

Supplementary File S3.
Data extraction components

Identification:

Study details:

Sponsorship Source

Country

Setting

Comments

Authors contact details:

Author's name

Email

Additional identification data:

Authors' conflict of interest declarations

Protocol or trial registry entry

Methods:

Unit of randomization:

Individual

Cluster

Additional methods data:

Date of study

Ethics approval

Follow-up after the treatment period

Method of diagnosis

Sample size calculation

Treatment duration

Population:

Inclusion criteria:

Exclusion criteria:

Group differences:

Additional population data:

Total number of participants randomised

Number of participants randomised per group

Total number of participants completed study

Total number of participants completed experimental group

Total number of participants completed control group

Number of participants lost to follow up in experimental group

Number of participants lost to follow up in control group

Number of participants withdraw from experimental group

Number of participants withdraw from control group

Baseline characteristics:

Characteristics	Experimental intervention	Control intervention	Overall
Gender			
Age			
Type of Ulcer			
Level of Pain experienced			
Duration of Healing			
Frequency of Recurrence			
Adverse effects			
Quality of life			

Interventions:

Characteristics	Experimental intervention	Control intervention
Type of intervention		
Dose		
Route of administration		
Duration		
Frequency		
Concomitant treatment		

Outcomes after intervention:

Characteristics	Experimental intervention	Control intervention	Overall
Type of Ulcer			
Level of Pain experienced			
Duration of Healing			
Frequency of Recurrence			
Adverse effects			
Quality of life			

Outcome measures:

	Experimental intervention	Control intervention
