We would like to report an error in a previously published paper [1]. The details are as follows: Please note that Figure 1 contains a mistake, as we erroneously indicate p105/p52 instead of p105/p50, and p100/p50 instead of p100/p52.

Please replace this figure:

with the following:

Figure 1. DNA-binding subunits of NF- κ B. The functional domains of the five DNA-binding subunits, including the leucine zipper (LZ), the glycine-rich region (GRR), and the death domain (DD) are shown. The number of amino acids is provided for human proteins.

These changes have no material impact on the conclusions of our paper. The authors would like to apologize for any inconvenience caused to the readers by these changes.

Conflicts of Interest: The authors declare no conflict of interest.
