will be free for the person who wants to be vaccinated.
[*v_p_gets70*] Now, suppose that the vaccine will be free for a person who wants to be vaccinated, and as an incentive for mass vaccination, the government will pay everyone who wants to be vaccinated 70 zł.
[*v_p_pays10*] Now, suppose that the vaccine will be fee-based and will cost about 10 zł per person.
[*v_p_pays70*] Now assume that the vaccine will be fee-based and will cost about 70 zł per person**.**

If, provided the information you just read was confirmed, would you be willing to get vaccinated**?**
  definitely not
  probably not
  probably yes
  definitely yes

[P38] Describe below the main reasons for your decision regarding coronavirus vaccination.

[P39] Who or what could change your decision regarding coronavirus vaccination?

[if previously indicated that they would probably or definitely not want to be vaccinated]
[P40] If the vaccine was confirmed to be effective and safe after the first few months of vaccinations, would you be willing to be vaccinated?
        definitely not
        probably not
        probably yes
        definitely yes

[P20] To what extent are you concerned or frightened with the current coronavirus pandemic?
        [horizontal scale: 1 I am not concerned at all, 10 I am terrified]

[P21] What factors are major influences on the extent to which you are concerned about a coronavirus pandemic?

[P22] How would you rate your impact on whether you get infected with coronavirus?
        [horizontal scale 1-7: 1 I have no influence, 7 I have a very high influence]

[P23] How well informed do you feel about the current coronavirus pandemic?
        [horizontal scale 1-7: 1 I do not feel informed at all, 7 I feel very well informed]

[Rotate the order of P24 and P25 and register order]
[P24] As of January 14th [wave 1]/February 27th [wave 2] of this year, approximately 1.4 [wave 1]/ 1.68 [wave 2] million people in Poland were confirmed to be infected with the coronavirus.

How many NEW infections do you think will be confirmed in Poland within the next 12 months?
        [. . . .] **mln.** people

[P25] As of January 14th [wave 1]/February 27th [wave 2] of this year, approximately 32 [wave 1]/ 43 [wave 2] 000 people in Poland have died as a result of coronavirus infection.

How many people do you think will die from COVID in Poland within the next 12 months?
        [. . . .] **thousand** people

[mask] Do you wear a mask when walking down an uncrowded sidewalk?
        I never do
        I sometimes do
        I mostly do
        I do every time

[hands] [only wave 2] How often do you wash, disinfect your hands (compared to before the pandemic)?
        not more often than before the pandemic
        a little more often
        a lot more often

[P30] To what extent do you try to keep a physical distance from other people?
        [horizontal scale 1 - 10: 1 I do not try to keep my distance at all, 10 I try as much as possible]

[P28] Would you like to add a comment or supplement your above answer (e.g., the reason for the change in a given matter)?
> [rotate]
> no
> yes

[if yes]
[P29] Your comment:

Read the description below and then answer the related questions.

[conspiracy] Certain events, such as the COVID-19 pandemic, are subject to debate. Some people suggest that the official version of these events could be an attempt to hide the truth from the public. This official version could be covering up that these events were planned and covertly prepared by a secret alliance of influential people or organizations (for example, the secret service or the government). We are interested in your opinion on this subject.

To what extent do you agree or disagree with the following statements?

> [scale 1-7: 1 strongly disagree, 7 strongly agree]

> [rotate and register order]
> [r1] I think that official government information on COVID-19 is generally untrue.
> [r2] I think that government statistics on COVID-19 infections and deaths are deliberately falsified.
> [r3] I think that most of the recommendations related to COVID-19 have no rationale for pandemic containment and actually serve other purposes.

[P31] Are you or have you been infected with coronavirus?
> Yes, and this was confirmed by a test
> I think so
> I don't think so
> No

[if in P31: Yes, and this was confirmed by a test]
[P32] Have you been hospitalized due to coronavirus infection?
> no
> yes

[P33] Do you personally know anyone who has been infected with coronavirus?
> no
> yes

[if in P33: yes]
[P34] Have any of these people been hospitalized?
> no
> yes

We're changing the topic.

[M8] Which of the following terms best describes your household?
> We live very poorly – we don't have enough for our basic needs
> We live modestly – we have to manage economically every day
> We live on average – we have enough money for everyday living, but we have to save for major purchases

We live well – we can afford much without saving
We live very well – we can afford some luxury

[M9] How would you rate your overall health?
very bad
bad
average
good
very good

[M9_1] [only wave 2] To your knowledge, does your health and medical history indicate a particularly high risk of side effects after receiving the COVID-19 vaccination? Such risk factors include certain chronic diseases and allergies.
Yes, I have particular risk factors
No, I do not have any
Don't know

[M9_2] [only wave 2] To your knowledge, does your health and medical history indicate a particularly high risk of severe course of illness if infected with coronavirus? Such risk factors include, but are not limited to, certain chronic diseases, a weakened immune system, cancer, being overweight, diabetes, pregnancy, and smoking.
Yes, I have specific risk factors
No, I do not have any
Don't know

[M9_3] [only wave 2] Do you smoke cigarettes?
yes
no

[M9_3a] If yes, how many cigarettes on average do you smoke per day?

[M9_3b] If no, have you ever smoked cigarettes in your life?
yes
no

[M10] Which description fits you best?
Not a believer
Believer
Believing deeply

[M11] How often do you privately engage in religious activities, for example, prayer, Bible reading, etc.?
Less than once a year
Several times a year
Several times a month
Several times a week
Several times a day

[M12] What is your current employment status?
I work under an employment contract
I work under a contract of commission
I am working on a task-specific contract
I have my own business
Unemployed
Pensioner
Pupil or student

[M13] Did you participate in the Polish Parliament elections held on October 13th, 2019?
    no
    yes
    I don't remember

[if M13: yes]
[M14] Which political group did you vote for in the Polish parliamentary elections that took place on October 13th, 2019?
    [rotate]
    Prawo i Sprawiedliwość + Solidarna Polska + Porozumienie
    Koalicja Obywatelska (PO + Nowoczesna + Inicjatywa Polska + Zieloni)
    SLD + Wiosna Roberta Biedronia + Lewica Razem, czyli Partia Razem, Unia Pracy, RSS
    PSL + Kukiz 15
    Konfederacja (KORWiN + Ruch Narodowy)
    other (enter which one) [do not rotate]
    I don't remember [do not rotate]

[everyone]
[M15] Did you participate in the 1st round of the presidential election held on June 28th, 2020?
    [rotate]
    no
    yes
    I don't remember [do not rotate]

[if yes]
[M16] Who did you vote for in the 1st round of the presidential election held on June 28th, 2020?
    [rotate]
    Andrzej Duda
    Szymon Hołownia
    Władysław Kosiniak-Kamysz
    Krzysztof Bosak
    Rafał Trzaskowski
    Robert Biedroń
    Marek Jakubiak
    Paweł Tanajno
    Stanisław Żółtek
    Mirosław Piotrowski
    Waldemar Witkowski
    I don't remember [do not rotate]

[everyone]
[M17] Did you participate in the 2nd round of the presidential election on July 12th, 2020?
    [rotate]
    no
    yes
    I don't remember [do not rotate]

[if participated in the 2nd round]
[M18] Who did you vote for in the 2nd round of the presidential election held on July 12th, 2020?
    [rotate]
    Andrzej Duda

Rafał Trzaskowski
I don't remember [do not rotate]

[everyone]

[M19] Would you participate in Polish parliamentary elections if they were held this Sunday and participation in them was safe from the perspective of epidemic risk?

definitely not
probably not
probably yes
definitely yes
hard to say

[if rather or definitely yes]

[M20] For which political group would you vote if the elections to the Polish parliament were held this Sunday?

[rotate]
Prawo i Sprawiedliwość + Solidarna Polska + Porozumienie

Supplementary S2– Overview: categorization of open-ended questions
We seek further insight into respondents' decisions by analyzing their answers to our open-ended question – "why will you/will you not get vaccinated" and "who or what might change your mind?"; see Supplementary S3 for details of the classification procedure and Supplementary S4 for tables with the prevalence of each response category.

Overall, the most common concern is that of vaccine safety (32% of responses fit into this category), possibly because they have been insufficiently tested (15.9% of responses). It can also be noted that vaccine safety concerns only *grew* from Wave 1 to Wave 2, possibly because of the media reports of the cases of blood clotting disorder in AstraZeneca vaccine patients and consequent decisions of some governments to suspend administration. Such news was indeed most numerous immediately prior to and during Wave 2.

There are also sizable groups just saying no (15.7%) or reporting mistrust towards those producing, distributing, or recommending COVID-19 vaccines (11.5%). The fraction of choice justifications relating to conspiracy theories was relatively low overall (5.4%), even though, when asked explicitly, as many as an approximate 40 percent strongly agree (6 or 7 on a 0-7 scale) that official government information on COVID-19 is generally untrue, that government statistics on COVID-19 infections and deaths are deliberately falsified, and that most of the recommendations related to COVID-19 have no rationale for pandemic containment and actually serve other purposes. Interestingly (though perhaps unsurprisingly), those responses categorized as manifestations of conspiracy theories were nearly four times more prevalent among those saying "definitely not" than those saying they would "probably not" be vaccinated. Likewise, the fraction of those saying they oppose vaccines, in general, was very low (2.2%).

Given the concern about side effects, it is not surprising that among those opposing COVID-19 vaccines, the most common "constructive" responses to the question who or what could change their mind are those mentioning more evidence of safety (6.4%) or more information in general (5.8%) (for more details, see Table S2.2 in Supplementary S4). However, these figures are dwarfed by the prevalence of those unwilling to change one's opinion no matter what (51.7%). Unsurprisingly, this statement was much more common among those who will "definitely" not get vaccinated. Relatedly, when asked if they could change their opinion if the early phase of the vaccination campaign confirmed that the COVID vaccines are safe and effective, as much as 86% of vaccine-opposing respondents said no. Selected significant effects are illustrated in Figure S1.1.

Among respondents willing to get vaccinated, (for more information, see Table S2.3 in Supplementary S4), safety was also of paramount importance, but, obviously, they predominantly claimed that the vaccines will provide protection from the virus for themselves (65%) and/or their loved ones (16.7%). Other popular reasons were convenience of travel and similar concerns (12.3%) and a somewhat diffuse "return to normality" (8.2%). Not surprisingly, those concerned about safety, when asked what could change their mind (Table S2.4 in Supplementary S4), were relatively likely to mention vaccines side effects (these variables correlate at $r = .21$) but, again, overall prevalence even of this most common specific category (22.3%) was much lower than that of the "no-one"/"nothing" kind of responses (44.0%). Selected significant effects are illustrated in Figure S1.2.

Supplementary S3– Procedure: categorization of open-ended questions
The open-ended questions were categorized using the following procedure. Firstly, a number of categories were proposed based on the existing literature and a manual inspection of a sample from the first wave. Initially, the two raters manually categorized the responses of 200 randomly selected subjects, see Table S1.1.

Thus, according to (1), all but one of our kappas could be considered "almost perfect". Subsequently, the process of assigning the responses to categories was partly automated for the sake of efficiency and objectivity. Specifically, a number of keywords was proposed for each category for the question concerning the main reasons behind the decision ("why?") and the question as to who or what could change the respondent's decision ("who?"), see Supplementary S4. Whenever a keyword was found in the response, we initially assigned the response to the relevant category, allowing a response to belong to multiple categories. For example: category

conspiracy was associated with words (and its inflections) "lie, made up, no pandemics, no COVID, Gates, nonsense". If an algorithm found any of these words (or combinations of words), it classified such responses to the *conspiracy* category. The exact script is available at https://github.com/becarefulwithmath/COVID-classification-of-open-ended-questions. In such a way, our script classified answers to "why?" and "who?". It assigned a preliminary category to 3 716 answers to "why?" question; and to 4 784 answers to "who?" question.

This preliminary categorization was manually inspected by two independent raters and corrections were made if both raters sought them. This was the case for 2 652 initially categorized responses to "why?" and 1 814 of initially categorized responses to "who?" (but many of these changes involved correcting only one of the several categories identified automatically). Moreover, the two raters manually categorized the responses that were not assigned to any category (2 507 of responses to "why?" and 1 439 of responses to "who?"). Again, a response was assigned to a category if both raters agreed.

Supplementary S4– Detailed results: categorization of open-ended questions
This section contains detailed results of the categorization of open questions, meaning Table S2.1, Table S2.2, Table S2.3, and Table S2.4.

Supplementary S5– Additional tables for Wave 1
This section contains additional tables with regression results for Wave 1, in particular Table S3.1, Table S3.2, Table S3.3, and Table S3.4.

Supplementary S6– Additional tables for Wave 2
This section contains additional tables with regression results for Wave 2, in particular Table S4.1, Table S4.2, Table S4.3, and Table S4.4.

Supplementary S7– Summary of demographic characteristics, Wave 1 and Wave 2
This section contains a summary of demographic characteristics for Wave 1 and Wave 2 - Table S5.1
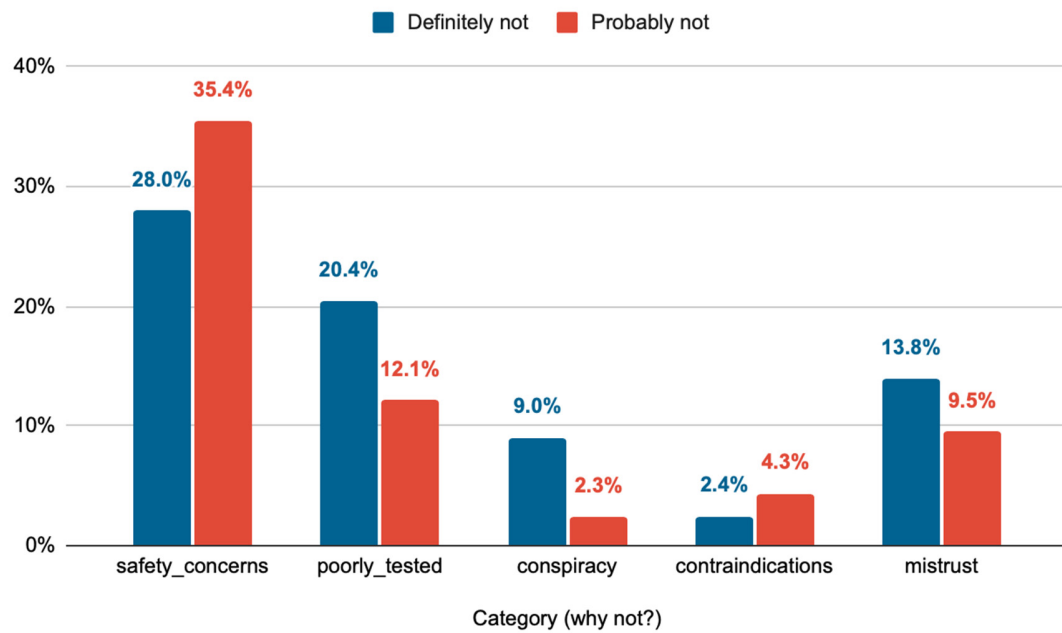

Figure S1.1: Prevalence of the response to the Why question belonging to different categories (definitely not and probably not); weighted average from both waves
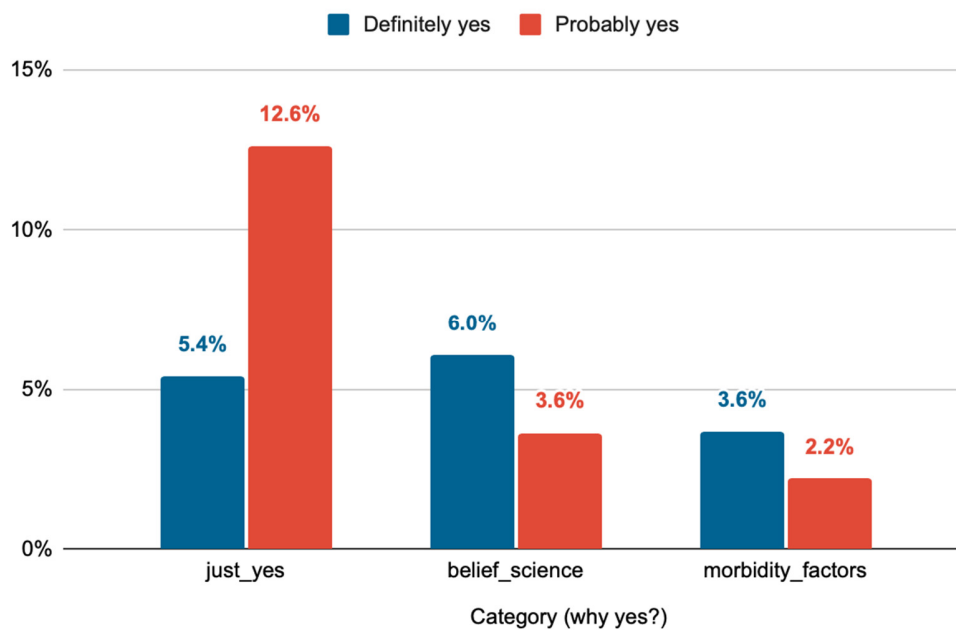

Figure S1.2: Prevalence of the response to the Why question belonging to different categories (definitely yes and probably yes); weighted average from both waves

Table S2.1: Categorized answers to: "Why will you not get vaccinated?"

		Will you get vaccinated?				
Why will you not get vaccinated?		definitely not		probably not		Average (weighed by N)
Classified as:	Examples:	wave 1	wave 2	wave 1	wave 2	
safety_concerns	Vaccine unsafe; afraid of complications/of side effects; it's risky; afraid for my health/life	26.4%	29.9%	31.1%	40.6%	32.0%
efficacy_concerns	Vaccine ineffective; I don't know if it will work	5.6%	5.7%	5.1%	7.8%	6.0%
poorly_tested	Poorly tested; lack of accountability by pharmaceutical companies; I will not be a guinea pig	21.4%	19.4%	10.5%	13.9%	15.9%
not_afraid_virus	Virus is not dangerous; I am strong; I don't get sick; I have a high immunity; I am young	10.0%	10.6%	8.2%	7.0%	8.9%
just_no	Just no; I don't want to	18.0%	10.6%	22.2%	9.7%	15.7%
vaccine_too_costly	Vaccine is too costly; I don't have that much money	4.6%	5.8%	5.9%	5.0%	5.4%
conspiracy	Something about conspiracy theories: Gates; 5G; I don't believe in pandemics/COVID/fairy tales	7.9%	10.3%	1.6%	3.2%	5.4%
contraindications	I have medical contraindications (chronic diseases, allergies, sensitivities, chemotherapy)	2.8%	2.0%	5.0%	3.5%	3.4%
antibodies	I've already been through this; I have antibodies	0.5%	1.6%	0.5%	2.4%	1.2%
doubts_no	I have doubts; I don't know what to think about COVID vaccines; I have many unanswered questions	0.9%	0.9%	2.3%	2.4%	1.7%
mistrust_no	I don't trust vaccines/pharmaceutical companies/the government/the media	12.9%	15.0%	7.2%	12.2%	11.5%
antivax	I do not vaccinate; I am against vaccines; vaccines are evil; vaccination is stupid	2.0%	2.6%	2.9%	2.2%	2.4%
	N	*632*	*529*	*745*	*628*	*2534*
Note: The numbers in Tables 6-9 may add up to more than 100% because some responses belong to more than one category						

Table S2.2: Categorized answers to: "Who or what might change your mind?"

		Will you get vaccinated?				
Who or what might change your mind?		definitely not		probably not		Average (weighed by N)
Classified as:	Examples:	wave 1	wave 2	wave 1	wave 2	
dont_know	I don't know	8.0%	4.7%	23.2%	13.9%	13.2%
nothing	No one; nothing; extreme (impossible) amounts of money; only me	63.7%	71.1%	35.3%	42.8%	51.7%
family	Close relationships, relatives, family; their health state; if they ended up in hospital	1.6%	2.1%	3.1%	4.8%	2.9%
doctor	Doctor	1.1%	0.4%	2.1%	2.8%	1.7%
else	Some other person/persons mentioned	0.9%	1.5%	2.0%	1.6%	1.5%
more_info	More information about the vaccine; more facts; more studies about the vaccine; better testing of a vaccine	4.1%	3.1%	6.6%	8.9%	5.8%
forced	Force; compulsion; punishment by imprisonment	3.5%	1.4%	3.1%	3.1%	2.8%
money	Money will convince me; if the vaccine is free; it depends on the price	2.8%	3.5%	2.6%	2.5%	2.8%
more_evidence _efficacy	More evidence of effectiveness	1.8%	1.5%	3.6%	3.7%	2.7%
more_evidence _safety	More evidence of safety	4.1%	4.6%	7.8%	8.5%	6.4%
time	I just might decide differently someday; time; years of testing; positive vaccination statistics	4.2%	4.0%	6.6%	4.0%	4.8%
	N	*632*	*529*	*745*	*628*	2534

Table S2.3: Categorized answers to: "Why will you get vaccinated?"

		Will you get vaccinated?				
Why will you get vaccinated?		definitely yes		probably yes		Average (weighed by N)
Classified as:	Examples:	wave 1	wave 2	wave 1	wave 2	
safety_general	Less risk; safety; security; more calm; peace of mind; for my own safety; covid is dangerous	60.0%	69.3%	47.3%	61.1%	65.0%
others_safety	For the safety of loved ones; for the safety of others	16.0%	18.8%	12.5%	14.8%	16.7%
normality	A return to normality; I want the pandemic to end; I want this situation to end	7.4%	9.6%	4.8%	6.9%	8.2%
just_yes	Because yes; more pros than cons; it's worth it	7.4%	3.1%	16.6%	8.7%	6.0%
belief_science	Because I believe in science; trust scientists	6.0%	6.1%	3.6%	3.7%	4.9%
no_alternatives	Because there are no alternatives; it is the only option	1.9%	1.7%	1.8%	0.9%	1.3%
morbidity_factors	Individual medical reasons for COVID to be risky (cancer, overweight, diabetes, pregnancy, I'm at risk)	4.9%	2.3%	2.6%	1.8%	2.0%
convenience	To travel; to have more privileges than those not vaccinated	10.6%	12.7%	11.1%	11.9%	12.3%
doubts_yes	I have doubts; I don't know what to think about COVID vaccines; I have many unanswered questions	0.0%	0.2%	2.7%	2.8%	1.5%
money	I don't want to pay; it should be free; I want to make money; I will get vaccinated but for free	0.8%	0.2%	0.7%	1.2%	0.7%
already_vac	Already vaccinated	1.0%	2.6%	0.1%	0.3%	1.4%
obligation	It is necessary; it should be done	1.7%	1.5%	0.9%	1.7%	1.6%
	N	*884*	797	*844*	860	3385

Table S2.4: Categorized answers to: "Who or what might change your mind?"

		Will you get vaccinated?				
Who or what might change your mind?		definitely yes		probably yes		Average
Classified as:	Examples:	Wave 1	Wave 2	Wave 1	Wave 2	(weighed by N)
dont_know	I don't know	8.2%	5.1%	17.4%	14.6%	11.4%
nothing	No one; nothing; only me	56.0%	54.4%	36.2%	29.7%	44.0%
family	The loved ones, relatives, family; their health state; if they ended up in hospital	2.1%	1.4%	3.3%	7.5%	3.6%
doctor	Doctor	3.1%	4.4%	1.7%	2.6%	2.9%
else	Some other person/persons mentioned	1.0%	1.3%	1.4%	1.3%	1.2%
more_info	New facts about the vaccine	3.7%	1.5%	3.2%	2.2%	2.7%
own_health	Illness; poor health; contraindications	1.5%	1.3%	1.0%	1.8%	1.4%
more_evidence _inefficacy	Evidence of ineffectiveness; negative vaccine test results	6.8%	8.1%	6.7%	10.4%	8.0%
side_effects	Side effects; high mortality; the vaccine will prove harmful	18.5%	21.9%	24.6%	24.1%	22.3%
	N	*884*	797	*844*	860	3385
