Scatter Plot of Significant Correlations Between TES and TEF Measures for Product EM.GC80, LGCQC5050, N8151035, PELCO50

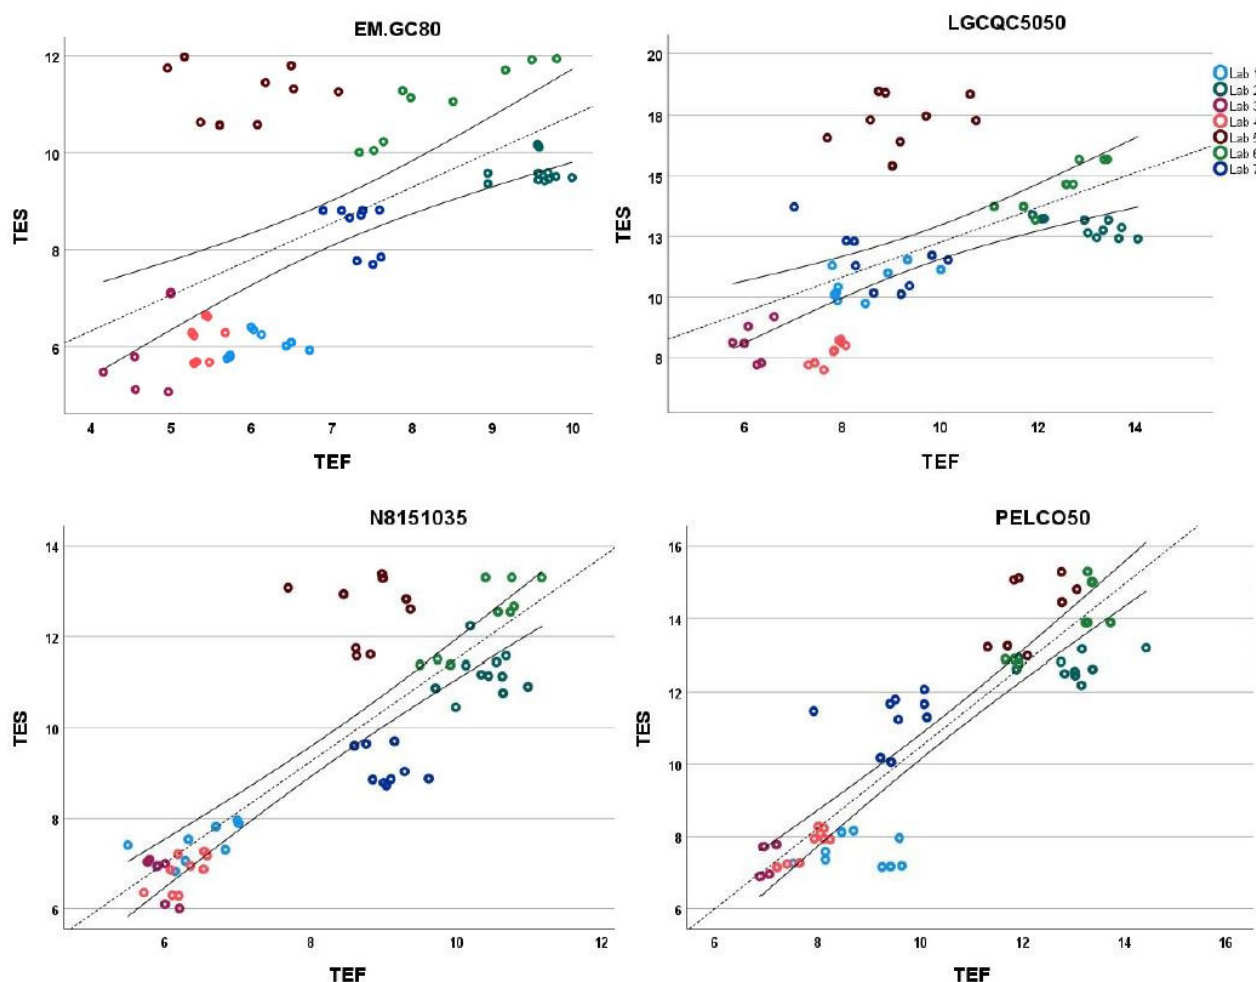

Figure S11. Scatter plot of significant correlations between TES and TEF measures for product EM.GC80, LGCQC5050, N8151035, PELCO50 ($\rho=0.533$, 0.631 , 0.777 , 0.844 , respectively). For the other AuNPs no significant correlations were found (AUCN60: $\rho=0.153$, $p=0.236$, NISTCaRM: $\rho=0.290$, $p=0.053$).
