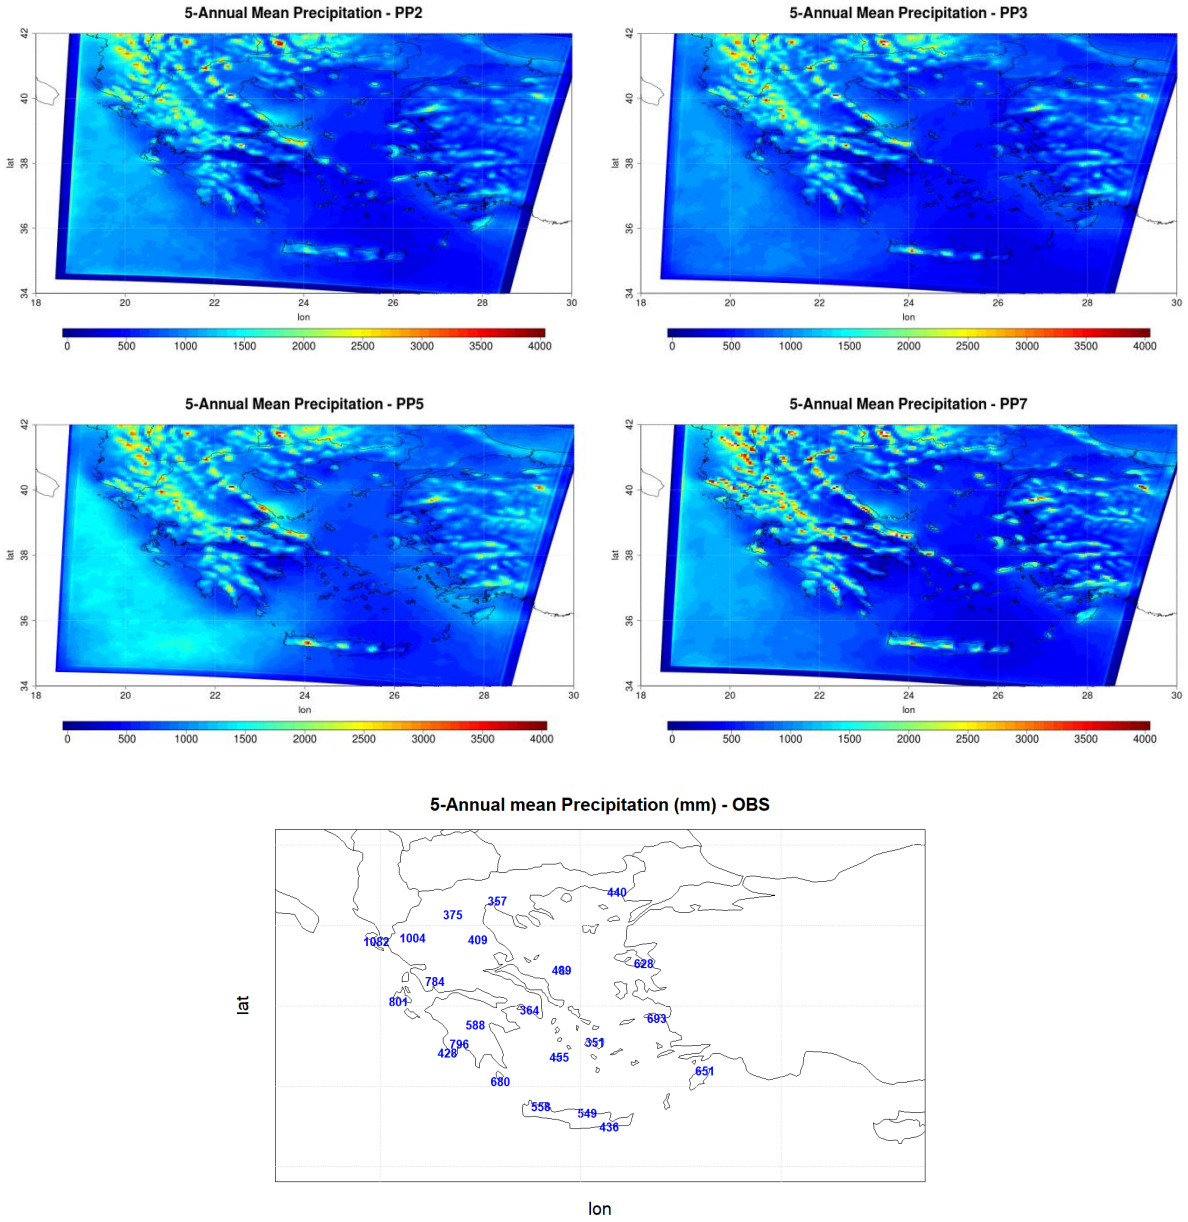

Figure S1. WRF Spatial distribution of the annual precipitation (in mm) for the 5-km resolution of the region of Greece (D02), for the selected period 2000-2004.

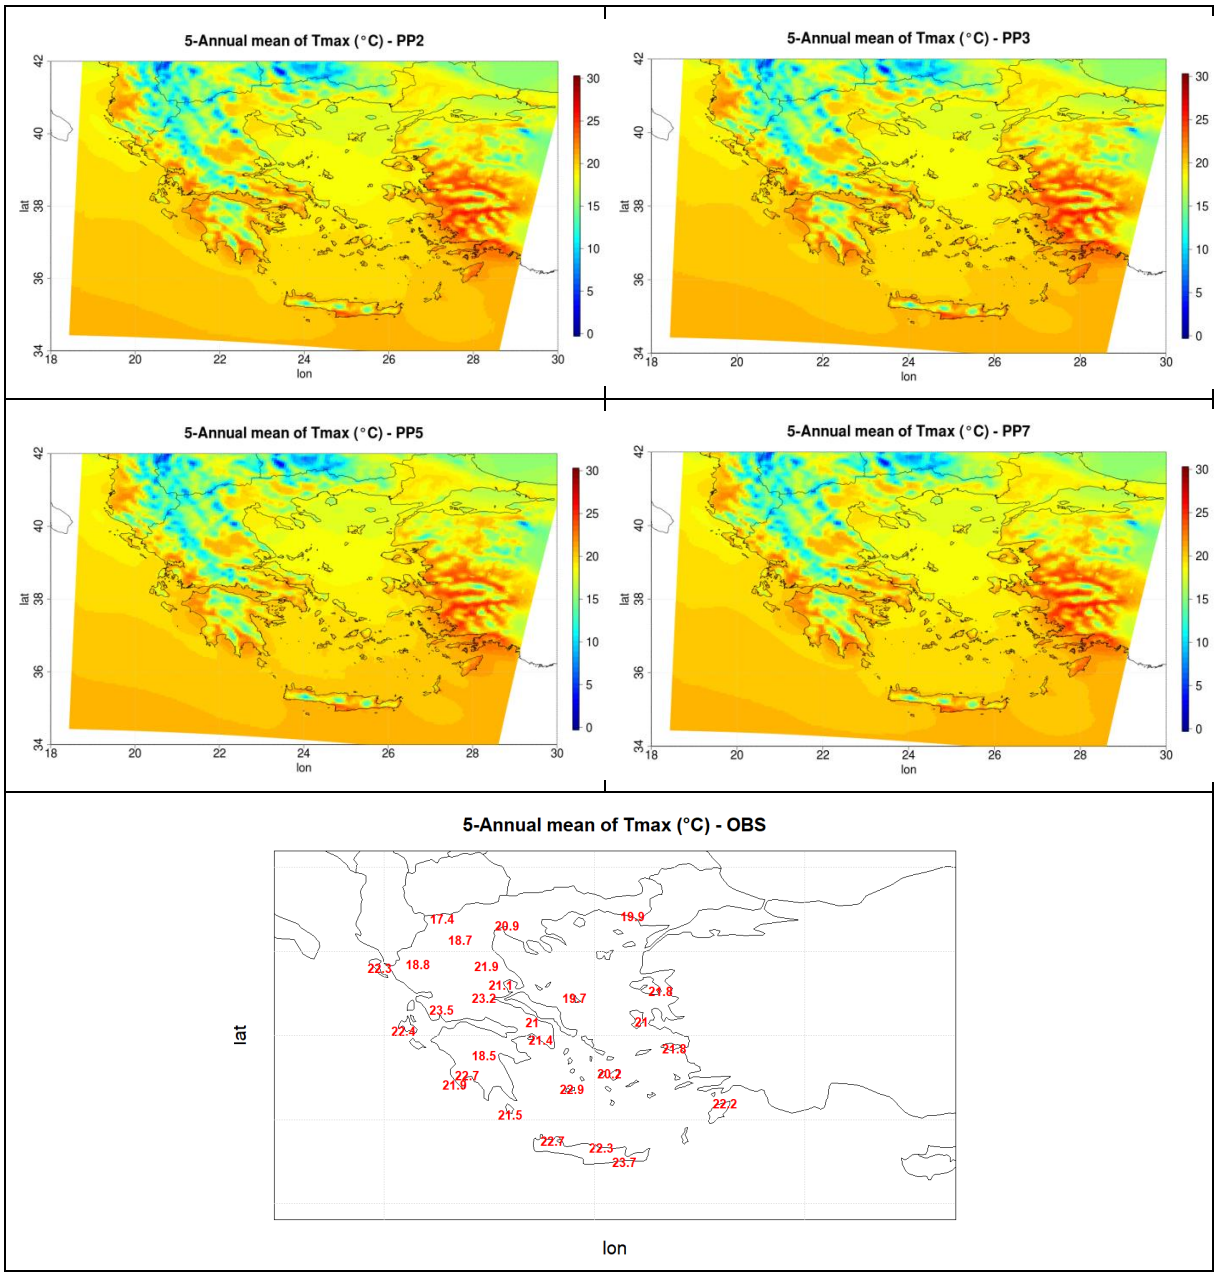

Figure S2. Spatial distribution of 5-annual mean maximum temperature (TX) for the 5-km region of Greece (D02), for the selected period 2000-2004.

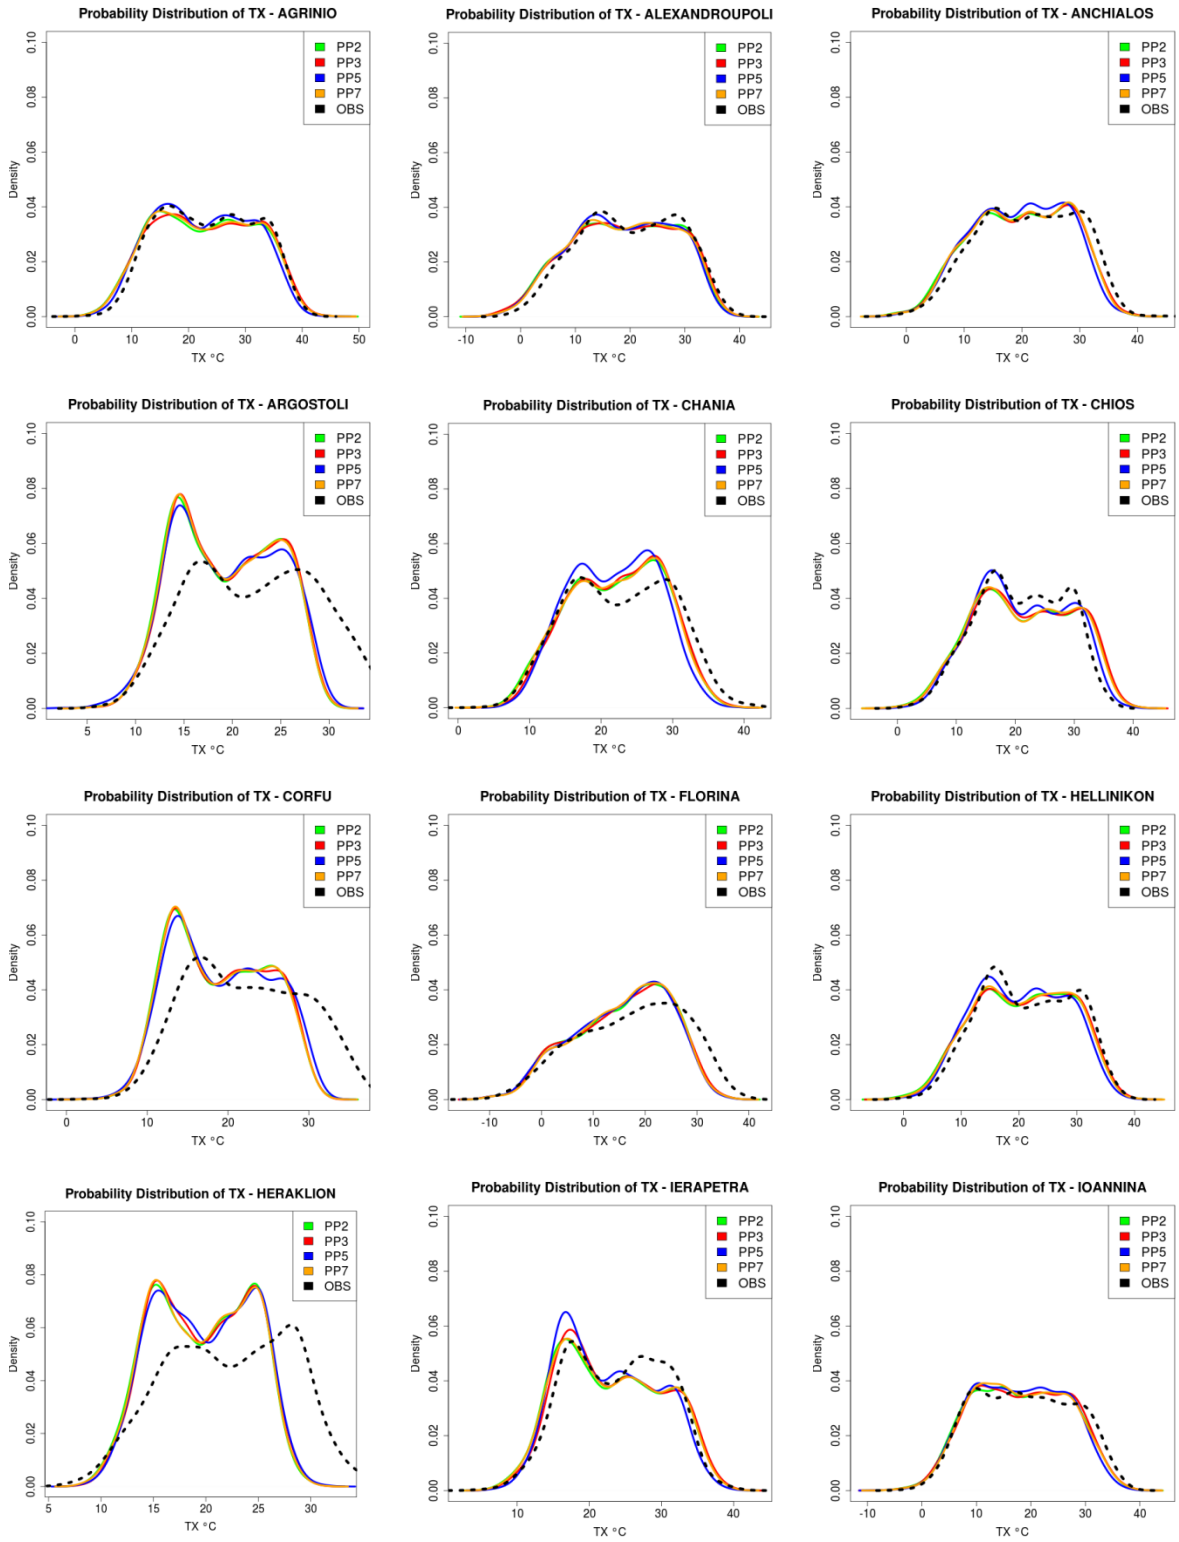

Probability Distribution of TX - AGRINIO
Probability Distribution of TX - ALEXANDROUPOLI
Probability Distribution of TX - ANCHIALOS
Probability Distribution of TX - ARGOSTOLI
Probability Distribution of TX - CHANIA
Probability Distribution of TX - CHIOS
Probability Distribution of TX - CORFU
Probability Distribution of TX - FLORINA
Probability Distribution of TX - HELLINIKON
Probability Distribution of TX - HERAKLION
Probability Distribution of TX - IERAPETRA
Probability Distribution of TX - IOANNINA

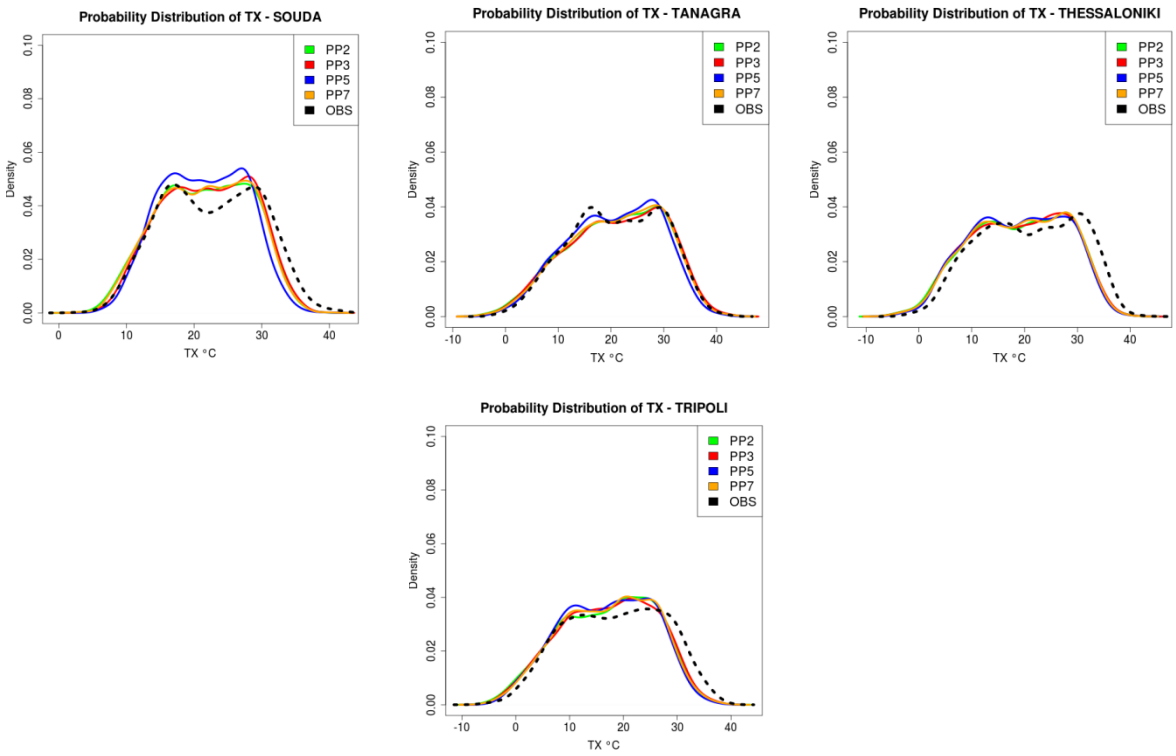

Figure S3. Comparison of the observed maximum temperatures by weather station and the four simulated results in terms of probability distributions. The dashed line indicates the probability distribution of the observations.

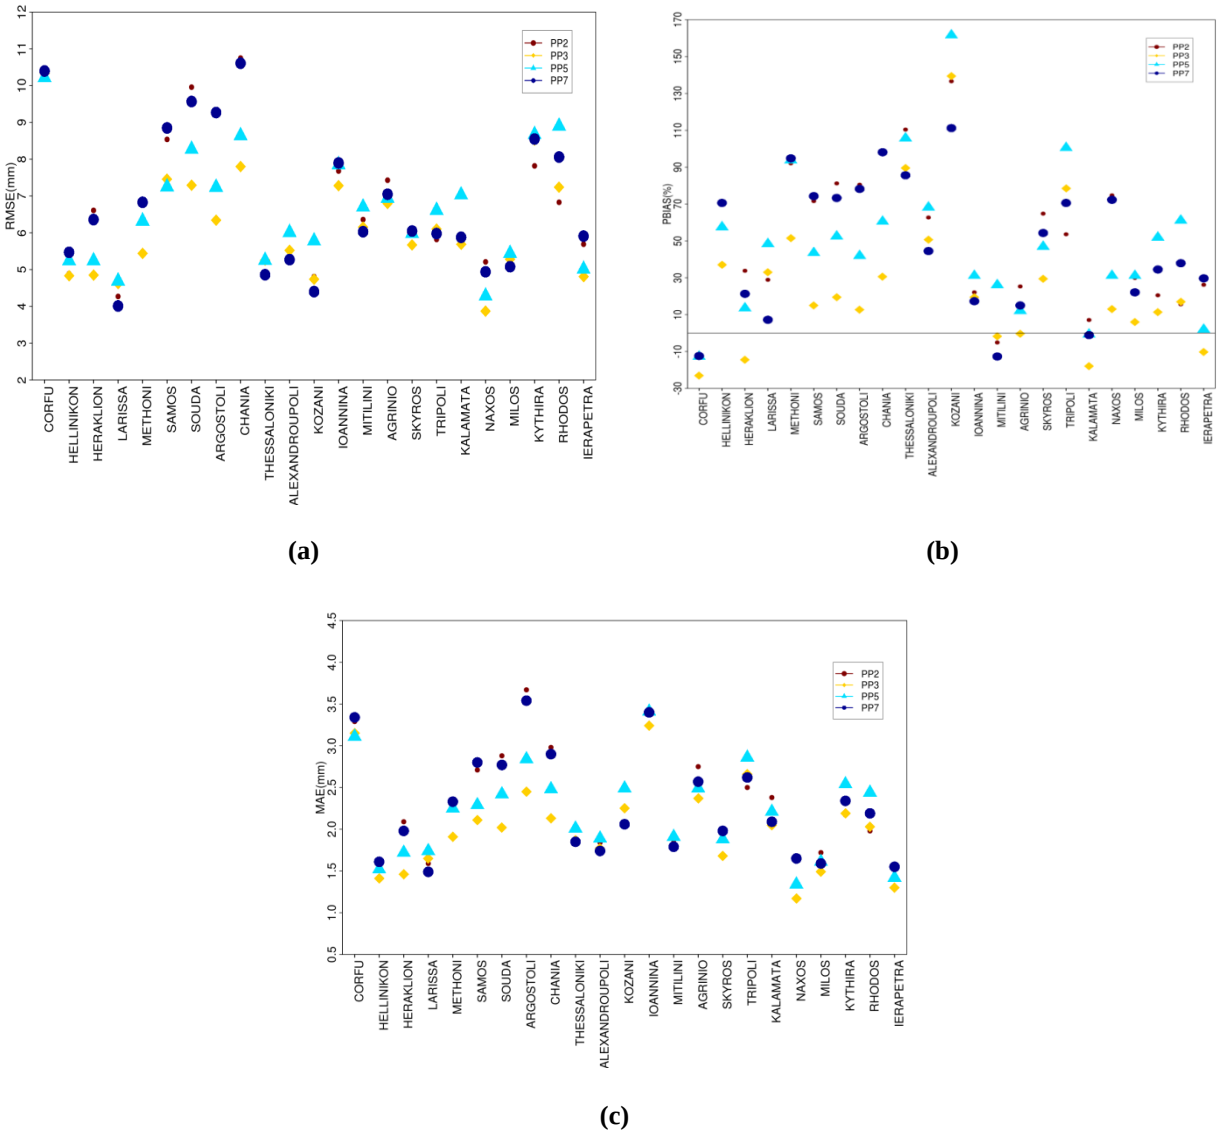

Figure S4. (**a**) Root mean square error, (**b**) pbias and (**c**) correlation coefficient of precipitation (RR) per HNMS station, for the four different physics parameterisations schemes (PP2, PP3, PP5, PP7) for 2000-2004.
