

Figure S1. Association of symptoms with duration of illness before presentation. Duration of illness before presentation is shown based on the presence or absence of each of the 14 symptoms. Figures are annotated with mean (standard deviation), and *p*-value (*t*-test).

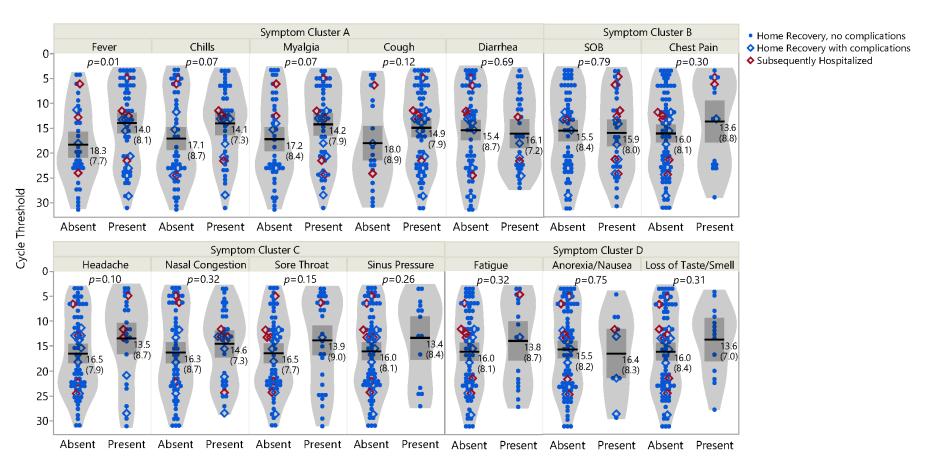

Figure S2. Association of symptoms with virus cycle threshold. Cycle threshold is shown based on the presence or absence of each of the 14 symptoms. Lower cycle threshold values indicate higher levels of viral nucleic acid. Figures are annotated with mean (standard deviation), and *p*-value (*t*-test).

 Table S1. Symptom Distribution in Patient Population based on Outcome.

	Home Recovery	Home Recovery	Subsequently	
	No Complications	With Complications	Hospitalized	P Value ¹
	(N = 153)	(N=13)	(N=14)	
Fever				0.36
$Mild^2$	58 (37.9%)	3 (23.1%)	6 (42.9%)	
Moderate-Severe	40 (26.1%)	7 (53.8%)	4 (28.6%)	
Chills	71 (46.4%)	7 (53.8%)	10 (71.4%)	0.19
Myalgia	82 (53.6%)	7 (53.8%)	7 (50.0%)	0.97
Cough	125 (81.7%)	12 (92.3%)	12 (85.7%)	0.77
Diarrhea	44 (28.8%)	4 (30.8%)	3 (21.4%)	0.89
Headache	49 (32.0%)	2 (15.4%)	6 (42.9%)	0.33
Nasal Congestion	55 (35.9%)	6 (46.2%)	6 (42.9%)	0.69
Sore Throat	54 (35.3%)	2 (15.4%)	2 (14.3%)	0.15
Sinus Pressure	22 (14.4%)	1 (7.7%)	1 (7.1%)	0.81
SOB	55 (35.9%)	8 (61.5%)	13 (92.9%)	<0.0001
Chest Pain	26 (17.0%)	1 (7.7%)	2 (14.3%)	0.91
Fatigue	27 (17.6%)	1 (7.7%)	6 (42.9%)	0.05
Anorexia/Nausea	10 (6.5%)	3 (23.1%)	2 (14.3%)	0.05
Loss of Taste/Smell	22 (14.4%)	0 (0.0%)	0 (0.0%)	0.17

¹Chi-square or Two-Sided Fisher's Exact where symptom occurrence was low, ²Temperature < 101° F
