

Supplement of

How Reliable Are Global Temperature Reconstructions of the Common Era?

Sebastian Lüning ¹, Philipp Lengsfeld ²

This Supplement contains additional comparison of the studied T2k series. Full, uniform display of all discussed reconstructions, except AR1-1990 (including simple descriptive statistical numbers from graphic program Origin). Modern instrumental data displayed in original manuscripts are not included, in order to not mix up different data types.

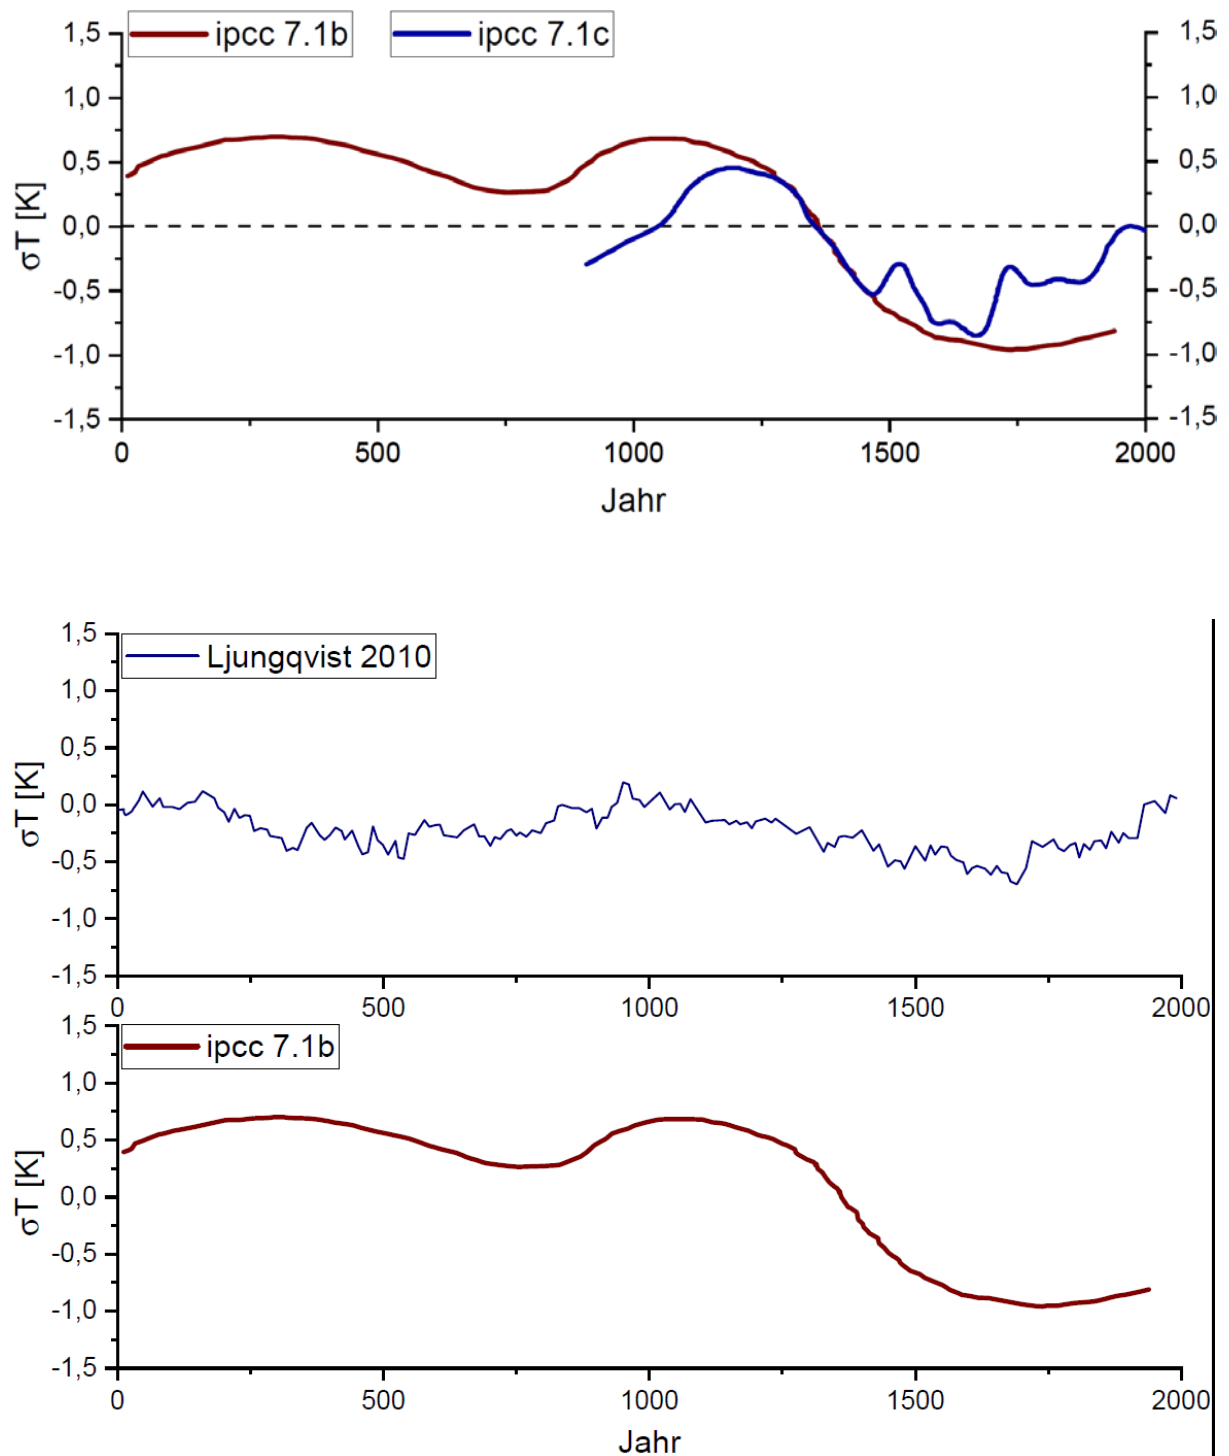

Figure S1. additional comparisons.
