Optimizing Sputter Deposition Conditions of Silver Thin Films Used in Low-Emissivity Coatings in an In-line Deposition System

Clàudia Campos, Natalia Herguedas and Enrique Carretero *

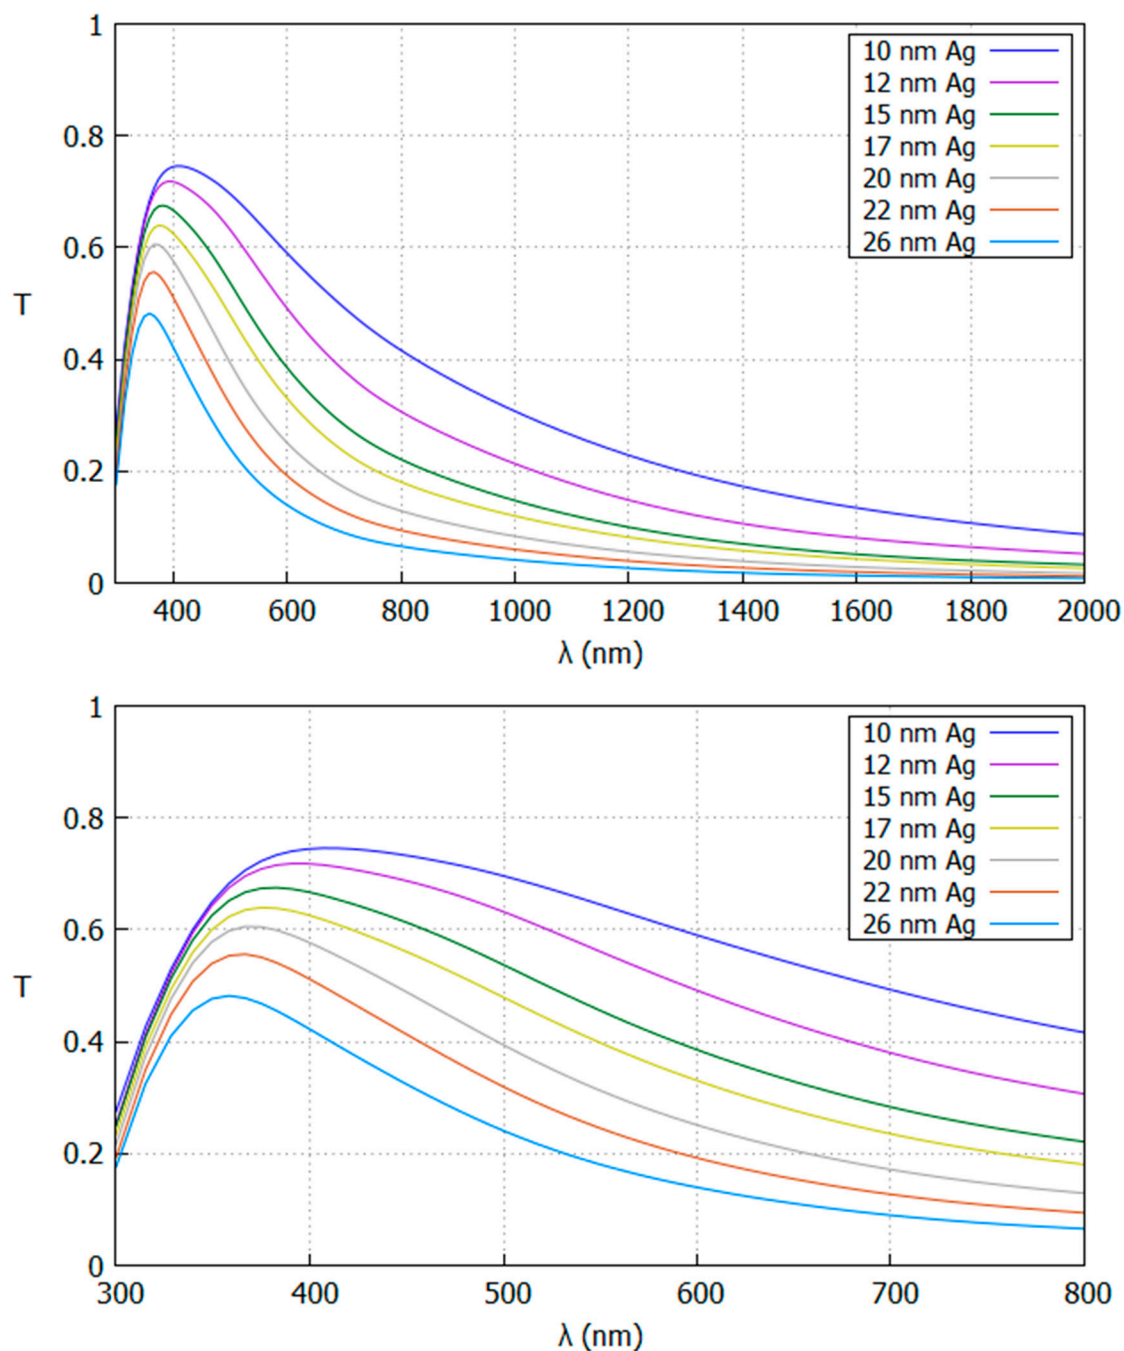

Figure S1: Transmittance spectrum of the AZO (10 nm)/Ag/AZO (10 nm) multilayer for different silver layer thicknesses deposited at 200 W and 300 sccm: between 300 and 2000 nm (top) and between 300 and 800 nm (bottom).
