

Supplementary

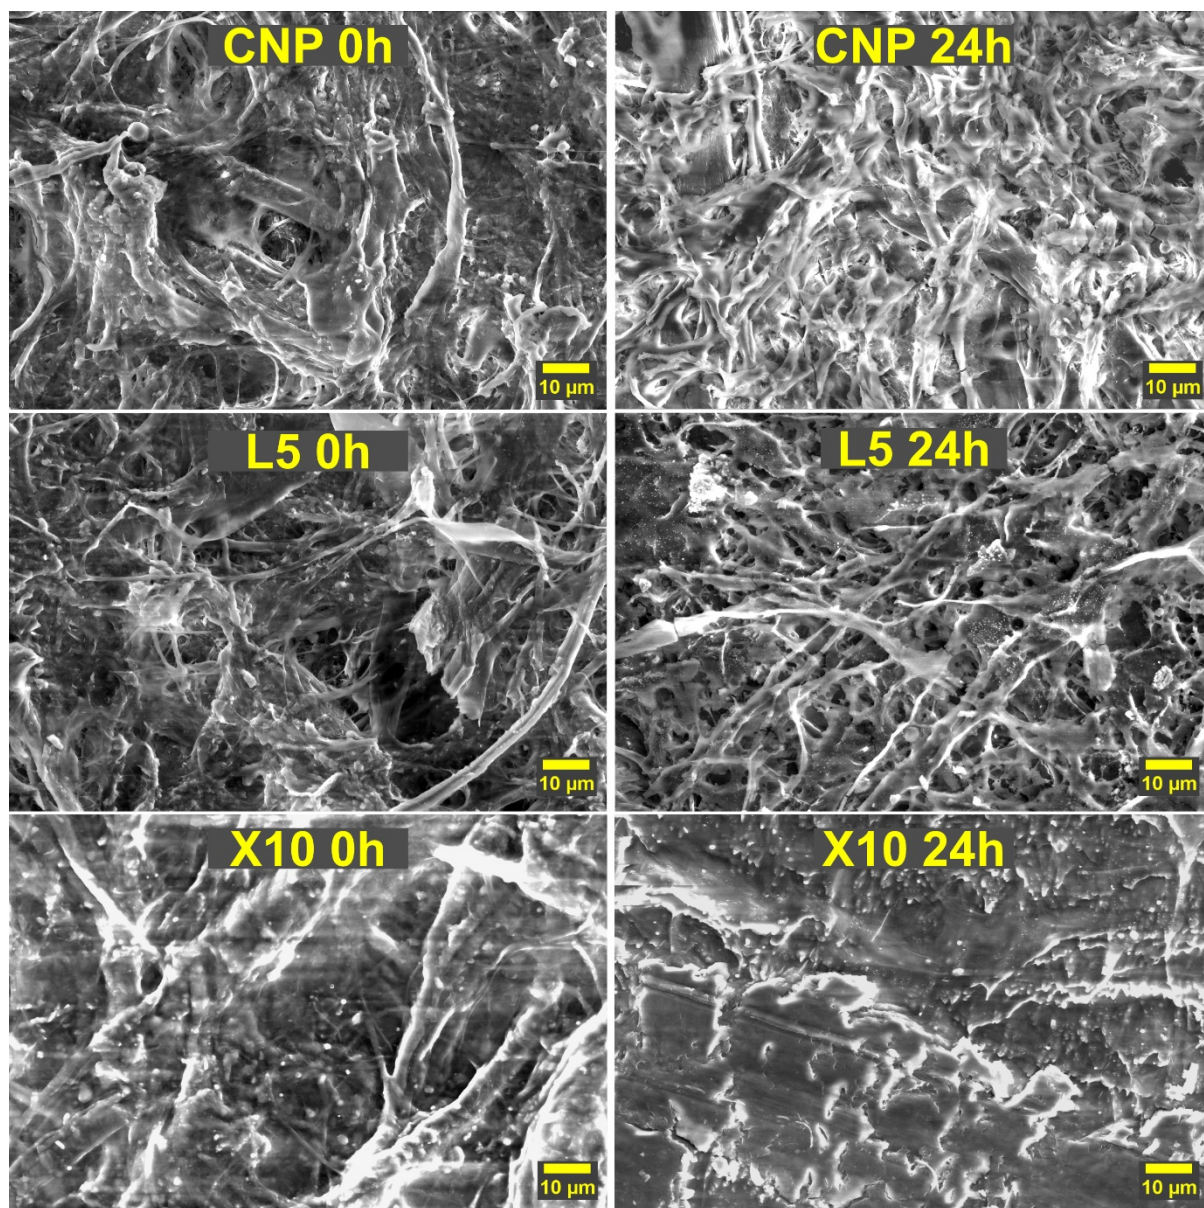

Figure S1. SEM micrographs showing the surface of selected NP compositions before and after UV aging, at a magnification of 1000x.

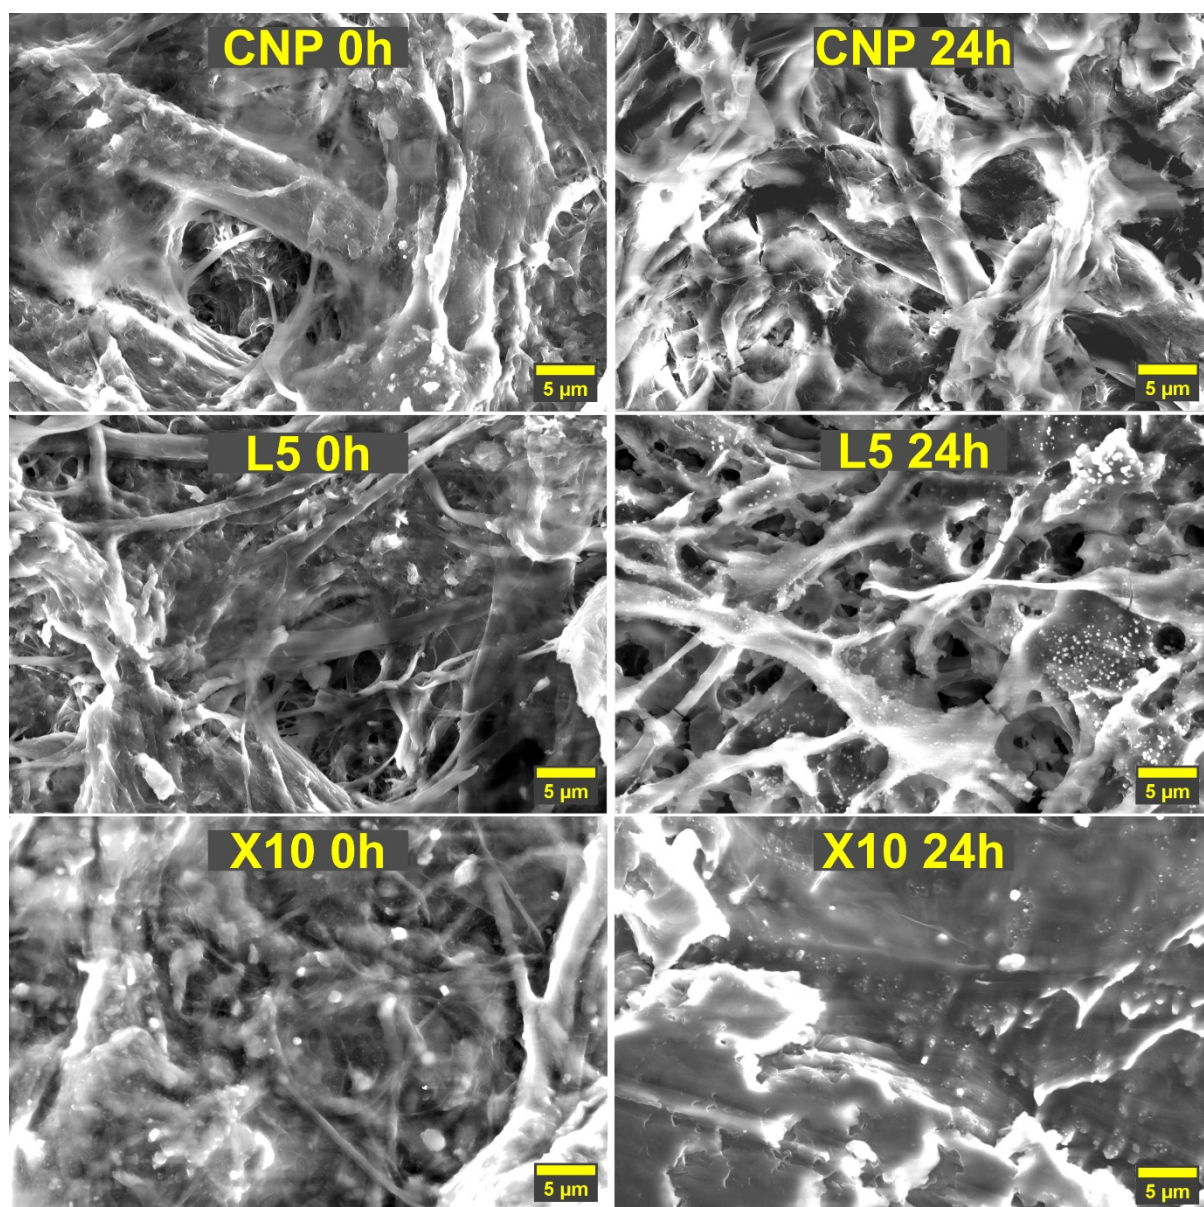

Figure S2. SEM micrographs showing the surface of selected NP compositions before and after UV aging, at a magnification of 2500x.

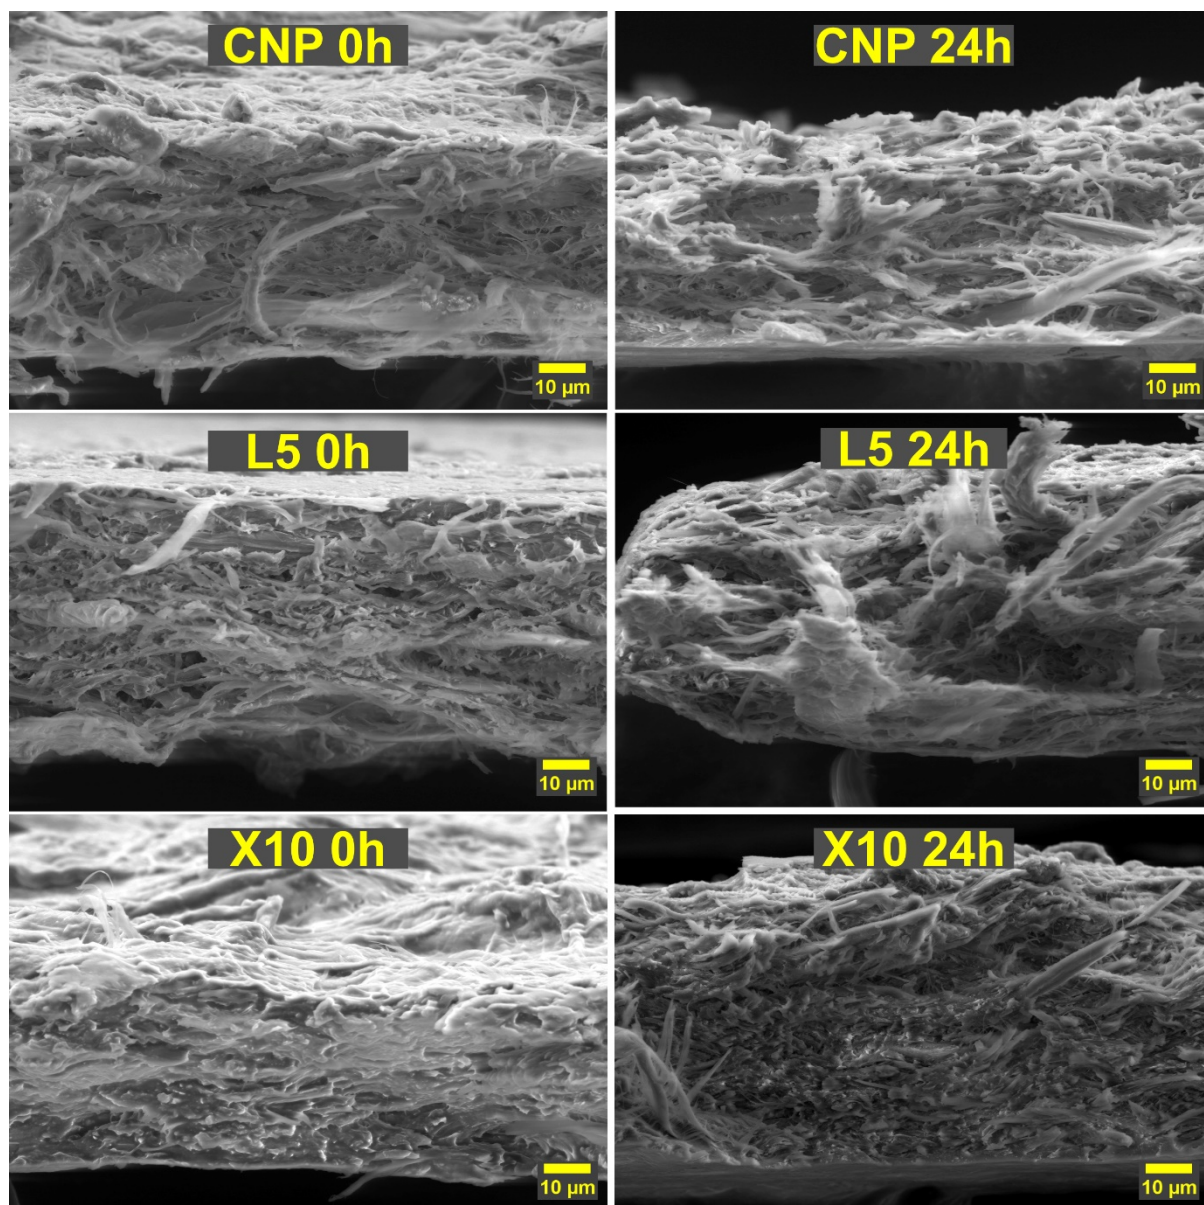

Figure S3. SEM micrographs showing the cross-section of selected NP compositions before and after UV aging, at a magnification of 1000x.
