

Supplementary Figure S1. Lack of effect of PLA₂ and autotaxin inhibitors on PA-stimulated A549 lung cancer cell migration. Cells were preincubated for 90 min with or without the specific cPLA₂ inhibitors AACOCF₃ (20 μ M), PACOCF₃ (20 μ M) and pyrrolidine (1 μ M), or with the autotaxin inhibitors PF8380 (300 nM) and HA130 (300 nM) as indicated, before stimulation with PA (10 μ M) and cell migration was measured as detailed in Materials and Methods. Data are expressed relative to the control value and are given as the mean \pm SD of 3 independent experiments performed in duplicate.
