

# Supplementary Materials: The Residential Population Generator (RPGen): Parameterization of Residential, Demographic, and Physiological Data to Model Intraindividual Exposure, Dose, and Risk

Alexander East, Daniel Dawson, Graham Glen, Kristin Isaacs, Kathie Dionisio, Paul S. Price, Elaine A. Cohen Hubal and Daniel A. Vallero

The code and documentation used in this analysis is available at <https://github.com/orgs/HumanExposure/repositories>. In addition to other modules, this repository contains project files and scripts for RPGen, the Product Use Scheduler (PUS), and Source-to-Dose (S2D), which are the components of the Combined Human Exposure Model (CHEM), in addition to the high-throughput version of the Stochastic Human Exposure Model (SHEDS-HT).

**Figure S1.** Four Chemicals not used as principal case example for application of RPGen: Benzyl Butyl Pthalate, Dibutyl Pthalate, Diethylene Glycol, Naphthalene daily intakes compared to SHEDS-HT.

In the 1000 individual RPGen population used in this analysis, the four chemicals in Figure 1 were ran through CHEM in addition to toluene. However, these chemicals were

omitted due to relatively infrequent exposure counts in CHEM. Table 1 shows the percentage of individuals exposed to each chemical in Figure 1. Exposure occurred more frequently in SHEDS-HT than CHEM across all subsets. Toluene was selected for the case study given the relatively high exposure frequencies of 69.5%, considering only homeowner product use categories (PUCS), 78.5% among owners, and 36.4% among non-owners. Given the high count of non-exposures, the boxplots in Figure 1 are potentially misleading, as few exposures for naphthalene, diethylene glycol, dibutyl phthalate, and benzyl butyl phthalate create the boxplots. “zeros” are not represented, causing distributions orders of magnitude higher than SHEDS-HT. Whereas over 5000 simulated exposures are used to create the SHEDS-HT distributions, as few as 17 are used to create the CHEM distributions. Summary statistics for each model subset output is provided in Table 2 below.

**Table S1.** Percentage of Individuals Exposed Across Exposure Model Scenario (Subset).

Name	Subset	Exposed	Houses	% Exposed
Diethylene glycol	SHEDS-HT	9998	10000	99.98%
Toluene	SHEDS-HT	9437	10000	94.4%
Naphthalene	SHEDS-HT	5512	10000	55.1%
Dibutyl phthalate	SHEDS-HT	5227	10000	52.3%
Benzyl butyl phthalate	SHEDS-HT	5170	10000	51.7%
Toluene	Homeowner PUCS Only	458	659	69.5%
Benzyl butyl phthalate	Homeowner PUCS Only	17	659	2.6%
Naphthalene	Homeowner PUCS Only	17	659	2.6%
Diethylene glycol	Homeowner PUCS Only	16	659	2.4%
Dibutyl phthalate	Homeowner PUCS Only	1	659	0.2%
Toluene	CHEM Owners	517	659	78.5%
Diethylene glycol	CHEM Owners	266	659	40.4%
Naphthalene	CHEM Owners	83	659	12.6%
Dibutyl phthalate	CHEM Owners	54	659	8.2%
Benzyl butyl phthalate	CHEM Owners	32	659	4.9%
Diethylene glycol	CHEM Non Owners	124	341	36.4%
Toluene	CHEM Non Owners	102	341	29.9%
Naphthalene	CHEM Non Owners	40	341	11.7%
Dibutyl phthalate	CHEM Non Owners	28	341	8.2%
Benzyl butyl phthalate	CHEM Non Owners	17	341	5.0%

**Table S2.** Summaries of Daily Intake (mg/kg-bw/day) across Exposure Model Scenario (Subset).

Name	Subset	Mean	Median	95th Percentile
Benzyl butyl phthalate	SHEDS-HT	0.0000922	0.000000331	0.000264
Dibutyl phthalate	SHEDS-HT	0.000103	0.000000224	0.000166
Diethylene glycol	SHEDS-HT	0.00138	0.0000303	0.00327
Naphthalene	SHEDS-HT	0.0000191	7.5E-09	0.0000568
Toluene	SHEDS-HT	0.0233	0.000087	0.0147
Dibutyl phthalate	Homeowner PUCS Only	0.000144	0	0
Benzyl butyl phthalate	Homeowner PUCS Only	0.000609	0	0
Toluene	Homeowner PUCS Only	0.0626	0.00441	0.353
Diethylene glycol	Homeowner PUCS Only	0.000384	0	0
Naphthalene	Homeowner PUCS Only	0.00000829	0	0
Dibutyl phthalate	CHEM Owners	0.0265	0	0.152
Benzyl butyl phthalate	CHEM Owners	0.00221	0	0
Toluene	CHEM Owners	0.0671	0.00585	0.375
Diethylene glycol	CHEM Owners	0.00104	0	0.00337
Naphthalene	CHEM Owners	0.0000169	0	0.0000842
Dibutyl phthalate	CHEM Non-owners	0.0439	0	0.244

Benzyl butyl phthalate	CHEM Non-owners	0.00498	0	0
Toluene	CHEM Non-owners	0.00406	0	0.0139
Diethylene glycol	CHEM Non-owners	0.000457	0	0.00182
Naphthalene	CHEM Non-owners	0.000013	0	0.0000999

Toluene was selected given the prevalence of the chemical in products associated with home ownership. In CHEM, the likelihood of exposure is a function of the probability of being assigned a product use category times the probability of a product being selected which contains the chemical of interest. Therefore, CHEM is best used for chemicals occurring in many products and product use categories. A composition of Product Use Category Identifiers (PUCIDs) with regards to case example chemicals and home ownership classification is presented in Table 3 below. Table 4 provides counts of the number of PUCS and products containing each chemical.

**Table S3.** Counts of Chemicals, Products, Case Example Chemicals, and Ownership Status by PUCID in CHEM.

PUCID	Total Chemicals	Total Products	Description	Case Example Chemicals	Homeownership
CP.0100.010.099.F	139	128	air freshener, air freshener NOC	Toluene	No
