

Supplementary Information

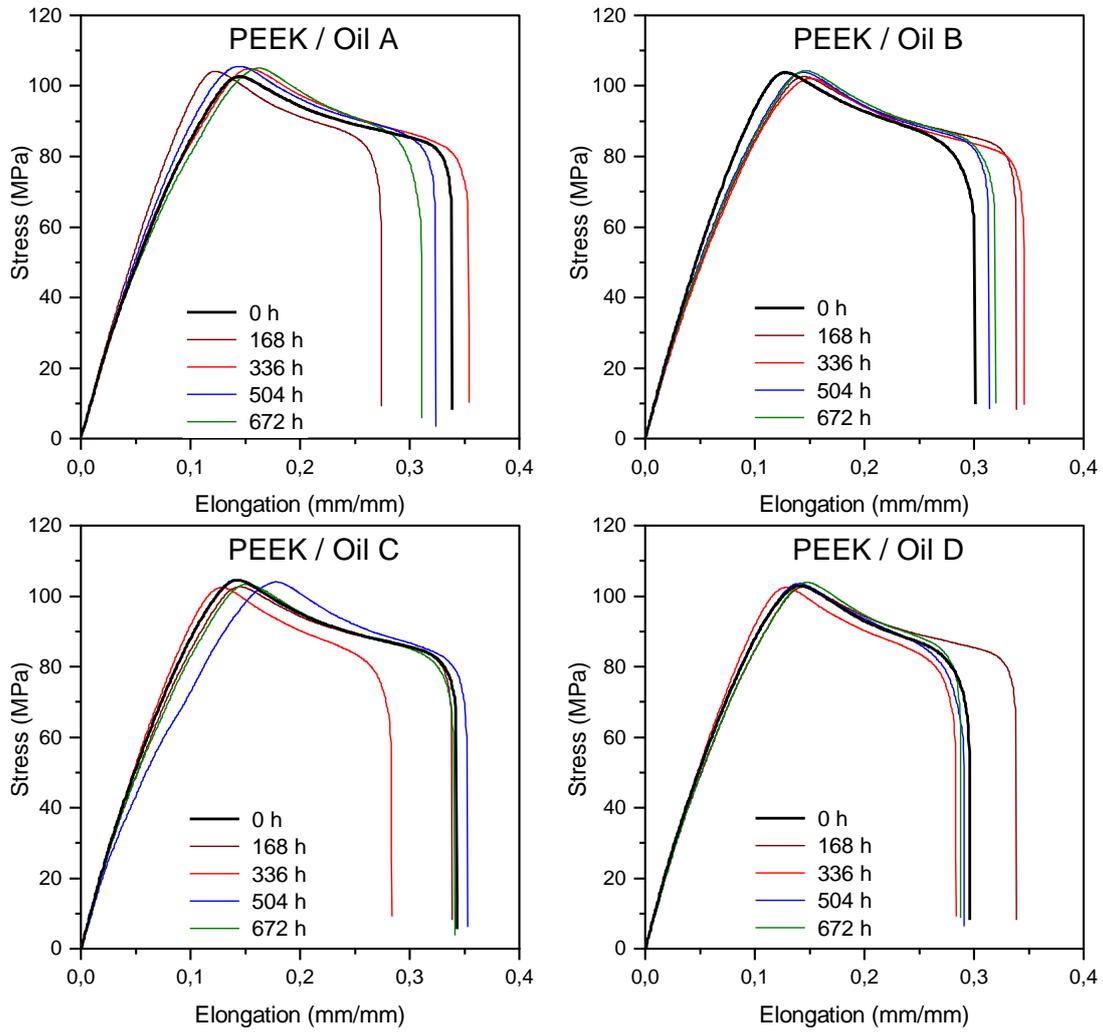

Figure S1. Tensile strength and elongation at break of the PEEK (fresh and after 168, 336, 504 and 672 h of ageing in the ATFs).

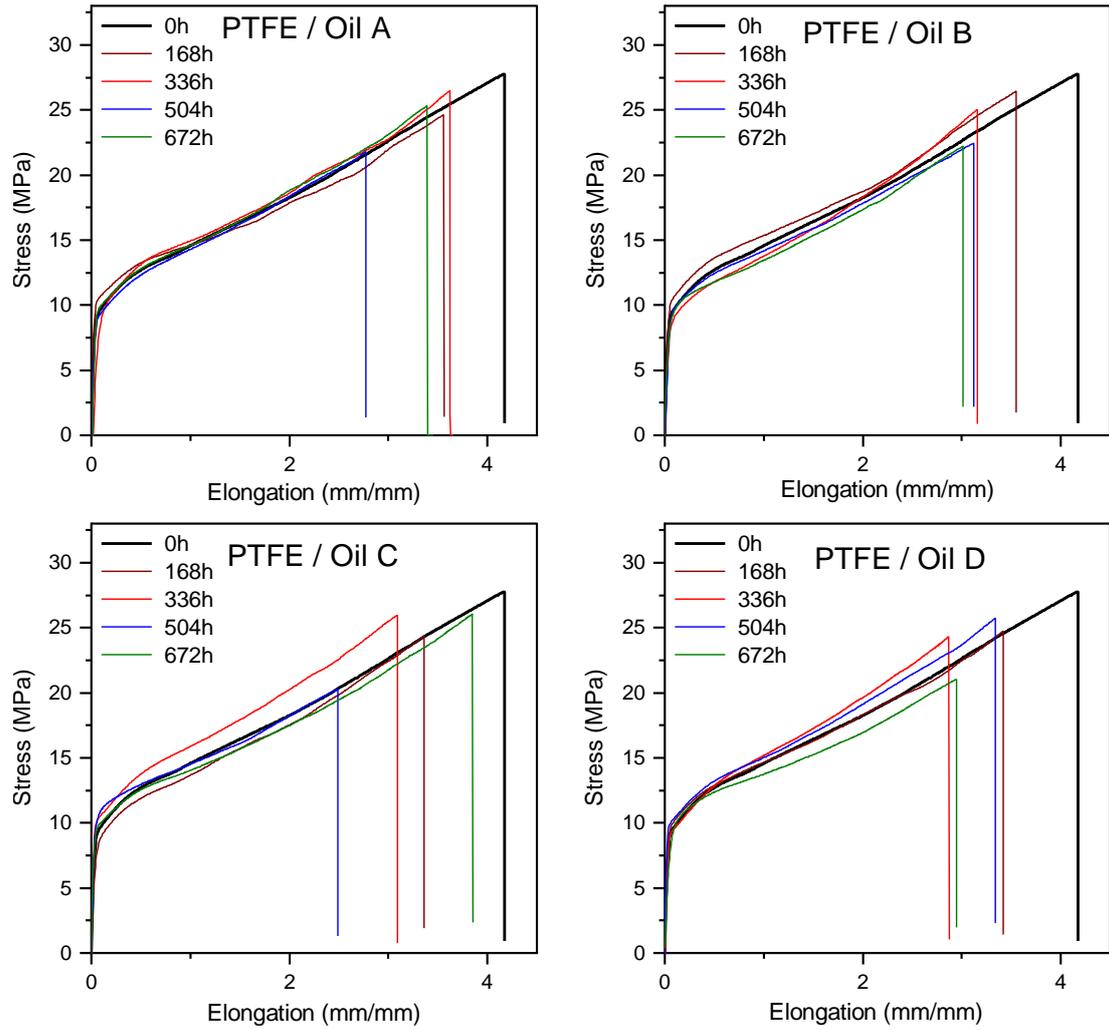

Figure S2. Tensile strength and elongation at break of the PTFE (fresh and after 168, 336, 504 and 672 h of ageing in the ATFs).

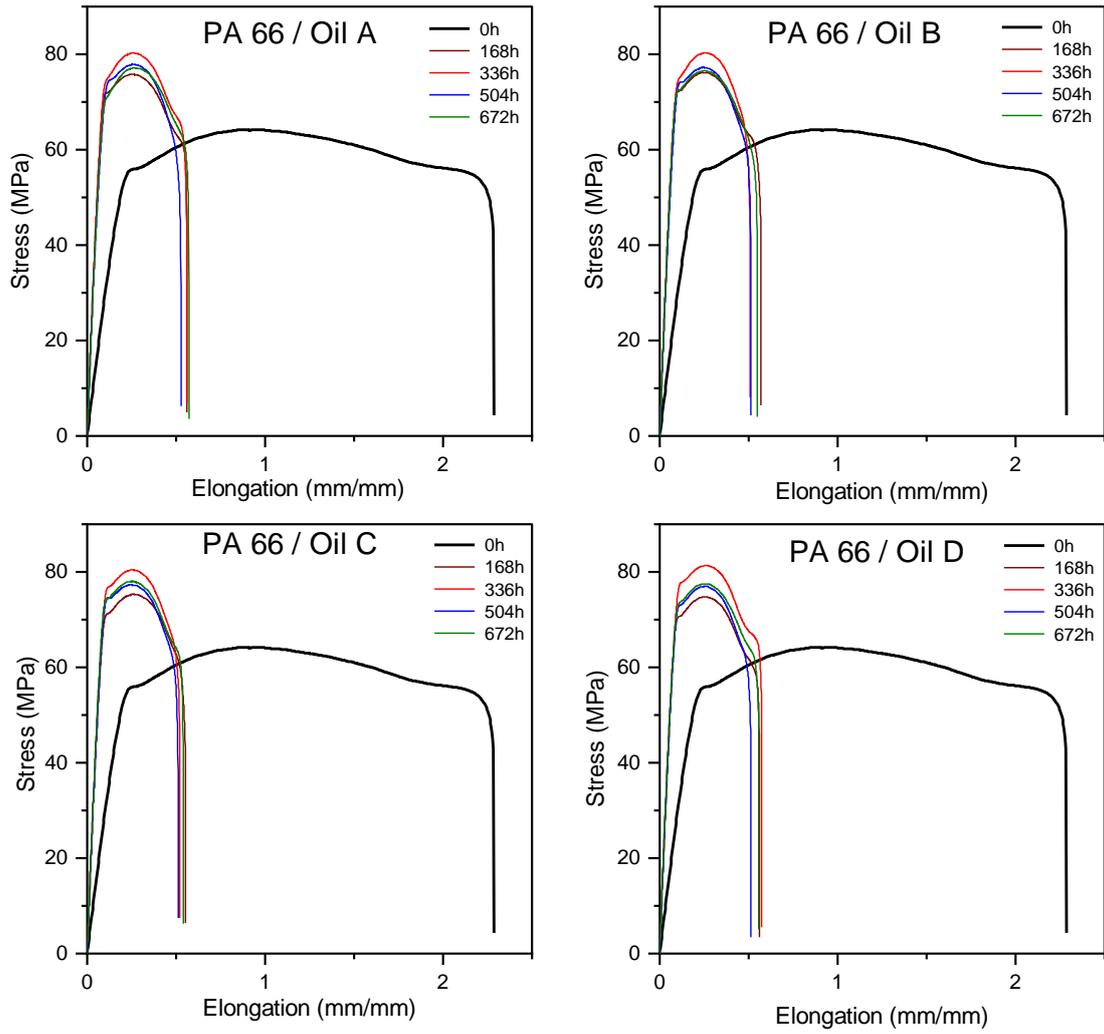

Figure S3. Tensile strength and elongation at break of the PA 66 (fresh and after 168, 336, 504 and 672 h of ageing in the ATFs).

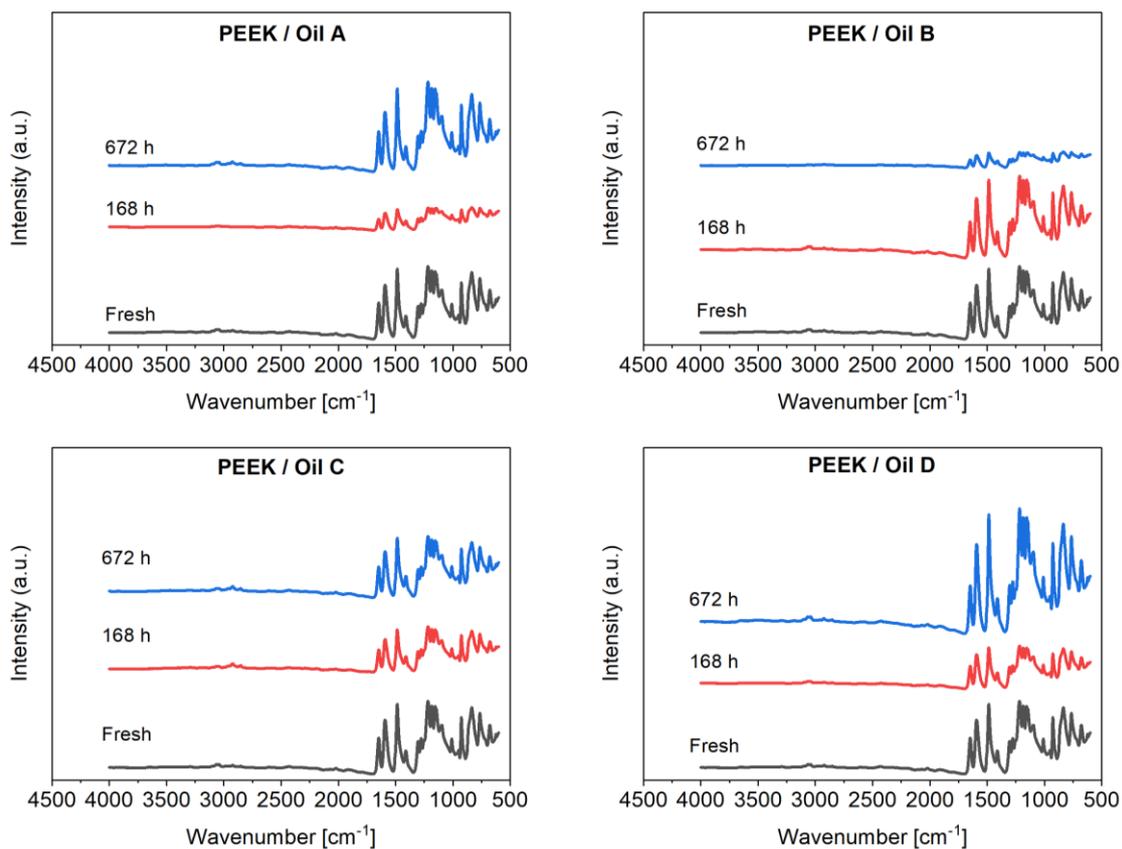

Figure S4. FTIR spectra of the PEEK (fresh and after 168 and 672 h of ageing in the ATFs).

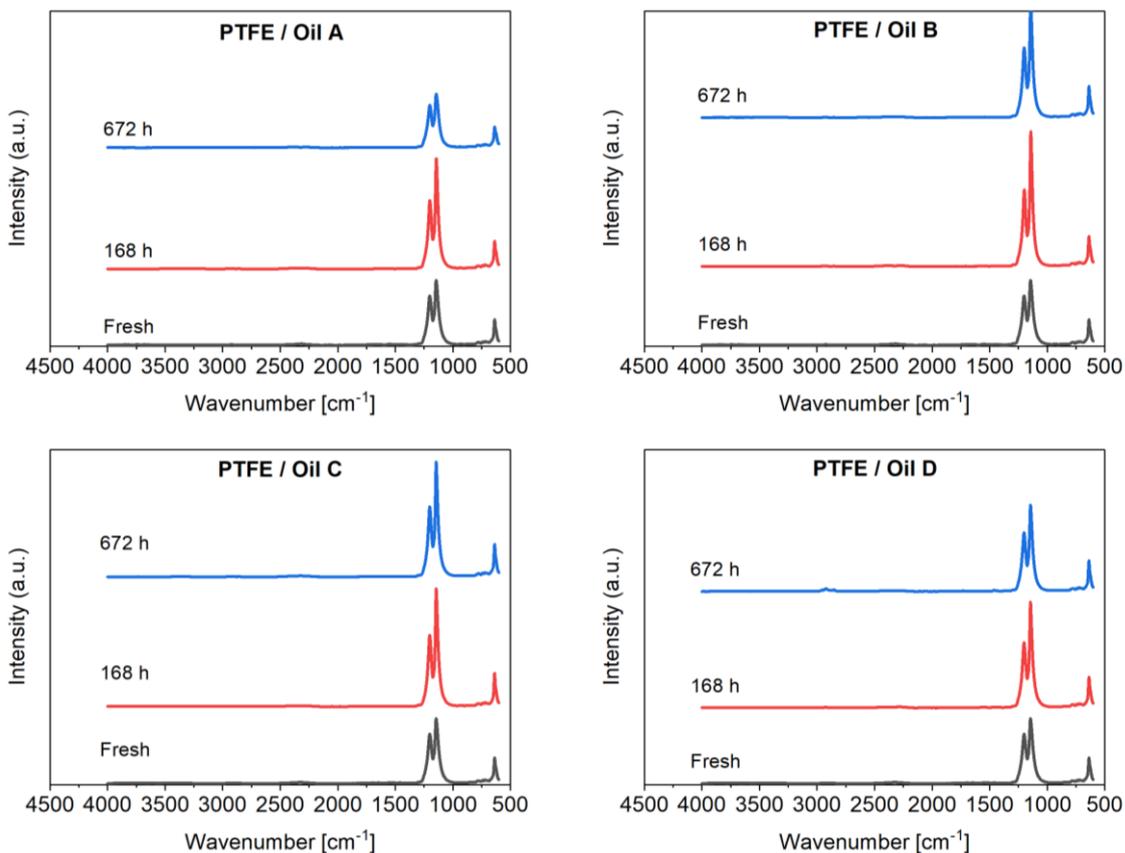

Figure S5. FT-IR spectra of the PTFE (fresh and after 168 and 672 h of ageing in the ATFs).

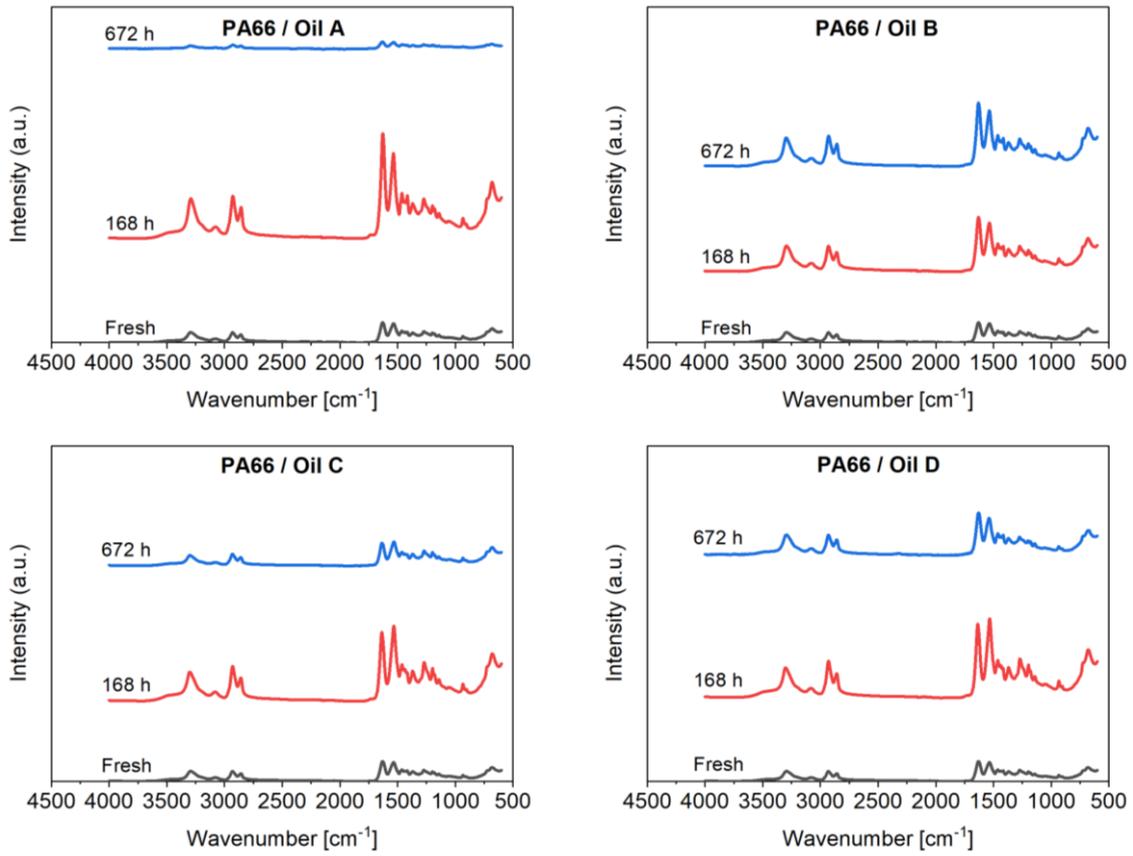

Figure S6. FT-IR spectra of the PA66 (fresh and after 168 and 672 h of ageing in the ATFs).

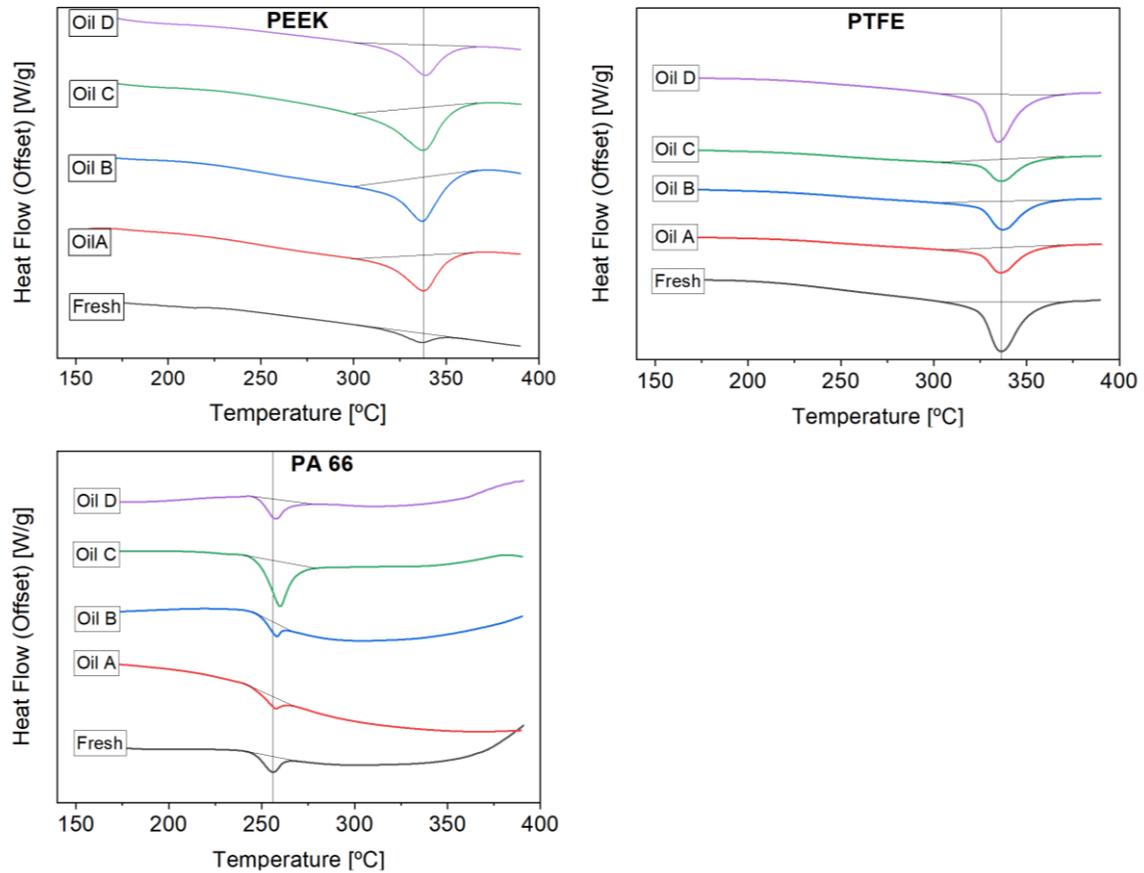

Figure S7. DSC results for the different material/oil combinations (Exo-up).

Tables S1, S2 and S3. Grubb's statistic for every peak ratio.
 (we offer the estimation of every G value although it is meaningful only for the highest and lowest values).

Table S1. Grubb's statistic for every peak ratio for PEEK.
