

“Beyond platinum: ICIs in metastatic cervical cancer. A systematic review.”

SUPPLEMENTARY MATERIAL

Table S1. PICOS structure for study selection.

<u>P</u>atients	Adult women with cervical cancer in the recurrent/metastatic setting
<u>I</u>ntervention	Immune checkpoint inhibitors (ICIs)
<u>C</u>omparison	Not ICIs
<u>O</u>utcome(s)	Response rates (ORR, DCR), survival outcomes (PFS, OS), adverse events (number and grade)
<u>S</u>tudy Design	Prospective clinical trials

	Confounding bias	Selection bias	Classification intervention bias	Deviation from intended intervention	Missing data bias	Measure outcome bias	Selected outcome bias	Overall bias
