

Supplementary Table 1. Defined sensory deficits based on quality characteristics of cultivated mushroom species.

Quality characteristic	Sensory deficits				Grades – quality score ^a
	Mushroom batch	Cap	Stem	Gills	
Appearance and colour in raw and non-processed state	mineral impurities organic impurities maggot damage overripe	discolouration surface moist/sticky brown spots yellow spots mould	discolouration surface moist/sticky brown spots yellow spots	discolouration sticky macerated	1 – 5
Consistency and texture	soft external moisture dry	soft floury spongy	diminished elasticity rubbery fibrous		1 – 5
Consistency and texture after cooking	rubbery tough fibrous				1 – 5
Aroma	loss of typical aroma old foreign	musty putrid phenolic			1 – 5
Taste after cooking	loss of typical taste bitter astringent sweet				1 – 5

Supplementary Table 2. Description of isolates detected in oyster, king oyster and shiitake mushrooms at initial status and after storage.

Strain-ID	Isolation-Source	Origin	Producer	n	Group	Description
