| This is a dissimilarity matrix |  |  |  |  |  |  |  |  |  |  |  |  |

Figure 1. Scree plot based on PROXSCAL MDS for ordinal data, based on the $12 \times 12$ co-occurrence matrix, indicating a two-dimensional configuration.

Table S2. Goodness of Fit for a two-dimensional MDS configuration, based on a $12 \times 12$ co-occurrence matrix.

| Stress and Fit Measures |  |
| :---: | :---: |
| Normalized Raw Stress | , 00604 |
| Stress-I | , $07770^{\mathrm{a}}$ |
| Stress-II | , $16993^{\mathrm{a}}$ |
| S-Stress | , $01483^{\mathrm{b}}$ |
| Dispersion Accounted For <br> (D.A.F.) | , 99396 |
| Tucker's Coefficient of <br> Congruence | , 99698 |

PROXSCAL minimizes Normalized Raw Stress.
a. Optimal scaling factor $=1,006$.
b. Optimal scaling factor $=, 997$.

Table S3. Coordinates for Common Space by applying a two-dimensional MDS configuration, based on a 12x12 co-occurrence matrix.

| Final Coordinates |  |  |
| :---: | :---: | :---: |
|  | Dimension |  |
|  | 1 | 2 |
| Circle | ,- 199 | , 436 |
| One_point_circle | ,- 107 | , 629 |
| Semicircle_small | ,- 240 | , 682 |
| Semicircle_big | ,- 328 | , 696 |
| Triangle | ,- 342 | ,- 511 |
| Square | ,- 554 | ,- 425 |
| Pentagon | ,- 452 | ,- 567 |
| Ocatogon | ,- 458 | ,- 467 |
| Star_4 | , 733 | ,- 136 |
| Star_5 | , 682 | ,- 176 |
| Star_8 | , 688 | ,- 186 |
| Star_spiked | , 578 | , 024 |

Table S4. Excerpt of the inductive category formation process and coding results of coder 1 (translated from German). Coding scheme: C - Cartographic associations, O - Object associations, E - Evaluative-Affective responses (valence, dominance, arousal), H - (visual) Hierarchy, S - (visual) Symbiosis/Containment, F Figurative description.

| ID | Group | Condensation of the retrospective <br> verbalizations - task 2 | Transcriptions of (hand <br> written) free-labeling - task 3 | Coding - <br> task 2 \& 3 | Category |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Table S5. Cross-tabulation of female versus male responses of the three strategies identified, based on results of coder 1 ( $\mathrm{n}=19$ females, $\mathrm{n}=19$ males).

## Counts of female versus male responses of codes (labels) based on coder 1 Cross-tabulation

Codes (labels) and categories assigned based on coder 1

|  | visual |  |  | associative |  | affective | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | figurative | symbiosis | hierarchy | cartography | object | evaluation |  |
| female / male $\frac{\mathrm{f}}{\mathrm{m}}$ | 55 | 1 | 10 | 6 | 11 | 19 | 102 |
|  | 52 | 2 | 12 | 17 | 18 | 19 | 120 |
| Total | 107 | 3 | 22 | 23 | 29 | 38 | 222 |
| Total by strategy | 132 |  |  | 52 |  | 38 |  |
