

Supplementary Materials: Hydrogen-Bonding Assembly of Coordination Polymers Showing Reversible Dynamic Solid-State Structural Transformations

Hitoshi Kumagai, Sadahiro Yagishita, Ken Kanazashi, Mariko Ishii, Shinya Hayami, Hisashi Konaka, Ryuta Ishikawa and Satoshi Kawata

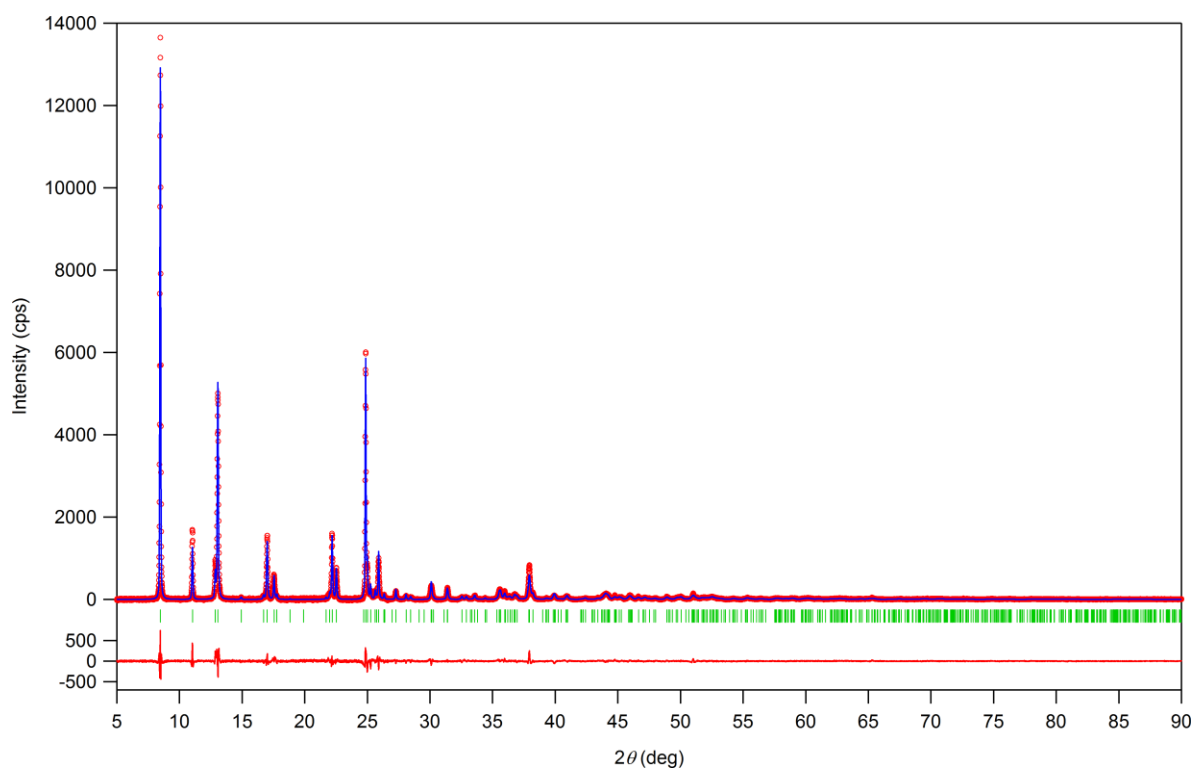

Figure S1. Rietveld refinement of PXRD pattern of **2·2H₂O**. Red open circles, green bars, and blue and red solid lines represent the experimental pattern, the best-fitted pattern, the calculated Bragg reflection the difference between experimental and fitted patterns, respectively. The determined lattice parameters are described in the text.
