Aerospace Technology and Space Informatics

Guest Editors:

Prof. Dr. Kai Leung Yung

Department of Industrial and
Systems Engineering, Hong Kong
Polytechnic University, Hong
Kong, China

Prof. Dr. Andrew W. H. Ip

Department of Mechanical
Engineering, University of
Saskatchewan, Saskatoon, SK
S7N 5A2, Canada

Prof. Dr. Zhuming Bi

Department of Civil and
Mechanical Engineering, Purdue
University Fort Wayne, Fort
Wayne, IN, USA

Deadline for manuscript
submissions:

20 December 2024

Message from the Guest Editors

Space exploration with innovative aerospace technology expands mankind's understanding of the Earth and the universe and promotes the social and technological progress of human civilization. Our knowledge of planet Earth and outer space has given us an understanding of the requirements for planetary habitability and the resources supporting life and its sustainable development. On this basis, aerospace technology and space informatics are becoming strategic research foci for many nations. Space informatics is one of the most exciting and contemporary research topics in deep-space exploration, which requires substantial information sharing, exchange, and integration. Space informatics enables information to be shared that facilitates the development of many subsequent research areas, which ultimately boost the development and deployment of the latest related advanced technologies.

To contribute to future space missions, spacecraft development, and other space projects, this Special Issue proposes to collect excellent research and articles on the research and development of innovative technology for space projects based on space informatics.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Konstantinos Kontis

School of Engineering, University of Glasgow, James Watt Building South, University Avenue, Glasgow G12 8QQ, Scotland, UK

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Engineering, Aerospace*) / CiteScore - Q2 (*Aerospace Engineering*)
