

# Respiratory Colonization and Short-Term Temporal Changes in the Urinary Metabolome of Children

## Supplementary Materials:

**Figure S1. Stick Plots of Changes by Metabolite.** Comparison of time points (x-axis) and log concentration of each metabolite (y-axis) identified from 122 healthy children (metabolites are ordered from most statistically significant changes to least statistically significant change). Each line represents an individual subject and their corresponding time points.

**Table S1. Geometric mean and standard deviation of individual metabolites at each time point.**

Metabolite	Time Point (Mean, Standard Deviation)			P-Value*	Adjusted P-value**
