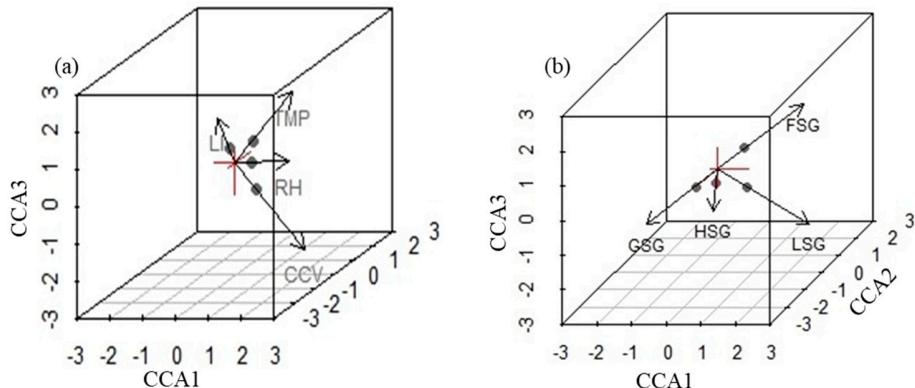

Figure S1. Three-dimensional ordination diagram between butterfly richness and (a) microclimatic variables and (b) disturbance parameters, derived using canonical correspondence analysis.

Abbreviations: light intensity (LI), relative humidity (RH), canopy cover (CCV) and temperature (TMP), fire signs (FSG), logging signs (LSG) and grazing signs (GSG).

Table S1 Grid locations, habitat types and description statistics of their associated parameters: elevation (ELV), canopy cover (CC), temperature (TMP), relative humidity (RH), light intensity (LI), wind speed (WS), human signs (HS), Grazing signs (GS), logging signs (LS), fire signs (FS)

Grid No	GPS Location	Habitat	ELV (m)	CC (%)	TMP (°C)	RH (%)	LI (x100 lux)	WS (m/s)	HS	GS	LS	FS	Species richness	Species abundance
