**Supplementary Figure**

Supplementary Figure 1. Overview of vector construction for amiR398 and MIM398.

Construct of artificial Bra-miR398a in the backbone of *MIR319a* vector (*p35S::aBra-miR398a*) and vector of mimicry Bra-miR398a (BraMIM398) using the backbone of IPS1 gene (*p35S::Bra-MIM398a*).

Supplementary Figure 2. The distribution of 5'P end reads around the miR398 target sites at BraCSD1-1 revealed by Degradome analysis. The red dot indicates the 5'P reads of miR398 cleavage sites at *BraCSD1-1*.
