Alignments were performed with the Multalin server (<http://multalin.toulouse.inra.fr/multalin/>). The *Apotrichum siamense* Axh1 predicted protein was aligned with Axh1 proteins from Basidiomycetes: *Apotrichum porosum* XP_028476455.1, *Cutaneotrichosporon oleaginosum* XP_018280189.1 and *Trichosporon asahii* var. *asahii* CBS2479 XP_014181348.1 and Axh1 proteins from Ascomycetes: *Hunicola insolens* AHC72382.1 Xyl43A, *Aspergillus clavatus* NRRL 1 XP_001276579.1, *Penicillium roqueforti* XP_038925552.1, *Aspergillus fumigatus* Af293 XP_747277.1, *Fusarium tjaetaba* XP_037205011.1, *Neurospora crassa* OR74A EAA36295.3 and *Colletotrichum siamense* XP_036490221.1.

↓ Acidic amino acids that form the active sites as defined for the conserved domain cd08990 (Pons et al., 2004): D in position 13, D in position 134 and E in position 225 for the *A. siamense* Axh1 protein.
